Serr, R.B. Greenblatt, 2012-12-06 The decision taken during the First International Congress on the Menopause in June 1976 to repeat the exercise 2 years later turned out to be a good one In the last few years much work has been done on the subject of the menopause It is of course a subject of many facets but of particular importance recently has been the work done as a result of the reports appearing in 1975 and 1976 alleging an increase in the incidence of endometrial carcinoma in women who had used oestrogens and of other effects some beneficial others deleterious reportedly seen when oestrogens were administered 1978 seemed the right time to re assess the situation and the Second International Congress on the Menopause provided a good platform The congress was held in Jerusalem in June 1978 It took the form of a series of 12 workshops each of which within a prescribed framework was planned and presided over by a moderator experienced in that particular field The 12 moderators were free to organize their sessions in whichever way they wished and to invite whoever they wished to present papers and to join in the discussions In addition the workshops were open to anyone who wished to attend      *The Male Climacteric* Helmut J. Development and the Life Course returns for a seventh edition to provide students with an expansive overview of the major theories and issues related to human behavior and the social environment that are important to understand for professional practice across a variety of cases and contexts. Maintaining its clarity and cohesion, this edition has been updated to offer students current and relevant information on important topics in social work practice and expanded to help students understand the complexity of the issues they will face in the field, including how poverty, diversity, and strengths affect human development and behavior. Several new theoretical perspectives appear in this update, including indigenous theory, new feminism, and restorative justice, and these additions complement the major psychological, sociological, life course, and anti-oppressive theories that have come to define this book's grounded and balanced coverage. Illustrated and fully supported by a set of Quick Guides for students engaged in field work, vignettes woven throughout the book, and a full package of interactive cases and instructor-led resources that are available on [www.routledgesw.com](http://www.routledgesw.com), the new edition of *Human Behavior in the Social Environment* is a perfect complement to this foundation course on the undergraduate and graduate level. Its signature theoretical framework equips students to have a well-rounded understanding to call upon and apply to the myriad client problems and situations they will need to practice social work.

The central mission of the new edition is to Medicalized Masculinities Christopher A. Faircloth, 2009-09-04. Erectile Dysfunction Alvaro Morales, 1998-01-01. International contributors write on the controversial topics of concern to urologists working on erectile dysfunction.

Age Matters Toni M. Calasanti, Kathleen F. Slevin, 2013-10-11. This volume of original chapters is designed to bring attention to a neglected area of feminist scholarship: aging. After several decades of feminist studies, we are now well informed of the complex ways that gender shapes the lives of women and men. Similarly, we know more about how gendered power relations interface with race and ethnicity, class, and sexual orientation. Serious theorizing of old age and age relations to gender represents the next frontier of feminist scholarship. In this volume, leading national and international feminist scholars of aging take first steps in this direction, illuminating how age relations interact with other social inequalities, particularly gender. In doing so, the authors challenge and transform feminist scholarship and many taken-for-granted concepts in gender studies.
