## **The Mammoth Of Prophecies The Predictions Of Nostradamus And Other Prophets Visionaries And Seers:**

**The Mammoth Book of Prophecies** Damon Wilson, 2003 Nostradamus the most prolific and accurate of all the prophets is the primary focus of this in depth look at some of the chillingly accurate prophecies and predictions of catastrophe Here he is found alongside Mother Shipton the Brahan Seer pagan prophecy and police prophets There is a special focus on three predictions that all too alarmingly came true the sinking of the Titanic the 1967 Silver Bridge collapse in West Virginia and the events in New York on 11 September 2002 Consulting psychics is neither as far fetched nor as rare as it sounds however reluctant most of us are to admit it And public interest in prophecy and prophets increases dramatically in times of international tension In the years leading up to the Second World War in the months after the Cuban missile crisis following the first manned landing on the moon interest in prophecy was at an all time high as people look for clues to the future As indeed we are still doing today [The Survival Imperative](#) William E. Burrows, 2007-04-01 Using Space to Save Earth Veteran science journalist William E Burrows offers a bold new mission for the U S space program to protect the Earth from the ever growing number of perils that threaten our way of life and even our very survival We are living through one of the most dangerous times in human history Nuclear chemical and biological weapons technology are proliferating and missile technology is falling into more and more hands Extreme natural disasters like hurricanes floods fires and earthquakes are becoming increasingly costly not only in dollars but in lives as population expands Environmental crises threaten to provoke massive famines and widespread social collapse Asteroids the size of battleships streak within striking distance of the earth every year One strategy offers the best hope of protecting us from all of these dangers a revitalized national space program that coordinates efforts in global defense in environmental protection in communications and in military security The Survival Imperative offers an impassioned argument for this bold initiative To demonstrate the urgency of his cause Burrows presents a vivid scenario an impact by a moderately large asteroid that triggers a series of nuclear exchanges environmental devastation and the slow disintegration of civilization And he examines the existing space program from the heady days of the Moon landing through the political compromises that have characterized the history of NASA in the 35 years following our retreat from the Moon Most of all Burrows warns that the primary obstacle to achieving a true planetary defense program is not financial or scientific but social an unwillingness to acknowledge the urgency of the crisis and to take the political risks needed to address it The question says Burrows is not whether we can do it but whether we will act before it s too late At the Publisher s request this title is being sold without Digital Rights Management Software DRM applied
