Morowitz,1993-06-10 Harold Morowitz has long been regarded highly both as an eminent scientist and as an accomplished science writer The essays in *The Wine of Life* his first collection were hailed by C P Snow as some of the wisest wittiest and best informed that I have read and Carl Sagan called them a delight to read In later volumes such as *Mayonnaise* and the

Origin of Life and The Thermodynamics of Pizza he has established a reputation for a wide ranging intellect an ability to see unexpected connections and draw striking parallels and a talent for communicating scientific ideas with optimism and wit Kirkus Reviews praised Mayonnaise as wonderfully diverting and very wise Nature wrote of Thermodynamics his chocolate coated nuggets of science will continue to entertain and do surreptitious good With Entropy and the Magic Flute Morowitz once again offers an appealing mix of brief reflections on everything from litmus paper to the hippopotamus to the sociology of Palo Alto coffee shops Many of these pieces are appreciations of scientists that Morowitz holds in high regard In the title piece for instance Morowitz tells of his pilgrimage to the grave of Ludwig Boltzmann buried in the same cemetery Vienna s Central Cemetery as Beethoven Schubert and Brahms He also writes of J Willard Gibbs thought by many to be the greatest scientist yet produced by the United States Jean Perrin author of Les Atomes a now forgotten classic that convinced virtually everyone in science of the validity of the atomic hypothesis Einstein Newton on the occasion of the 300th anniversary of his Principia a date that passed virtually unnoticed except by Morowitz Murray Gell Mann and Aristotle Of Aristotle Morowitz observes that most people whose information comes from academic philosophy fail to appreciate that among his many fields of expertise first and foremost Aristotle was a biologist Indeed fully a third of Aristotle s writings are on the life sciences almost all of which has been left out of standard editions of his work Many other pieces focus on health issues such as America s obsession with cheese toppings the addiction to smoking of otherwise intelligent people questionable obstetric practices and several touch upon ethics whistle blowing and scientific research There is also a fascinating piece on the American Type Culture Collection a zoo or warehouse for microbes that houses some 11 800 strains of bacteria and over 3 000 specimens of protozoa algae plasmids and oncogenes Here then are over forty light graceful essays in which one of our wisest experimental biologists comments on issues of science technology society philosophy and the arts
