The Major Prose Of Thomas Henry Huxley:

The Major Prose of Thomas Henry Huxley Thomas Henry Huxley, 1997 Thomas Henry Huxley 1825-1895 was one of the intellectual giants of Victorian England. A surgeon by training, he became the principal exponent of Darwinism and popularizer of scientific naturalism. Huxley was a prolific essayist and his writings put him at the center of intellectual debate in England during the later half of the nineteenth century. *The Major Prose of Thomas Henry Huxley* fills a very real and pressing chasm in history of science books, bringing together almost all of Huxley's major nontechnical prose, including *Man's Place in Nature* and both *Evolution in Ethics* and its *Prolegomena*. **Fifty Major Thinkers on Education** Joy Palmer, Liora Bresler, David Cooper, 2002-09-11 In this unique work, some of today's greatest educators present concise, accessible summaries of the great educators of the past. Covering a time span from 500 BC to the early twentieth century, each essay gives key biographical information, an outline of the individual's principal achievements and activities, an assessment of their impact and influence, a list of their major writings, and suggested further reading. Together with *Fifty Modern Thinkers on Education*, this book provides a unique reference guide for all students of education. [Free Will and Determinism in Joseph Conrad's Major Novels](#) Ludwig Schnauder, 2009 Preliminary Material Introduction Free Will and Determinism A Philosophical Introduction Free Will and Determinism in Nineteenth and Early Twentieth Century Britain Conrad and the Problem of Free Will *Heart of Darkness* and the Empire Machine *Nostromo* and the Mechanics of History *The Secret Agent* and the Urban Jungle Conclusion Works Cited *Thomas Henry Huxley* John Vernon Jensen, 1991 This volume presents a fresh view of Huxley's rhetorical experiences and legacy and closely analyzes his battle with orthodox theology. Careful attention is given to his reliance on three confidants: his maiden public lecture in 1852, his debate with Bishop Wilberforce in 1860, and his 1876 lecture tour of the United States. *The Cambridge History of the Gothic: Volume 2, Gothic in the Nineteenth Century* Catherine Spooner, 2020-08-06 This second volume of *The Cambridge History of the Gothic* provides a rigorous account of the Gothic in British, American, and Continental European culture from the Romantic period through to the Victorian fin de siècle. Here, leading scholars in the fields of literature, theatre, architecture, and the history of science and popular entertainment explore the Gothic in its numerous interdisciplinary forms and guises, as well as across a range of different international contexts. As much a cultural history of the Gothic in this period as an account of the ways in which the Gothic mode has participated in the formative historical events of modernity, the volume offers fresh perspectives on familiar themes while also drawing new critical attention to a range of hitherto overlooked concerns. From Romanticism to Penny Bloods, Dickens, and even the railway system, the volume provides a compelling and comprehensive study of nineteenth-century Gothic culture. **Routledge Encyclopaedia of Educational Thinkers** Joy A. Palmer, Cooper, 2016-05-20 The Routledge Encyclopaedia of Educational Thinkers comprises 128 essays by leading scholars analysing the most important, influential, innovative, and interesting thinkers on education of all time. Each of the chronologically arranged entries explores why a particular thinker is

significant for those who study education and explores the social historical and political contexts in which the thinker worked Ranging from Confucius and Montessori to Dewey and Edward de Bono the entries form concise accessible summaries of the greatest or most influential educational thinkers of past and present times Each essay includes the following features concise biographical information on the individual an outline of the individual s key achievements and activities an assessment of their impact and influence a list of their major writings suggested further reading Carefully brought together to present a balance of gender and geographical contexts as well as areas of thought and work in the broad field of education this substantial volume provides a unique history and overview of figures who have shaped education and educational thinking throughout the world Combining and building upon two internationally renowned volumes this collection is deliberately broad in scope crossing centuries boundaries and disciplines The Encyclopaedia therefore provides a perfect introduction to the huge range and diversity of educational thought Offering an accessible means of understanding the emergence and development of what is currently seen in the classroom this Encyclopaedia is an invaluable reference guide for all students of education including undergraduates and post graduates in education or teacher training and students of related disciplines

Modern Anglophone Drama by Women Alan P. Barr, 2007 Alan P Barr has brought together eleven world class modern plays by women that show not only their artistry but also their variety and their passion Drawn from nine different countries other than the United States and England that use English as their literary language the plays reflect the concerns of women across the globe The imagery and dramatic conventions may shift and the tones vary but the need to be strong and its difficulty the sense of a world that is anything but nurturing or ideal and the suspect nature of family life and relations are constant themes The struggle over language in countries that are very often ex colonies conveys the frequent overlap between feminist and postcolonial focuses The diversity of Englishes on stages from Singapore to South Africa is a lovely curtain call to this theater festival

David Knight, 2013-04-26 Of all the inventions of the nineteenth century, the scientist is one of the most striking. In revolutionary France, the science student taught by men active in research was born, and a generation later, the graduate student doing a PhD emerged in Germany. In 1833, the word scientist was coined; forty years later, science increasingly specialised, was becoming a profession. Men of science rivalled clerics and critics as sages; they were honoured as national treasures and buried in state funerals. Their new ideas invigorated the life of the mind. Peripatetic congresses great

exhibitions museums technical colleges and laboratories blossomed and new industries based on chemistry and electricity brought prosperity and power economic and military Eighteenth century steam engines preceded understanding of the physics underlying them but electric telegraphs and motors were applied science based upon painstaking interpretation of nature The ideas discoveries and inventions of scientists transformed the world lives were longer and healthier cities and empires grew societies became urban rather than agrarian the local became global And by the opening years of the twentieth century science was spreading beyond Europe and North America and women were beginning to be visible in the ranks of scientists Bringing together the people events and discoveries of this exciting period into a lively narrative this book will be essential reading both for students of the history of science and for anyone interested in the foundations of the world as we know it today

Newman in the Story of Philosophy D. J. Pratt Morris-Chapman, 2021-07-01 Saint John Henry Newman is widely acknowledged to be an important theologian Despite this Newman commentators believe that his work has received little recognition by philosophers This book explores whether or not Newman s supposed philosophical isolation constitutes a misconception in Newman historiography First of all it does this by examining Newman s general philosophical reception over the last two centuries surveying a wide range of philosophical positions and philosophers from the many different branches of this discipline The book then focuses upon whether or not Newman has made a contribution to one specific philosophical position seldom given attention within Newman scholarship the particularist approach to epistemology In its investigations into this and the other more general dimension of Newman s philosophical reception the book offers an historical re evaluation of Newman s philosophical legacy

Shapes of Time in British Twenty-First Century Quantum Fiction Sonia Front, 2015-09-04 This book addresses the notion of time and temporality and its various conceptualizations in the theories of the new physics utilized as a thematic and formal framework in the British novel of the twenty first century As the Newtonian conception of reality does not provide a reliable framework within which to situate human experience and generate meaning fiction writers have recognized quantum mechanics as a potent source from which to draw in search of new metaphors The quantum has become a part of the understanding of reality and its concepts and assumptions have been absorbed into the textual structure and content of literary fiction Shapes of Time in British Twenty First Century Quantum Fiction examines human temporality as mediated by the timeshapes imagined within the context of the new physics and explores the philosophical implications for human temporality and identity of situating an individual within the realm of physical time Its chapters deal with various concepts of the new physics connected with temporality and their appropriation in a selected novel parallel universes in Andrew Crumey s Sputnik Caledonia 2008 eternal recurrence and Poincar s theorem in David Mitchell s Cloud Atlas 2004 chaos theory in Samantha Harvey s The Wilderness 2009 and the end of time in Scarlett Thomas s The End of Mr Y 2006 Each of them corresponds to a different conceptual shape of time tree concertina spiral and snapshot respectively which is enacted on the formal level Analyzing the new time constructs in a narrative this book thus

uncovers passages between scientific and humanistic standpoints and reveals quantum fiction to be an effective tool for visualizing the subjective non homogenous experience of private time

Did Darwin Write the Origin Backwards? Elliott Sober, 2011-03-31 Is it accurate to label Darwin's theory the theory of evolution by natural selection given that the concept of common ancestry is at least as central to Darwin's theory Did Darwin reject the idea that group selection causes characteristics to evolve that are good for the group though bad for the individual How does Darwin's discussion of God in The Origin of Species square with the common view that he is the champion of methodological naturalism These are just some of the intriguing questions raised in this volume of interconnected philosophical essays on Darwin The author's approach is informed by modern issues in evolutionary biology but is sensitive to the ways in which Darwin's outlook differed from that of many biologists today The main topics that are the focus of the book common ancestry group selection sex ratio and naturalism have rarely been discussed in their connection with Darwin in such penetrating detail Author Professor Sober is the 2008 winner of the Prometheus Prize This biennial award established in 2006 through the American Philosophical Association is designed to honor a distinguished philosopher in recognition of his or her lifetime contribution to expanding the frontiers of research in philosophy and science This insightful collection of essays will be of interest to philosophers biologists and laypersons seeking a deeper understanding of one of the most influential scientific theories ever propounded

The Ashgate Research Companion to

Modern Imperial Histories John Marriott, 2016-03-23 Written by leading scholars this collection provides a comprehensive and authoritative overview of modern empires Spanning the era of modern imperial history from the early sixteenth century to the present it challenges both the rather insular focuses on specific experiences and gives due attention to imperial formations outside the West including the Russian Japanese Mughal Ottoman and Chinese The companion is divided into three broad sections Part I Times surveys the three main eras of modern imperialism The first was that dominated by the settlement impulse with migrants many voluntarily and many more by force making new lives in the colonies This impulse gave way most especially in the nineteenth century to a period of busy and rapid expansion which was less likely to promote new settlement and in which colonists more frequently saw their sojourn in colonial lands as temporary and related to the business mostly of governance and trade Lastly in the twentieth century in particular empires began to fail and to fall Part II Spaces studies the principal imperial formations of the modern world Each chapter charts the experience of a specific empire while at the same time placing it within the complex patterns of wider imperial constellations The individual chapters thus survey the broad dynamics of change within the empires themselves and their relationships with other imperial formations and reflect critically on the ways in which these topics have been approached in the literature In Part III Themes scholars think critically about some of the key features of imperial expansion and decline These chapters are brief and many are provocative They reflect the current state of the field and suggest new lines of inquiry which may follow from more comparative perspectives on empire The broad range of themes captures the vitality and diversity of contemporary scholarship on questions of empire and colonialism encompassing political economic and cultural processes central to the formation and maintenance of empires as well as institutions ideologies and social categories that shaped the lives both of those implementing and those experiencing the force of empire In these pages the reader will find the slave and the criminal the merchant and the maid the scientist and the artist alongside the structures which sustained their lives and their livelihoods Overall the companion emphasises the diversity of imperial experience and process Comprehensive in its scope it draws attention to the particularities of individual empires rather than over generalising as if all empires at all times and in all places behaved in a similar manner It is this contingent and historical specificity that enables us to explore in expansive ways precisely what constituted the modern empire
