Steffen, 2011-11-30 RELIGION CIVILITY The Primacy of Conscience the third book of the breakthrough Second Enlightenment Trilogy reveals trial and error failures and successes of past and present civilizations Man inherits from nature hard won intelligence cortical consciousness to learn from errors of irreligion and incivility Though more painful error is sometimes the most convincing teacher Reason, Religion, and Natural Law Jonathan A. Jacobs, 2012-10-19 This edited volume examines the realizations between theological considerations and natural law theorizing from Plato to Spinoza Theological considerations have long had a pronounced role in Catholic natural law theories but have not been as thoroughly examined from a wider perspective The contributors to this volume take a more inclusive view of the relation between conceptions of natural law and theistic claims and principles They do not jointly defend one particular thematic claim but articulate diverse ways in which natural law has both been understood and related to theistic claims In addition to exploring Plato and the Stoics the volume also looks at medieval Jewish thought the thought of Aquinas Scotus and Ockham and the ways in which Spinoza s thought includes resonances of earlier views and intimations of later developments Taken as a whole these essays enlarge the scope of the discussion of natural law through study of how the naturalness of natural law has often been related to theses about the divine The latter are often crucial elements of natural law theorizing having an integral role in accounting for the metaethical status and ethical bindingness of natural law At the same time the question of the relation between natural law and God and the relation between natural law and divine command has been addressed in a multiplicity of ways by key figures throughout the history of natural law theorizing and these essays accord them the explanatory significance they deserve **Constitutional Secularism in an Age of Religious Revival** Susanna Mancini, Michel Rosenfeld, 2014-01-30 The global movement of culture and religion has brought about a

serious challenge to traditional constitutional secularism This challenge comes in the form of a political and institutional struggle against secular constitutionalism and a two pronged assault on the very legitimacy and viability of the concept On the one hand constitutional secularism has been attacked as inherently hostile rather than neutral toward religion and on the other hand constitutional secularism has been criticized as inevitably favouring one religion or set of religions over others The contributors to this book come from a variety of different disciplines including law anthropology history philosophy and political theory They provide accounts of and explanations for present predicaments critiques of contemporary institutional political and cultural arrangements justifications and practices and suggestions with a view to overcoming or circumventing several of the seemingly intractable or insurmountable current controversies and deadlocks The book is separated in to five parts Part I provides theoretical perspectives on the present day conflicts between secularism and religion Part II focuses on the relationship between religion secularism and the public sphere Part III examines the nexus between religion secularism and women s equality Part IV concentrates on religious perspectives on constraints on and accommodations of religion within the precincts of the liberal state Finally Part V zeroes in on conflicts between religion and secularism in specific contexts namely education and freedom of speech

Religious Liberty Daniel N. Robinson,Richard N. Williams,2016-09-08 The principal aim of the establishment and free exercise clauses of the First Amendment was to preclude congressional imposition of a national church A balance was sought between states rights and the rights of individuals to exercise their religious conscience While the founding fathers were debating such issues the potential for serious conflict was confined chiefly to variations among the dominant Christian sects Today issues of marriage child bearing cultural diversity and corporate personhood among others suffuse constitutional jurisprudence raising difficult questions regarding the nature of beliefs that qualify as religious and the reach of law into the realm in which those beliefs are held The essays collected in this volume explore in a selective and instructive way the intellectual and philosophical roots of religious liberty and contemporary confrontations between this liberty and the authority of secular law
