John Timberman Newcomb,2012-03-20 How Did Poetry Survive traces the emergence of modern American poetry at the turn

of the nineteenth century American poetry had stalled a small group of recently deceased New England poets still held sway and few outlets existed for living poets However the United States quickly accelerating urbanization in the early twentieth century opened new opportunities as it allowed the rise of publications focused on promoting the work of living writers of all kinds The urban scene also influenced the work of poets shifting away from traditional subjects and forms to reflect the rise of buildings and the increasingly busy bustle of the city Change was everywhere new forms of architecture and transportation new immigrants new professions new tastes new worries This urbanized world called for a new poetry and a group of new magazines entirely or chiefly devoted to exploring modern themes and forms led the way Avant garde little magazines succeeded not by ignoring or rejecting the busy commercial world that surrounded them but by adapting its technologies of production and strategies of marketing for their own purposes *Catalog of Copyright Entries. **American Technological Sublime** David E. Nye, 1996-02-28 American Technological Sublime continues the exploration of the social construction of technology that David Nye began in his award winning book *Electrifying America* Here Nye examines the continuing appeal of the technological sublime a term coined by Perry Miller as a key to the nation's history using as examples the natural sites architectural forms and technological achievements that ordinary people have valued intensely Technology has long played a central role in the formation of Americans sense of selfhood From the first canal systems through the moon landing Americans have for better or worse derived unity from the common feeling of awe inspired by large scale applications of technological prowess American Technological Sublime continues the exploration of the social construction of technology that David Nye began in his award winning book *Electrifying America* Here Nye examines the continuing appeal of the technological sublime a term coined by Perry Miller as a key to the nation's history using as examples the natural sites architectural forms and technological achievements that ordinary people have valued intensely American Technological Sublime is a study of the politics of perception in industrial society Arranged chronologically it suggests that the sublime itself has a history that sublime experiences are emotional configurations that emerge from new social and technological conditions and that each new configuration to some extent undermines and displaces the older versions After giving a short history of the sublime as an aesthetic category Nye describes the reemergence and democratization of the concept in the early nineteenth century as an expression of the American sense of specialness What has filled the American public with wonder awe even terror David Nye selects the Grand Canyon Niagara Falls the eruption of Mt St Helens the Erie Canal the first transcontinental railroad Eads Bridge Brooklyn Bridge the major international expositions the Hudson Fulton Celebration of 1909 the Empire State Building and Boulder Dam He then looks at the atom bomb tests and the Apollo mission as examples of the increasing ambivalence of the technological sublime in the postwar world The festivities surrounding the rededication of the Statue of Liberty in 1986 become a touchstone reflecting the

transformation of the American experience of the sublime over two centuries Nye concludes with a vision of the modern day consumer sublime as manifested in the fantasy world of Las Vegas

**Crap** Wendy A. Woloson, 2020-10-05

Crap We all have it Filling drawers Overflowing bins and baskets Proudly displayed or stuffed in boxes in basements and garages Big and small Metal fabric and a whole lot of plastic So much crap Abundant cheap stuff is about as American as it gets And it turns out these seemingly unimportant consumer goods offer unique insights into ourselves our values and our desires In *Crap A History of Cheap Stuff in America* Wendy A Woloson takes seriously the history of objects that are often cynically made and easy to dismiss things not made to last things we don't really need things we often don't even really want Woloson does not mock these ordinary everyday possessions but seeks to understand them as a way to understand aspects of ourselves socially culturally and economically Why do we as individuals and as a culture possess these things Where do they come from Why do we want them And what is the true cost of owning them Woloson tells the history of crap from the late eighteenth century up through today exploring its many categories gadgets knickknacks novelty goods mass produced collectibles giftware variety store merchandise As Woloson shows not all crap is crappy in the same way bric a brac is crappy in a different way from say advertising giveaways which are differently crappy from commemorative plates Taking on the full brilliant and depressing array of crappy material goods the book explores the overlooked corners of the American market and mindset revealing the complexity of our relationship with commodity culture over time By studying crap rather than finely made material objects Woloson shows us a new way to truly understand ourselves our national character and our collective psyche For all its problems and despite its disposability our crap is us
