Nye, 1996-02-28 *American Technological Sublime* continues the exploration of the social construction of technology that David Nye began in his award winning book *Electrifying America* Here Nye examines the continuing appeal of the technological sublime a term coined by Perry Miller as a key to the nation s history using as examples the natural sites architectural forms and technological achievements that ordinary people have valued intensely Technology has long played a central role in the formation of Americans sense of selfhood From the first canal systems through the moon landing Americans have for better or worse derived unity from the common feeling of awe inspired by large scale applications of technological prowess *American Technological Sublime*

continues the exploration of the social construction of technology that David Nye began in his award winning book *Electrifying America*. Here Nye examines the continuing appeal of the technological sublime a term coined by Perry Miller as a key to the nation's history using as examples the natural sites architectural forms and technological achievements that ordinary people have valued intensely. *American Technological Sublime* is a study of the politics of perception in industrial society. Arranged chronologically it suggests that the sublime itself has a history that sublime experiences are emotional configurations that emerge from new social and technological conditions and that each new configuration to some extent undermines and displaces the older versions. After giving a short history of the sublime as an aesthetic category Nye describes the reemergence and democratization of the concept in the early nineteenth century as an expression of the American sense of specialness. What has filled the American public with wonder awe even terror David Nye selects the Grand Canyon Niagara Falls the eruption of Mt St Helens the Erie Canal the first transcontinental railroad Eads Bridge Brooklyn Bridge the major international expositions the Hudson Fulton Celebration of 1909 the Empire State Building and Boulder Dam. He then looks at the atom bomb tests and the Apollo mission as examples of the increasing ambivalence of the technological sublime in the postwar world. The festivities surrounding the rededication of the Statue of Liberty in 1986 become a touchstone reflecting the transformation of the American experience of the sublime over two centuries. Nye concludes with a vision of the modern day consumer sublime as manifested in the fantasy world of Las Vegas.

Cartoon Vision Dan Bashara, 2019-04-02 In *Cartoon Vision* Dan Bashara examines American animation alongside the modern design boom of the postwar era. Focusing especially on United Productions of America (UPA) a studio whose graphic abstract style defined the postwar period Bashara considers animation akin to a laboratory exploring new models of vision and space alongside theorists and practitioners in other fields. The links theoretical historical and aesthetic between animators architects designers artists and filmmakers reveal a specific midcentury modernism that rigorously reimagined the senses. *Cartoon Vision* invokes the American Bauhaus legacy of László Moholy-Nagy and György Kepes and advocates for animation's pivotal role in a utopian design project of retraining the public's vision to better apprehend a rapidly changing modern world.

Donald Ragsdale, 2011-08-08 *Compelling Form* Architecture as Visual Persuasion is an assessment of the visual persuasiveness of buildings It demonstrates that architecture is as capable of social influence as speeches or advertisements are and that an awareness of this influence provides an insight into buildings cultural roles The book considers a diverse array of structures ranging from museums to performance halls to universities to cathedrals to governmental buildings to palaces and to skyscrapers *Compelling Form* is an important extension of theories of persuasion and visual communication to architecture and engineering The book bases its assessments on the elements of visual literacy and then on the elements of architectural design to demonstrate that buildings monuments and even such means of commerce as bridges affect the viewer in such a way as to have social impact

The Skyscraper and the City Gail Fenske, 2008-08 Once the world's tallest skyscraper the Woolworth Building is noted for its striking but incongruous synthesis of Beaux Arts architecture fanciful Gothic ornamentation and audacious steel framed engineering Here in the first history of this great urban landmark Gail Fenske argues that its design serves as a compelling lens through which to view the distinctive urban culture of Progressive era New York Fenske shows here that the building's multiplicity of meanings reflected the cultural contradictions that defined New York City's modernity For Frank Woolworth founder of the famous five and dime store chain the building served as a towering trademark for advocates of the City Beautiful movement it suggested a majestic hotel de ville for technological enthusiasts it represented the boldest of experiments in vertical construction and for tenants it provided an evocative setting for high style consumption Tourists meanwhile experienced a spectacular sightseeing destination and avant garde artists discovered a twentieth century future In emphasizing this faceted significance Fenske illuminates the process of conceiving financing and constructing skyscrapers as well as the mass phenomena of consumerism marketing news media and urban spectatorship that surround them As the representative example of the skyscraper as a cathedral of commerce the Woolworth Building remains a commanding presence in the skyline of lower Manhattan and the generously illustrated *Skyscraper and the City* is a worthy testament to its importance in American culture
