Depersonalization and Creative Writing Matthew Francis, 2022-07-18 Depersonalization and Creative Writing Unreal City explores the common psychological symptom of depersonalization its influence on literature and the insights it can provide into the writing process Depersonalization is a distressing symptom in which sufferers feel detached from their own selves and the world Often associated with psychological disorders it can also affect healthy people at times of stress Beginning with a first hand account of the experience the book goes on to argue that many well known literary texts including Camus's *The Outsider* and Sartre's *Nausea* evoke a similar psychological state It shows how a concept of depersonalized writing can be found in the work of literary theorists from widely different traditions including T S Eliot Roland Barthes and Viktor Shklovsky Finally it maintains that creative writers can make use of the lessons learned from a study of depersonalization to arrive at a deeper understanding of writing Given this knowledge the controversial writing teacher's maxim show don't tell so often misapplied or misunderstood can be repurposed as a practical instruction for taking students writing to a new level of sophistication and wisdom
