The National Union Catalog, Pre-1956 Imprints, 1975 *From Strange Simplicity to Complex Familiarity* Manfred Eigen, 2013 This book presents a vivid argument for the almost lost idea of a unity of all natural sciences It starts with the strange physics of matter including particle physics atomic physics and quantum mechanics cosmology relativity and their consequences Chapter I and it continues by describing the properties of material systems that are best understood by statistical and phase space concepts Chapter II These lead to entropy and to the classical picture of quantitative information initially devoid of value and meaning Chapter III Finally information space and dynamics within it are introduced as a basis for semantics Chapter IV leading to an exploration of life and thought as new problems in physics Chapter V Dynamic equations again of a strange but very general nature bring about the complex familiarity of the world we live in Surprising new results in the life sciences open our eyes to the richness of physical thought and they show us what can and what cannot be explained by a Darwinian approach The abstract physical approach is applicable to the origins of life of meaningful information and even of our universe

constant study and research to the history the objects and the condition of Masonry In the present work the crowning and successful result of a life s labors he has received no assistance from any one He says Every article was written by myself and he adds which would extenuate errors had he fallen into any For twelve months too of the time occupied upon this work I suffered from an affection of the sight which forbade all use of the eyes for purposes of study During that time now happily passed all authorities were consulted by the willing eyes of my daughters all writing was done by their hands I realized for a time the picture so often painted of the blind bard dictating his sublime verses to his daughters and his preface closes with the words Were I to dedicate this work at all my dedication should be To Filial Affection Up to the present time the modern literature of Freemasonry has been diffuse lumbering unreliable and out of all reasonable proportions
