Berend, 1990-05-25 Professor Berend presents a comprehensive inside account of Hungary's economic reforms since the 1950s Working from Communist Party archives which have hitherto partially remained closed to scholars Berend situates the history of these economic reforms within their political context looking in particular at the role of the Soviet Union He examines the theoretical background to reform the obstacles that arose during implementation and the gradual realisation that minor reforms of the old system could no longer work The Hungarian Economic Reforms 1953 1988 comes at a time when many centrally planned economies are examining their performance and structure and seeking suitable forms of change The Hungarian reforms have attracted those countries wishing to rid themselves of their Stalinist command economies Thus the book indirectly sheds light upon Chinese economic reforms and on Gorbachev's Soviet perestroika It will be of interest to specialists and students of East European studies with special reference to the EMEA planned economies and economic reform **Manager and Economic Reform in Hungary**, 1972 Critical examination of the major features of the economic system of Hungary since the economic reform of 1968 with particular reference to the impact thereof on industrial management and socialist strategy of industrialization reviews national planning strategies and economic development trends since 1948 and analyses the effect on managerial practices and behaviour of the institutional framework incl Business organization and government policy Bibliography and statistical tables **Hungarian Economic Reforms** Gabriel Francis Horschler, 1977 Annotated bibliography of materials relating to economic policy reforms affecting economic conditions and the economic system in Hungary covers agriculture work industry economic relations trade and administrative reforms etc **Perspectives For Change In Communist Societies** Theresa Rakowska-harmstone, Teresa Rakowska-Harmstone, 2019-07-11 To what degree has political social and economic change been stimulated by the impact of the past and present policies of Communist political systems Perhaps more important to what extent has the momentum for change stimulated by past policies been frustrated by the nature of these systems This volume an interdisciplinary and international work based on a symposium presented at the October 1976 Annual Conference of the American Association for the Advancement of Slavic Studies addresses these questions The contributors collectively assess the extent of change generated by the policies of social mobilization as they are channeled and contained within the Communist political systems Clearly and perceptively they analyze selected aspects of change or its absence in the political social and economic life of the Soviet Union and Eastern Europe Money, Incentives and Efficiency in the Hungarian Economic Reform Joseph C. Brada, Istvan Dobozi, 2019-07-04 The essays in this volume document the serious shortcomings of the Hungarian economic reform which in two decades has brought deteriorating economic performance declining real wages a fiscal deficit and severe inflationary pressures It has proved unexpectedly difficult to substitute a regulated market economy for a centrally

planned one The authors of these essays argue that the problems stem from the incompleteness of the reforms and their compromise character Today as the Hungarians prepare to implement more radical measures constraining the Communist party and rolling back state ownership they do so under economically difficult conditions The Statesman's Year-Book 1980-81 J. web 3 2 2 references what is reflection when a ray of light comes back into the same medium after striking the surface of another medium then the phenomenon is called reflection of light in other words reflection is the bouncing back of the light rays from a surface in the same medium what is refraction

web 692 reflection and refraction of light p25 9 a as measured from the diagram the incidence angle is 60 and the refraction angle is 35 from snell's law $\sin \theta_1 = n_2 \sin \theta_2$ then $\sin 60 = 1.5 \sin \theta_2$ and the speed of light in the block is 2.0×10^8 m/s b the frequency of the light does not change upon refraction

16 1 reflection physics openstax - Feb 11 2022

web there are two laws that govern how light changes direction when it interacts with matter the law of reflection for situations in which light bounces off matter and the law of refraction for situations in which light passes through matter in this section we consider the geometric optics of reflection

web refraction is the bending of light it also happens with sound water and other waves as it passes from one transparent substance into another this bending by refraction makes it possible for us to have lenses magnifying glasses prisms and rainbows even our eyes depend upon this bending of light
