*The Mariner's Astrolabe. A Survey of 48 Surviving Examples* Alan Stimson, 1985      *The Mariner's Astrolabe A.* Stimson, 2024-07-29 With a historical introduction and detailed descriptions of 65 mariner s astrolabes All astrolabes described are illustrated on full pages      *The Christopher Columbus Encyclopedia* Silvio A. Beding, 2016-02-08 The European discovery of the Americas in 1492 was one of the most important events of the Renaissance and with it Christopher Columbus changed the course of world history Now five hundred years later this 2 volume reference work will chart new courses in the study and understanding of Columbus and the Age of Discovery Much more than an account of the man and his voyages The Christopher Columbus Encyclopedia is a complete A Z look at the world during this momentous era In two volumes The Christopher Columbus Encyclopedia contains more than 350 signed original articles ranging from 250 to more than 10 000 words written by nearly 150 contributors from around the world The work includes cross references bibliographies for each article and a comprehensive index The work is fully illustrated with hundreds of maps drawings and photographs      *Instruments of Science* Robert Bud, Deborah Jean Warner, 1998 With over 300 entries from the ancient abacus to X ray diffraction as represented by a ca 1900 photo of an X ray machine as well as the latest research into filmless x ray systems this tour of the history of scientific instruments in multiple disciplines provides context and a bibliography for each entry Newer conceptions of instrument include organisms widely used in research e g the mouse drosophila and E coli Bandw photographs and diagrams showcase more traditional instruments from The Science Museum London and the Smithsonian s National Museum of American History Annotation copyrighted by Book News Inc Portland OR      *Renaissance Astrolabes and their Makers* Gerard L'E. Turner, 2024-10-28 This book is about the archaeology of science or what can be learnt from the systematic examination of the artefacts made by precision craftsmen for the study of the natural world An international authority on historical scientific instruments Gerard Turner has collected here his essays on European astrolabes and related topics By 1600 the astrolabe had nearly ceased to be made and used in the West and before that date there was little of the source material for the study of instruments that exists for more modern times It is necessary to read the instruments themselves and astrolabes in particular are rich in all sorts of information mathematical astronomical metallurgical in addition to what they can reveal about craftsmanship the existence of workshops and economic and social conditions There is a strong forensic element in instrument research and Gerard Turner s achievements include the identification of three astrolabes made by Gerard Mercator all of whose instruments were thought to have been destroyed Other essays deal with the discovery of an important late 16th century Florentine workshop and of a group of mid 15th century German astrolabes linked to Regiomontanus      **In Synchrony with the Heavens, Volume 2 Instruments of Mass Calculation** David King, 2005-06-01 This is the first investigation of one of the main interests of astronomy in Islamic civilization namely timekeeping by the sun and stars and the regulation of the astronomically defined times of Muslim prayer

The study is based on over 500 medieval astronomical manuscripts first identified by the author now preserved in libraries all over the world and originally from the entire Islamic world from the Maghrib to Central Asia and the Yemen The materials presented provide new insights into the early development of the prayer ritual in Islam They also call into question the popular notion that religion could not inspire serious scientific activity Only one of the hundreds of astronomical tables discussed here was known in medieval Europe which is one reason why the entire corpus has remained unknown until the present A second volume also to be published by Brill deals with astronomical instruments for timekeeping and other computing devices

**Sextants at Greenwich** W.F.J. Mörzner Bruyns, Richard Dunn, 2009-06-25 This book describes the history and development of navigating instruments Before satellites these were used to measure the altitude of the sun and stars above the horizon to determine the ship's position at sea The book also contains a catalogue of 347 mariner's astrolabes cross staffs backstaffs and octants sextants and artificial horizons

**Encyclopedia of Renaissance Philosophy** Marco Sgarbi, 2022-10-27 Gives accurate and reliable summaries of the current state of research It includes entries on philosophers problems terms historical periods subjects and the cultural context of Renaissance Philosophy Furthermore it covers Latin Arabic Jewish Byzantine and vernacular philosophy and includes entries on the cross fertilization of these philosophical traditions A unique feature of this encyclopedia is that it does not aim to define what Renaissance philosophy is rather simply to cover the philosophy of the period between 1300 and 1650

Before the Military Revolution Alexander Querengässer, 2021-08-26 Before the Military Revolution examines European Warfare in the Late Middle Ages from 1300 to 1490 It is not restricted only to well covered conflicts like the Anglo Scottish Wars or the Hundred Years War but gives due weight to all regions of Europe including the Empire the Baltic the Balkans and the Mediterranean and considers developments in naval warfare The Hussite Wars and the wars of the Teutonic Order and the Hanseatic League are covered as is the expansion of Moscow the Ottomans and Venice and battles like Aussenburg 1426 Copenhagen 1428 Chojnice 1454 are discussed alongside Bannockburn and Agincourt This age witnesses fundamental change The feudal system of the High Middle Ages crumbled everywhere in Europe due to climatic change economic crisis and population decline This triggered a fiscalization of the military organization the establishment of taxes and representation of the estates This book argues that these changes are the most fundamental ones in the military and political organization in Europe until the rise of the constitutional state around 1800 and so comes closer to the original concept of a Military Revolution It also takes a critical look at other often discussed developments of this age like the Infantry and Artillery Revolution or the decline of cavalry Combining a chronological and regional narrative with deeper analysis of themes like chivalry strategy economic warfare or military publications makes this book an indispensable read for everyone interested in late medieval history

**The Art, Science, and Technology of Medieval Travel** Robert Odell Bork, Andrea Kann, 2008 This sixth volume in the AVISTA series considers medieval travel from a variety of interdisciplinary perspectives placing the physical practice of transportation in

the larger context of medieval thought about the world and its meaning The papers included cover vehicle design and logistical management the practicalities of how travellers oriented themselves and the symbolism of the landscapes and maps created in the Middle Ages      Knowledge in Translation Patrick Manning, Abigail Owen, 2018-09-19 In the second millennium CE long before English became the language of science in the twentieth century the act of translation was crucial for understanding and disseminating knowledge and information across linguistic and geographic boundaries This volume considers the complexities of knowledge exchange through the practice of translation over the course of a millennium across fields of knowledge cartography health and medicine material construction astronomy and a wide geographical range from Eurasia to Africa and the Americas Contributors literate in Arabic Catalan Chinese Greek Hebrew Italian Japanese Latin Minnan Ottoman and Persian explore the history of science in the context of world and global history investigating global patterns and implications in a multilingual and increasingly interconnected world Chapters reveal cosmopolitan networks of shared practice and knowledge about the natural world from 1000 to 1800 CE emphasizing both evolving scientific exchange and the emergence of innovative science By unraveling the role of translation in cross cultural communication Knowledge in Translation highlights key moments of transmission insight and critical interpretation across linguistic and faith communities

**The Commentaries of D. García de Silva y Figueroa on his Embassy to Shāh 'Abbās I of Persia on Behalf of Philip III, King of Spain** Jeffrey Scott Turley, George Bryan Souza, 2017-06-06 The Commentaries is the first complete English language translation with complete annotations of a unique and extraordinary memoir from the pen of the erudite Spanish soldier diplomat D Garc a de Silva y Figueroa over the course of his embassy to Persia 1614 1624 The Commentaries transcend the travel literature genre emerging as a precocious European intellectual global history that is remarkable for its encyclopedic breadth its historical depth and its ethnographic and even artistic sensitivity The Commentaries will be of interest to historians ethnographers and literary critics or anyone with an interest in early modern European accounts of the encounter between the Portuguese and Spanish Empires and Safavid Persia during the early modern period      Reader's Guide to the History of Science Arne Hessenbruch, 2013-12-16 The Reader s Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn      Scientific Instruments, 1500-1900 Gerard L'Estrange Turner, 1998 The impulse to collect is universal Collections containing natural curiosities date from the 16th century and it was this type of collection in which scientific instruments found a home This book traces the historical origins and development of instruments as they spread across the globe explaining their manufacture use and adaptations 91 color and 20 b w plates      *Explorers, Fortunes and Love Letters* New Netherland Institute, 2010-04-01 When Henry Hudson sailing on the Half Moon for the Dutch East India Company first laid

eyes on the entrance to the Hudson River in 1609 a world of seemingly infinite possibilities lay before him and his crew In 1624 the Dutch would take advantage of these opportunities and create the colony of New Netherland building homes and communities that stretched from the Delaware Bay up along the Hudson River Valley to present day Albany New York The story of New Netherland is often overlooked in tales of the founding of America The essays in Explorers Fortunes and Love Letters A Window on New Netherland offer a new perspective that takes the spotlight off the Puritans of New England and the settlers of Jamestown Virginia and instead offers striking arguments for casting the Dutch as central players in the American narrative These twelve essays written by preeminent historians of New Netherland pull from diverse perspectives social cultural intellectual economic and political to weave together the dynamic and diverse history of the Dutch in America These scholars explore all aspects of Dutch life ranging from sailing methods to factional politics to written expressions of love The authors discuss how settlers retained traditions from the Netherlands such as the baking of bread and how these traditions changed over time and became engrained in American culture including the transformation of the Dutch St Nicholas into today's Santa Claus The colony of New Netherland was marked by its diversity and this topic is explored in discussions of the relationship between Native Americans and Dutch settlers in the Mohawk Valley the role of Jews in New Netherland and the practice of slavery throughout the colony The Dutch perspective on child rearing practices is also examined as well as the dream of attaining fortune in the New World The Dutch colony of New Netherland and the development of America are not separate stories but are inextricably linked together through historical moments and present realities Dutch settlers played critical roles in building the nation their influences are not lost and forgotten but are clearly evident even today Explorers Fortunes and Love Letters brings the reader into the everyday life of New Netherland and displays just how prominently the Dutch shaped America

Navigation Jim Bennett, 2017-02-10 From the Bronze Age mariners of the Mediterranean to contemporary sailors using satellite based technologies the history of navigation at sea the art of finding a position and setting a course is fascinating The scientific and technological developments that have enabled accurate measurements of position were central to exploration trade and the opening up of new continents and the resulting journeys taken under their influence have had a profound influence on world history In this Very Short Introduction Jim Bennett looks at the history of navigation starting with the distinctive cultures of navigation that are defined geographically the Mediterranean Sea and the Pacific Indian and Atlantic Oceans He shows how the adoption of mathematical methods the use of instruments the writing of textbooks and the publication of charts all combined to create a more standardised practice Methods such as longitude finding by chronometer and lunar distance were complemented by the routine business of recording courses and reckoning position by account Bennett also introduces the incredible array of instruments relied on by sailors from astrolabes sextants and chronometers to our more modern radio receivers electronic equipment and charts and highlights the crucial role played by the individual qualities of endeavour and resourcefulness from mathematicians scientists

and seamen in finding their way at sea The story of navigation combines the societal the technical and the human and it was vital for shaping the modern world
