Prue Kerr, Geoffrey Colin Harcourt, 2002 **The Industrial Revolution and Economic Growth** R. M. Hartwell, 2017-06-26 This volume first published in 1971 brings together eleven essays and articles on the history of the industrial revolution Method is the central consideration and the author discusses ways in which historians have analysed the industrial revolution demonstrates inconsistency and bias in their interpretations and suggests an appropriate framework of economic theory for future studies This title will be of interest to students of history and economics **Bulletin of the Bureau of Labor Statistics**, 1984 [Productivity: a Selected Annotated Bibliography](#), 1984 **Sources of Chinese Economic Growth, 1978-1996** Chris Bramall, 2000-09-14 This analysis of the political economy of growth in the era of Deng Xiaoping takes issue with the growth accounting methodologies and market centred explanations which characterize so much of the literature on transition era China By adopting an approach which echoes the pioneering work of Chalmers Johnson Alice Amsden and Robert Wade on other East Asian Economies and which makes full use of the rich statistical materials that have become available since 1978 this book shows that Chinese growth was driven by a combination of state led industrial policy and the favourable infrastructural legacies of the Maoist era And in giving due weight to the sheer complexity of the growth process by looking in detail at the experience of four very different Chinese regions it avoids over simplistic macroeconomic generalization Nevertheless even this type of approach is inadequate because it fails to explain why industrial policy has been so much more successful in China than in other countries This book therefore goes beyond the development state approach to argue that state autonomy in China reflected the remarkably equal distribution of income and wealth at the end of the 1970s and paradoxically the destruction of party structures and institutions during the Cultural Revolution The policy implications are stark The Chinese experience demonstrates that industrial policy and state spending on physical and social infrastructure can produce rich rewards conversely slavish reliance on foreign direct investment and trade are likely to limit

the pace of growth But attempts to replicate China's success in Latin America sub-Saharan Africa and South Asia will fail because their governments will not resist rent seeking by classes and interest groups Moreover as the state becomes weaker in the wake of the re-emergence of a powerful capitalist class even Chinese growth may prove unsustainable Taiwan's Development Experience: Lessons on Roles of Government and Market Erik Thorbecke, Henry Wan, 2012-12-06 Taiwan's Development Experience Lessons on Roles of Government and Market scrutinizes the main features of the Taiwanese development experience under five interrelated themes and domains Outward orientation vs inward orientation Sources of growth Dynamic balanced growth process the interaction between agricultural and non agricultural sectors The role of government in the transition to a more market oriented economy and The potential transferability of the Taiwanese development experience to developing countries In addition to highlighting the essential contributions of papers the Editors also bring out the views and contributions under each of the above headings of two distinguished former Cornell University colleagues who are honored at the sponsoring conference T C Liu and S C Tsiang *Russian and Western Economic Thought* Vladimir Avtonomov, Harald Hagemann, 2022-10-03 This book examines the interrelations between Russian and European economics from the early 19th century to the present It analyzes how Western economic thinking such as classical economics and the marginal revolution influenced Russian economic thinking and how Western economic ideas were modified and adapted to better reflect the specific Russian circumstances of the time Moreover the contributions in this book show how these modified ideas also influenced Western economists at the end of the 19th century when Russian economics had reached the stage of professionalism and joined the international discourse on the discipline Written by an international selection of respected experts this book provides an overview of the most influential Russian economists and covers a wide range of topics such as the marginal revolution the specific influence of Marxism the evolution of mathematics and statistics in Russia in the 1890s 1920s and the unique experience of building a planned economy in the Soviet Union It is intended for all scholars and students who are interested in the history of economic thought *Industrialisation in North-Eastern Region* Jaynal Uddin Ahmed, 2007 **China's Long March of Modernisation** Khor Eng Lee, Aaron Khor, 2019-12-11 With the support of its strong leadership and industrious population of close to one billion working Chinese fully committed and dedicated to its peaceful development and comprehensive modernization China is forging ahead on the driver's seat in various fields of human endeavour A leading global role is resourceful and resurgent New China's manifest destiny with the confidence of attaining and regaining the world's largest economy within the coming decade Holding high the new banner of the Fourth Industrial Revolution IR 4.0 China will continue steadfastly and strongly on its Long March of Modernization In the military field the People's Liberation Army has developed from a ragtag fighting force of some 20 000 troops into a two million strong military that's presently rated as the world's third strongest after its counterparts in the US and Russia Speaking at a grand rally to mark the 90th anniversary of the People's Liberation Army PLA at the Great Hall of the People in
