Oversight and Investigations,1980 Labor and Democracy in the Transition to a Market System Bertram Silverman,Robert Vogt,Murray Yanovich,2016-06-16 Nowhere is the tension attending simultaneous political democratization and economic liberalization more sharply felt than in the realm of labour relations What is happening in Soviet trade unions today How will the emerging independent unions respond to anticipated rises in unemployment What kind of social regulation of the labour market will be appropriate in the future These papers from a pathbreaking US Soviet conference on labour issues reveal a considerable diversity of views on questions whose resolution will be essential to social peace in this period of transition Among the noted contributors are Joseph Berliner Sam Bowles Richard Freeman Leonid Gordon V L Kosmarskii Alla Nazimova Michael Piore Boris Rakitskii Iurii Volkov Ben Ward and Tatiana Zaslavskaja **Securities Trading--SEC Action Needed to Address National Market System Issues** United States. General Accounting Office,1990 The October 1987 stock market crash raised critical questions concerning the efficiency competitiveness and fairness of U S securities markets Many experts questioned the structure of the marketplace and its ability to both withstand periods of high stress and operate efficiently in ordinary times Market experts and analysts have debated these questions since the crash Renewed volatility in the markets as indicated by the 190 point drop on October 13 1989 and the subsequent record gained the following week has again created doubt about whether the financial markets are properly designed to meet the demands placed upon them To identify market structure issues GAO met with federal regulators exchange and over the counter market officials market professionals institutional investors and academics GAO evaluated what should be done to address the most important issues identified through these discussions trading restrictions market links and options trading An Enquiry into the Ideology and Reality of Market and Market System J. Gemper, This volume s aim is to promote thought in readers interested in what kind of economic policies market systems welfare systems and socialist systems should each pursue under the pressures of accelerating change Should there be more government or less government This is the central question addressed by this internationally drawn group of experts The book features major case studies on the People s Republic of China Canada Ghana Great Britain South Africa Taiwan and West Germany Contributors include Richard L Brinkman from the United States James C W Ahiakpor and Tillo E Kuhn from Canada Dieter Loesch and Herbert Schmidt from Germany and Geert L deWet from South Africa For technical economists interested in world trade business people concerned with expanding markets and policy analysts concerned about how technology culture and politics drive economic systems this book is essential reading As the editor points out indicative targeting as the latest weapon in the arsenal of economic science makes it possible to systematically discover signals that could become points of

reference landmarks for the way into the future The approach taken by the authors enables us to trace future trends by extrapolating current data onto new territory It will help the policy maker identify desirable trends and ideas and at the same time provides some early warning signals about high risk trends and patterns Bodo B Gemper is professor of economics at the University of Siegen in Germany He previously edited a Transaction volume *Structural Dynamics of Industrial Policy and in German Protectionism in the World Economy* **The Peasant Marketing System of Oaxaca, Mexico** Ralph L.
