The Making Of The Modern British Diet:

The Making of the Modern British Diet Derek Oddy, Derek Miller, 2025-06-20 Food is the physiological basis of man's existence but is also an expression of a society's culture and may play many roles other than physiological in terms of both personal and group relationships Originally published in 1976 *The Making of the Modern British Diet* focusses on the role of food during industrialisation and urbanisation in Britain Part One contains a series of commodity studies covering bread cereals biscuits meat milk tea and cocoa which reflect trends in the supply of some of the foods in the British diet during the nineteenth and early twentieth centuries The emphasis in Part Two is predominantly on consumption either through the study of living standards or consumer preference or through the presentation of food and the organisation of its outlets to the consumer Part Three provides a nutritional evaluation which is an entirely new approach in an historical work **John**

Pearce and the Rise of the Mass Food Market in London, 1870-1930 David W. Gutzke, 2019-11-09 At the center of sweeping change to food retailing practices in Victorian and Edwardian England lies one man John Pearce An innovative businessman and a quintessential rags to riches success story Pearce was at the forefront of the rise of the mass food market in London With his catering company Pearce Plenty he fed millions of workers who wanted fast nutritious and tasty food David W Gutzke mines a wide range of primary sources to offer a portrait of a pivotal figure in London and a leader of the temperance catering movement who had done more than can be readily recognised to render London a sober city By studying Pearce's companies as well as those of his competitors this book documents a half century of changing consumption habits in London **The Consuming Geographies of Food** Hillary J. Shaw, 2014-04-24 The consumption and distribution

of food as well as its production has become a major public policy issue over the past few decades what we eat is no longer merely a private matter but carries significant externalities for wider society Its increasing significance within the public arena implies a dissonance regarding the boundaries of food where do we draw the line between food as private and food as public What are the rights of society to impinge upon individual food consumption and what conflicts will ensue when this boundary is disputed *The Consuming Geographies of Food* explores these multiple issues of food across different regions of the world from the consumer's perspective It uniquely explicates the factors that lead customers towards certain typologies of consumption and towards certain types of retailing offering a comprehensive review of the obesity problem the phenomenon of food deserts and the issue of exclusion from a healthy diet It then considers the effects of food on the consumer the dynamic relationship between food and people and the issue of food exclusion before concluding with possible futures for food consumption from low technology projects to high technology scenarios Based on original research into food access ethics and consumption in both developed and less developed countries this book will be of interest to students researchers and academics in the fields of geography economics hospitality health marketing nutrition and sociology

Consumption and the World of Goods John Brewer, Roy Porter, 2013-06-17 The study of past society in terms of what it consumes rather than what it produces is relatively speaking a new development The focus on consumption changes the whole emphasis and structure of historical enquiry While human beings usually work within a single trade or industry as producers as say farmers or industrial workers as consumers they are active in many different markets or networks And while history written from a production viewpoint has by chance or design largely been centred on the work of men consumption history helps to restore women to the mainstream The history of consumption demands a wide range of skills It calls upon the methods and techniques of many other disciplines including archaeology sociology social and economic history anthropology and art criticism But it is not simply a melting pot of techniques and skills brought to bear on a past epoch Its objectives amount to a new description of a past culture in its totality as perceived through its patterns of consumption in goods and services Consumption and the World of Goods is the first of three volumes to examine history from this perspective and is a unique collaboration between twenty six leading subject specialists from Europe and North America The outcome is a new interpretation of the seventeenth and eighteenth centuries one that shapes a new historical landscape based on the consumption of goods and services
