Tending to the Past Karen Michele Chandler, 2024-01-18 In many popular depictions of Black resistance to slavery stereotypes around victimization and the heroic efforts of a small number of individuals abound These ideas ignore the powers of ordinary families and obscure the systematic working of racism Tending to the Past Selfhood and Culture in Children s Narratives about Slavery and Freedom examines Black authored historical novels and films for children that counter this distortion and depict creative means by which ordinary African Americans survived slavery and racism in early America Tending to the Past argues that this important understudied historical writing

freedom narratives calls on young readers to be active critical thinkers about the past and its legacies within the present The book examines how narratives by children s book authors such as Joyce Hansen Julius Lester Marilyn Nelson and Patricia McKissack and the filmmakers Charles Burnett and Zeinabu irene Davis were influenced by Black cultural imperatives such as the Black Arts Movement to foster an engaged culturally aware public Through careful analysis of this rich body of work Tending to the Past thus contributes to ongoing efforts to construct a history of Black children s literature and film attuned to its range specificity and depths Tending to the Past provides illuminating interpretations that will help scholars and educators see the significance of the freedom narratives reconstructions in a neoliberal era a time of shrinking opportunities for many African Americans It offers models for understanding the powers and continuing relevance of the Black child s creative agency and the Black cultural practices that have fostered it

The Lever of Riches Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous

developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential

Cultural Journeys Pamela S. Gates,Dianne L. Hall Mark,2010-08-16 As multicultural education is becoming integral to the core curriculum teachers often implement this aspect into their courses through literature However standards and criteria to teach and promote active discussion about this literature are sparse Cultural Journeys introduces pre service and experienced teachers to the use of literature to promote active discussions that lead students to think about racial diversity More than just an annotated list of books for children Pamela S Gates and Dianne L Hall Mark provide systematic guidelines that teachers can use throughout their careers to evaluate multicultural literature for students in grades K 8 At the same time the text leads the reader to a deeper understanding of how to use multicultural literature throughout the entire curriculum and not just during specially designated months or time periods With the example unit plans and extensive annotated bibliography this book is a valuable resource that pre service teachers will utilize when they begin teaching and in service teachers will reference repeatedly during their planning periods
