essential things presented in this book the great work of both authors which I am proud of Prof Rachmat Witoelar Indonesia's President's Special Envoy for Climate Change 2015-2019 and advisor to I SER UI and CAIPSDCC The concept of sustainable development is a development concept that ensures the fulfillment of the human needs of the present generation without compromising the ability of future generations to meet their needs That is the idea of sustainable development emphasizes the development of technologies that can increase productivity and reduce the level of damage The concept of sustainable development is an effort to integrate three aspects of life namely social economic and environmental in a synergistic relationship supported by infrastructure and institutions This concept is in line with the avoidance of shell game theory where shell game theory solves the problem by creating another problem The book written by Prof Jatna Supriatna and his colleague Prof Ralph Lenz from the United States on environmentally sustainable development in Indonesia is very well written It suits students environmental experts planning bureaucrats and legislature members Plus those who are doing development planning both at home and abroad Each environmental problem is described in detail and clarity and the solution options are given so that sound environmental management can be sustainable Prof Satryo Brodjonegoro President of Indonesian Academy of Sciences Indonesia is an archipelago country that harbors natural resources It is among the countries with the most complete and extensive natural resource base perhaps trailing only Brazil Still using natural resources as input for current production processes has increased yearly depletion With its abundant natural resources Indonesia should have become a prosperous country from an economic perspective But yearly rising levels of natural resource depletion in many regions of the country have occurred without an increase in equitable human welfare those words that I picked up from Prof Jatna Supriatna and his friend's book I support this book's aim that environmental sustainability is necessary for Indonesia This book should be read not only by students Environment NGOs and lecturers but also decision makers Dede Djuhana Ph D Dean of Faculty of Mathematics and Natural Sciences Universitas Indonesia **Regional**
