Smart Business Networks:

Smart Business Networks Peter H.M. Vervest, Eric van Heck, Ken Preiss, Louis-Francois Pau, 2004-09-06 Scientists from management and strategy information systems engineering and telecommunications have discussed a novel concept Smart Business Networks They see the future as a developing web of people and organizations bound together in a dynamic and unpredictable way creating smart outcomes from quickly re configuring links between actors The question is What should be done to make the outcomes of such a network smart that is just a little better than that of your competitor More agile with less pain with more return to all the members of the network now and over time The technical answer is to create a business operating system that should run business processes on different organisational platforms Business processes would become portable The end to end management of processes running across many different organizations in many different forms would become possible This book presents you the outcomes of an energizing and new direction in management science

Networked Digital Technologies, Part II Filip Zavoral, Jakub Yaghob, Pit Pichappan, Eyas El-Qawasmeh, 2010-06-30 On behalf of the NDT 2010 conference the Program Committee and Charles University in Prague Czech Republic we welcome you to the proceedings of the Second International Conference on Networked Digital Technologies NDT 2010 The NDT 2010 conference explored new advances in digital and Web technology applications It brought together researchers from various areas of computer and information sciences who addressed both theoretical and applied aspects of Web technology and Internet applications We hope that the discussions and exchange of ideas that took place will contribute to advancements in the technology in the near future The conference received 216 papers out of which 85 were accepted resulting in an acceptance rate of 39% These accepted papers are authored by researchers from 34 countries covering many significant areas of Web applications Each paper was evaluated by a minimum of two reviewers Finally we believe that the proceedings document the best research in the studied areas We express our thanks to the Charles University in Prague Springer the authors and the organizers of the conference *The Network Experience* Peter H.M. Vervest, Diederik W. van Liere, Li Zheng, 2008-10-14 Digital networking technologies are empowering organizations to form dynamic networks generating exceptional or smart results These Smart Business Networks SBNs enable individual organizations to compete more effectively and to respond better to a changing world This idea attracted a diverse group of academic scholars and business professionals to Beijing from May 19-23 2008 hosted by Tsinghua University They discovered new ways to manage network resources operate business processes across a network create a business operations platform understand the importance of network position and the smart mastering of technology Effective managers they concluded must have a firm understanding of these fundamental network concepts in order to orchestrate the networks of the future This book presents the results of an intense and energizing event which resulted in new theoretical foundations and practical insights Digital Enterprises Henderik A. Proper, Bas van Gils, Kazem Haki, 2023-11-14 This book explores different aspects of and provides concrete

suggestions to meet the three main challenges for becoming a Digital Enterprise the transition to the digital age the emergence of service ecosystems and the growing role of data as a key underlying resource As a result of these intertwined and mutually amplifying trends today s enterprises are confronted with several challenges that profoundly impact their design from the definitions of products and services offered to their clients via the business processes that deliver these products and services to the underlying IT infrastructure The contributions which are written by leading enterprise architecture researchers and managers of large corporations cover four key aspects which form each one part of the book Part I presents experiences how different enterprises currently already need to embrace and exploit new challenges like blockchain customer centric services or value co creation networks Part II looks at the need for a new design logic i e the need for new ways of thinking regarding the design of enterprises Part III is concerned with the coordination needed among different stakeholders of the ensuing continuous transformations Part IV eventually reflects on the ongoing consequences for enterprise modeling as used to capture both the current affairs of an enterprise as well as design study its possible future affairs The target audience of this book are both master and PhD level students who want to gain insights into key aspects of the challenges confronting digital enterprises as well as enterprise architects and information managers working in enterprises that are on their way to become digital Coordination in Service Value Networks Benjamin Sebastian

Collaborative Networks for a Sustainable World Luis M. Camarinha-Matos, Xavier Boucher, Hamideh Afsarmanesh, 2010-10-02 Collaborative Networks for a Sustainable World Aiming to reach a sustainable world calls for a wider collaboration among multiple stakeholders from different origins as the changes needed for sustainability exceed the capacity and capability of any individual actor In recent years there has been a growing awareness both in the political

sphere and in civil society including the business sectors on the importance of sustainability Therefore this is an important and timely research issue not only in terms of systems design but also as an effort to borrow and integrate contributions from different disciplines when designing and organizing those systems The discipline of collaborative networks especially which has already emerged in many application sectors shall play a key role in the implementation of effective sustainability strategies PRO VE 2010 focused on sharing knowledge and experiences as well as identifying directions for further research and development in this area The conference discussed models infrastructures support tools and governance principles developed for collaborative networks as important resources to support multi stakeholder sustainable developments Furthermore the challenges of this theme open new research directions for CNs PRO VE 2010 held in St

Desouza, 2007 The Editor Kevin Desouza has organized the chapters under three categories discussion of the concept of agile information systems i.e. defining agile information management its attributes antecedents consequences etc discussion of information systems within the context of agility i.e. descriptions of agile information systems and their attributes how to build agile information systems etc discussion of organizational management issues in the context of agile information systems i.e. how to prepare the organization for agile information systems management of agile information systems for improved organizational performance etc This is the first book to address the hot topic of agile information systems Contributions break new ground and provide concrete applications for practice Contributors include highly respected academics from around the world

Context-Aware Systems and Applications Phan Cong Vinh, Le Tuan Anh, Nguyen Thi Thuy Loan, Waralak Vongdoiwang Siricharoen, 2017-04-10 This book constitutes the proceedings of the 5th International Conference on Context Aware Systems and Applications ICCASA 2016 held in Thu Dau Mot Vietnam in November 2016 The 22 revised full papers presented were carefully selected from 35 submissions and cover a wide spectrum in the area of Context Aware Systems CAS CAS is characterized by its self facets such as self organization self configuration

self healing self optimization self protection where context awareness used to dynamically control computing and networking functions The overall goal of CAS is to realize nature inspired autonomic systems that can manage themselves without direct human interventions

The Network Challenge (Chapter 12) Colin Crook,2009-05-19 Complexity theory offers valuable insights into the interactions of complex systems such as networked enterprises Complexity theory addresses the network effects that result from interactions between many individual actors This chapter examines the implications of this theory for business and how these effects influence key management areas such as making sense strategy and organization The author explores issues such as fads and crowds using information and technology and the use of agent based simulations Finally he explores the shifts in management thinking and business education needed to utilize complexity theory a shift in mental models that may be crucial to success in a networked world

Pervasive Collaborative Networks Luis M. Camarinha-Matos,Willy Picard,2008-08-27 COLLABORATIVE NETWORKS Becoming a pervasive paradigm In recent years the area of collaborative networks is being consolidated as a new discipline Camarinha Matos Afsarmanesh 2005 that encompasses and gives more structured support to a large diversity of collaboration forms In terms of applications besides the traditional sectors represented by the advanced supply chains virtual enterprises virtual organizations virtual teams and their breeding environments new forms of collaborative structures are emerging in all sectors of the society Examples can be found in e government intelligent transportation systems collaborative virtual laboratories agribusiness elderly care silver economy etc In some cases those developments tend to adopt a terminology that is specific of that domain often the involved actors in a given domain are not fully aware of the developments in the mainstream research on collaborative networks For instance the grid community adopted the term virtual organization but focused mainly on the resource sharing perspective ignoring most of the other aspects involved in collaboration The European enterprise interoperability community which was initially focused on the intra enterprise aspects is moving towards inter enterprise collaboration Collaborative networks are thus becoming a pervasive paradigm giving basis to new socio organizational structures
