

The cover features several thick, hand-drawn style teal lines that flow across the cream-colored background. These lines are wavy and organic, resembling stylized waves or perhaps the growth of a plant. They start from the left edge and curve towards the right, with some lines crossing or branching. The overall effect is minimalist and modern.

Education in the Era of Globalization Klas Roth,Ilan Gur-Ze'ev,2007-10-11 Education seems to have lost its orientation in Western culture and is in disarray all over the globe in time of global transitions Globalizing capitalism is the general headline for some of the most profound deep and dramatic developments in our era that education must address The response of educationalists is only in its beginning and there is an urgent need to address the dramatic changes inflicted on promised to our era philosophically sociologically culturally ecologically physically aesthetically and politically In the proposed book we try to address the challenge of globalization to education in the broadest sense of the concept of education by treating this challenge in various perspectives through different disciplines and topics within which the challenge of globalization is conceived as the most profound dynamic of this historical moment a development that is realized in many diverse and different levels fields and spaces of human and natural existence The various texts in this collection written by some of the famous and interesting scholars in the field of philosophy of education and the sociology of education try to address the richness and diversity of the challenge of globalization It tries to reconstruct historically sociologically and

philosophically the roots the practices and the fruits of globalization as a threat and as a gateway for new possibilities for today's education The collection is a meeting point for research that is not only analytical and critical but also offers new roads and possibilities for education in the 21st century in face of globalization As such this collection is unique in this field and opens the door for further research and public discussion on the future role of education **The Jack-pine Warbler**
