Maxwell's Handbook for AACR2 Robert L. Maxwell, 2004-05-24 For application of the most current Anglo-American Cataloguing Rules, there is but one standard: Maxwell's Handbook for AACR2. This practical and authoritative cataloging how-to, now in its Fourth Edition, has been completely revised, inclusive of the 2003 update to AACR2. Designed to interpret and explain AACR2, Maxwell illustrates and applies the latest cataloging rules to the MARC record for every type of information format. Focusing on the concept of integrating resources where relevant information may be available in different formats, the revised edition also addresses the Program for Cooperative Cataloging (PCC) and the cataloging needs of electronic books and digital reproductions of physical items such as books and maps. From books and pamphlets to sound recordings, music manuscripts, maps, and more, this is the most comprehensive and straightforward guide to interpreting and applying standard cataloging rules. Learn how and when to apply the rules. What has changed in MARC21 coding? How the rules help organize descriptive and bibliographic information. What are uniform titles for unusual formats or materials? How to select access points. Extensive updates have resulted in all new chapters covering cartographic materials, electronic resources, and continuing resources formerly called serials. Illustrated with over 490 figures showing actual MARC catalog records, this is the must-have AACR2 guide for catalogers, LIS students, and cataloging instructors.
