At the Edges of Sleep Jean Ma,2022-10-04 A free open access ebook is available upon publication Learn more at www.luminosoa.org Many recent works of contemporary art performance and film turn a spotlight on sleep wresting it from the hidden private spaces to which it is commonly relegated *At the Edges of Sleep* considers sleep in film and moving image art as both a subject matter to explore onscreen and a state to induce in the audience Far from negating action or meaning sleep extends into new territories as it designates ways of existing in the world in relation to people places and the past Defined positively sleep also expands our understanding of reception beyond the binary of concentration and distraction These possibilities converge in the work of Thai filmmaker and artist Apichatpong Weerasethakul who has explored the subject of sleep systematically throughout his career In examining Apichatpong's work Jean Ma brings together an array of interlocutors from Freud to Proust George M Li to Tsai Ming-liang Weegee to Warhol to rethink moving images through the lens of sleep Ma exposes an affinity between cinema spectatorship and sleep that dates to the earliest years of filmmaking and sheds light upon the shifting cultural valences of sleep in the present moment

The Shape of Motion Jordan Schonig, 2022 In The Shape of Motion Cinema and the Aesthetics of Movement author Jordan Schonig provides a new way of theorizing cinematic motion by examining cinema's motion forms structures patterns or

shapes of movement unique to the moving image From the wild and unpredictable motion of flickering leaves and swirling dust that captivated early spectators to the pulsing abstractions that emerge from rapid lateral tracking shots to the bleeding pixel formations caused by the glitches of digital video compression each motion form opens up the aesthetics of movement to film theoretical inquiry By pairing close analyses of onscreen movement in narrative and experimental films with concepts from Maurice Merleau Ponty Henri Bergson and Immanuel Kant Schonig rethinks longstanding assumptions within film studies such as indexical accounts of photographic images and analogies between the camera and the human eye Arguing against the intuition that cinema reproduces our natural perception of motion The Shape of Motion shows how cinema's motion forms do not merely transpose the movements of the world in front of the camera they transform them
