Smelling: The Key to Enlightenment Clayton Tylor, 2024-10-15 The sense of smell has both an outer natural sense and an inner spiritual sense The inner sense corresponds to the faculty of discrimination It is developed through the practice of smelling while nose breathing This is different from mouth breathing because the interiors of the nostrils also correspond to the angelic or celestial sphere of Universal Love The celestial sphere is the affection of good It is all feeling Smelling while breathing quiets the mind chatter and lifts the consciousness to the rational or spiritual mind In that silence the affection of good shines through the physical body and expands out into the spiritual body We interpret it as the feeling of knowing but it is the birth of faith Not blind faith because each knowing moment fills our consciousness with more light from faith Through the affections of love radiating outwards as faith aligns us to the spiritual affections of good and truth They are charity for all and faith in humanity This is the affection of the Brotherhood of Mankind It is the feeling of mutual love manifesting now during this Age of Aquarius Each of us can do our part by bringing the energies into balance through meditation and by smelling while breathing

Applied Olfactory Cognition Gesualdo M Zucco, Benoist Schaal,Mats Olsson,Ilona Croy,2014-12-02 Foreword by Richard J Stevenson Macquarie University Australia It was long thought that the human nose might be able to discriminate somewhere in the order of 10 000 different odourants The recent

finding that the human nose can discriminate something like a trillion different smells serves as yet another reminder that we have again underestimated the capacity of our sense of smell Bushdid Magnasco Vosshall Keller 2014 This volume serves as a further corrective for anyone who should hold the view that olfaction is unimportant in human affairs The papers presented in this ebook carefully collated and overseen by Aldo Zucco Benoist Schaal Mats Olsson and Ilona Croy showcase a large number of quite different reasons for studying the applied side of olfaction and indeed human olfaction in general The 23 contributions presented here cover a broad range of topics which illustrate contemporary interests in our field Although with a strong applied focus a noteworthy feature of this ebook is the richness of the theoretical perspectives that are developed These range from considerations of olfactory perception memory expertise and priming right the way through to receptor genetics These contributions from many leading experts in the field will surely shape much of the applied work linking olfaction to disease which is a further focus of this ebook In respect to health and disease the chapters on aging pregnancy depression alcohol dependency and environmental odours present overviews and rich new data on many contemporary problems to which the study of olfaction is now contributing A particularly notable aspect of olfactory experience is the affective impact that odours can have on people and their lives The ebook covers some particularly intriguing aspects of work in this area with empirical studies investigating dissociations between wanting and liking stress reduction in the elderly mother infant bonding and the emotions that different odourants can evoke This affective line of work is nicely complemented by empirical studies on expertise the effect of odours on visual attention and the relationship between particular personality traits and interest in olfaction The gradual appropriation of methods from cognitive neuroscience into olfaction is also nicely represented in this ebook with at least three of the chapters reporting data using neuroimaging including a particular intriguing study looking at recognition of odours in mixtures Finally the close links between olfactory perception and sensory evaluation are also reflected in a chapter on wine I hope that readers of this e book will be struck as I have been in reading its various chapters how much olfaction affects our lives and how the study of this sense can enrich it
