The Oxford Handbook of Mesoamerican Archaeology Deborah L. Nichols, Christopher A. Pool, 2012-08-22

The Oxford Handbook of Mesoamerican Archaeology provides a current and comprehensive guide to the recent and on-going archaeology of Mesoamerica. Though the emphasis is on prehispanic societies, this Handbook also includes coverage of important new work by archaeologists on the Colonial and Republican periods. Unique among recent works, the text brings together in a single volume, article-length regional syntheses and topical overviews written by active scholars in the field of Mesoamerican archaeology. The first section of the Handbook provides an overview of recent history and trends of Mesoamerica, and articles on national archaeology programs and practice in Central America and Mexico, written by archaeologists from these countries. These are followed by regional syntheses organized by time period, beginning with early hunter-gatherer societies and the first farmers of Mesoamerica, and concluding with a discussion of the Spanish Conquest and frontiers and peripheries of Mesoamerica. Topical and comparative articles comprise the remainder of the Handbook. They cover important dimensions of prehispanic societies from ecology, economy, and environment to social and political relations, and discuss significant methodological contributions such as geochemical source studies, as well as new theories and diverse theoretical perspectives. The Handbook concludes with a section on the archaeology of the Spanish conquest and the Colonial and Republican periods, to connect the prehispanic proto-historic and historic periods. This volume will be a must-read for students and professional archaeologists, as well as other scholars including historians, art historians, geographers, and ethnographers with an interest in Mesoamerica.

Archaeoastronomy and the Maya Gerardo Aldana y Villalobos, Edwin L. Barnhart, 2014-05-30

Archaeoastronomy and the Maya illustrates archaeoastronomical approaches to ancient Mayan cultural production. The book is contextualized through a history of archaeoastronomical investigations into Mayan sites originating in the 19th century, discovery of astronomical tables within hieroglyphic books. Early 20th-century archaeological excavations revealed inscriptions carved into stone that also preserved astronomical records along with architecture that was built to reflect astronomical orientations. These materials provided the basis of a growing professionalized archaeoastronomy, blossoming in the 1970s and expanding into recent years. The chapters here exemplify the advances made in the field during the early 21st century, as well as the on-going diversity of approaches presenting new perspectives and discoveries in ancient Mayan astronomy that result from recent studies of architectural alignments, codices, epigraphy, iconography, ethnography, and calendrics. More than just investigations of esoteric ancient sciences, studies of ancient Mayan astronomy have profoundly aided our understanding of Mayan worldviews. Concepts of time and space, meanings encoded in religious art

intentions underlying architectural alignments and even methods of political legitimization are all illuminated through the study of Mayan astronomy

The Beats in Mexico David Stephen Calonne, 2022-04-15 Mexico features prominently in the literature and personal legends of the Beat writers from its depiction as an extension of the American frontier in Jack Kerouac's On the Road to its role as a refuge for writers with criminal pasts like William S Burroughs Yet the story of Beat literature and Mexico takes us beyond the movement's superstars to consider the important roles played by lesser known female Beat writers The first book length study of why the Beats were so fascinated by Mexico and how they represented its culture in their work this volume examines such canonical figures as Kerouac Burroughs Ginsberg Lamantia McClure and Ferlinghetti It also devotes individual chapters to women such as Margaret Randall Bonnie Bremser and Joanne Kyger who each made Mexico a central setting of their work and interrogated the misogyny they encountered in both American and Mexican culture The Beats in Mexico not only considers individual Beat writers but also places them within a larger history of countercultural figures from D H Lawrence to Antonin Artaud to Jim Morrison who mythologized Mexico as the land of the Aztecs and Maya where shamanism and psychotropic drugs could take you on a trip far beyond the limits of the American imagination

Reshaping the World Ana Díaz, 2020-04-01 Reshaping the World is a nuanced exploration of the plurality complexity and adaptability of Precolumbian and colonial era Mesoamerican cosmological models and the ways in which anthropologists and historians have used colonial and indigenous texts to understand these models in the past Since the early twentieth century it has been popularly accepted that the Precolumbian Mesoamerican cosmological model comprised nine fixed layers of underworld and thirteen fixed layers of heavens This layered model which bears a close structural resemblance to a number of Eurasian cosmological models derived in large part from scholars reliance on colonial texts such as the post Spanish Conquest Codex Vaticanus A and Florentine Codex By reanalyzing and recontextualizing both indigenous and colonial texts and imagery in nine case studies examining Maya Zapotec Nahua and Huichol cultures the contributors discuss and challenge the commonly accepted notion that the cosmos was a static structure of superimposed levels unrelated to and unaffected by historical events and human actions Instead Mesoamerican cosmology consisted of a multitude of cosmographic repertoires that operated simultaneously as a result of historical circumstances and regional variations These spaces were and are dynamic elements shaped defined and redefined throughout the course of human

history Indigenous cosmographies could be subdivided and organized in complex and diverse arrangements as components in a dynamic interplay which cannot be adequately understood if the cosmological discourse is reduced to a superposition of nine and thirteen levels Unlike previous studies which focus on the reconstruction of a pan Mesoamerican cosmological model Reshaping the World shows how the movement of people ideas and objects in New Spain and neighboring regions produced a deep reconfiguration of Prehispanic cosmological and social structures enriching them with new conceptions of space and time The volume exposes the reciprocal influences of Mesoamerican and European theologies during the colonial era offering expansive new ways of understanding Mesoamerican models of the cosmos Contributors Sergio Botta Ana D az Kerry Hull Katarzyna Mikulska Johannes Neurath Jesper Nielsen Toke Sellner Reunert David Tav rez Alexander Tokovinine Gabrielle Vail Constructing Power and Place in Mesoamerica Merideth Paxton, Leticia Staines Cicero, 2017-12-15 Identities of power and place as expressed in paintings from the periods before and after the Spanish conquest of Mesoamerica are the subject of this book of case studies from Central Mexico Oaxaca and the Maya area These sophisticated skillfully rendered images occur with architecture in manuscripts on large pieces of cloth and on ceramics The Maya World Scott R. Hutson, Traci Ardren, 2020-06-17 The Maya World brings together over 60 authors representing the fields of archaeology art history epigraphy geography and ethnography who explore cutting edge research on every major facet of the ancient Maya and all sub regions within the Maya world The Maya world which covers Guatemala Belize and parts of Mexico Honduras and El Salvador contains over a hundred ancient sites that are open to tourism eight of which are UNESCO World Heritage Sites and many thousands more that have been dug or await investigation In addition to captivating the lay public the ancient Maya have attracted scores of major interdisciplinary research expeditions and hundreds of smaller projects going back to the 19th century making them one of the best known ancient cultures The Maya World explores their renowned writing system towering stone pyramids exquisitely painted murals and elaborate funerary tombs as well as their creative agricultural strategies complex social economic and political relationships widespread interactions with other societies and remarkable cultural resilience in the face of historical ruptures This is an invaluable reference volume for scholars of the ancient Maya including archaeologists historians and anthropologists **Thunder Doesn't Live Here Anymore** Anath Ariel de Vidas, 2004 Now available in English Thunder Doesn't Live Here Anymore explores the highly unusual worldview of the Teenek people of Tantoyuca whose self deprecating cosmology diverges quite radically from patterns of positive cultural identity among other indigenous groups in Mexico The Teenek speak of themselves as dirty dumb ignorant and fearful a vocabulary that serves to justify the Teenek's condition of social and spatial marginality in relation to their mestizo neighbours However as Anath Ariel de Vidas argues in this masterful ethnography this self denigration added to the absence among the Teenek of emblematic Indian features such as traditional costumes agricultural rituals specific ceremonies or systems of religious cargoes or offices are not synonymous with collective anomie Rather as

Ariel de Vidas demonstrates their seeming ontological acceptance of a marginal social and economic condition is in its own peculiar way a language of indigenous resistance
