**The Major International Treaties of the Twentieth Century** John Ashley Soames Grenville, 2001 *The Major International Treaties of the Twentieth Century* John Grenville, Bernard Wasserstein, 2013-12-04 The Major International Treaties of the Twentieth Century surveys the history of treaty making throughout the twentieth century It accessibly provides the texts of all the major treaties that either continue in force today or are of historical importance These treaties are essential for an understanding of recent history and analysis of current international relations The Major International Treaties of the Twentieth Century is truly global in scope and covers treaties of all aspects from political and economic agreements to environmental and human rights pacts From the great many treaties set out and discussed examples include the Treaty of Versailles 1919 the Pact of Steel 1939 the Charter of the United Nations 1945 the North Atlantic Treaty 1949 the Treaty between the Federal Republic of Germany and the German Democratic Republic 1990 the Belfast Agreement 1998 the Charter of the Organisation of African Unity 1963 the Universal Declaration of Human Rights 1948 Drawing on the previous volumes of their books on major international treaties the authors bring the picture up to date in this definitive work with the events of the 1980s and the 1990s many of which have rendered earlier treaties redundant This is an invaluable resource for all those interested in modern history politics and international relations *The Major International Treaties, 1914-1973 ; a History and Guide With Texts [By] J.A.S. Grenville* John Ashley Soames Grenville, 1974 The World Since 1945 P. M. H. Bell, Mark Gilbert, 2016-11-03 A masterly synthesis of the history of the contemporary world The World Since 1945 offers the ideal introduction to the events of the period between the end of the Second World War and the present day P M H Bell and Mark Gilbert balance a clear narrative with in depth analysis to guide the reader through the aftermath of the Second World War the Cold War decolonization D tente and the Arab Israeli Conflict up to the on going ethnic strife and political instability of the 21st century The new edition has been thoroughly revised to fully reflect developments in the history and historiography of the post war world and features five new chapters on the post Cold War world covering topics including The rise and fall of American hegemony The decline of Europe The rise of Asia Political Islam as a global force The role of human rights The World Since 1945 challenges us to better understand what happened and why in the post war period and shows the ways in which the past continues to exercise a profound influence on the present It is essential reading for any student of contemporary history Environmental Justice and the Rights of Indigenous Peoples Laura Westra, 2012-05-16 More than 300 million people in over 70 countries make up the worlds indigenous populations Yet despite ever growing pressures on their lands environment and way of life through outside factors such as climate change and globalization their rights in these and other respects are still not fully recognized in international law In this incisive book Laura Westra deftly reveals the lethal effects that damage to ecological integrity can have on communities Using examples in

national and international case law she demonstrates how their lack of sufficient legal rights leaves indigenous peoples defenceless time and again in the face of governments and businesses who have little effective incentive to consult with them let alone gain their consent in going ahead with relocations mining plans and more The historical background and current legal instruments are discussed and through examples from the Americas Africa Oceania and the special case of the Arctic a picture emerges of how things must change if indigenous communities are to survive It is a warning to us all from the example of those who live most closely in tune with nature and are the first to feel the impact when environmental damage goes unchecked

**War Aims in the Second World War** Victor Rothwell, 2019-08-07 No detailed description available for War Aims in the Second World War

**Germany and Europe 1919-1939** John Hiden, 2014-09-25 This is the only short study in English to survey Germany's foreign policy from a German viewpoint across the entire inter war period The approach which sets Germany in her full European context is not narrowly diplomatic and it gives as much attention to the Weimar years of the 1920s as it gives to the more familiar story of Germany's international relations under the Third Reich John Hiden has now thoroughly revised his text to take account of new scholarship since the book first appeared in 1977

**Faces of State Terrorism** Laura Westra, 2012-05-16 Terrorism a widespread global phenomenon manifests itself in the actions and the policies of individuals and groups but also and primarily in the actions and policies of states Delving into the seldom discussed question of the motivation for most episodes of terrorism this book studies terrorism's effects based on the economic and geopolitical imbalances that frame today's global governance The main goal of terrorism is to induce terror and perhaps to influence public opinion for political change Many states hide their terrorist activities under the faces they show the world masks intended to hide real aims of acquiring or expanding power and wealth These activities presented as self defense preventive action counter measures or even as promoting progress and development are forms of state terrorism that are much more widespread powerful and destructive than the actions originating from groups labeled terrorist since 9 11 This book examines the numerous illegal measures states use from unlawful imprisonment and curtailing of civil liberties to torture in the name of responding to terrorism At the same time it considers how trade and industrial activities terrorize people by depriving them of the natural resources they need to survive and by exposing communities to life threatening hazardous conditions In closing the book considers how existing laws might stem the tide of state terrorism The conclusions are not optimistic the UN's systems and legal regimes are clear in defense of human rights but the structure and nature of state power do not permit these mandates to prevail With a foreword by Tullio Scovazzi

**State Continuity and Nationality: The Baltic States and Russia** Ineta Ziemele, 2021-10-11 The International Law Commission when drafting articles on nationality of persons in situations of State succession omitted cases of unlawful territorial changes These do not result in State succession they may be dealt with under the rubric of State continuity The Baltic Russian cases show the particularly complex nature of these situations both as concerns agreement on continuity and decisions on nationality The

author examines in detail the Citizenship Laws of the Baltic States and Russia as well as relevant constitutional and international statements about the international legal status of the States and responses of the international community thereto. The main question addressed in the book is about solutions which States have to adopt concerning nationality of individuals in situations of State continuity especially where States re-emerge after long years of occupation. Although the book is specific in its origin it is of general importance because it draws conclusions concerning developments in law and practice which are relevant for a better understanding and regulation of nationality and statehood in international law.

V.K. Wellington Koo and the Emergence of Modern China Stephen G. Craft, 2021-09-15. Chinese diplomat V.K. Wellington Koo (1888-1985) was involved in virtually every foreign and domestic crisis in twentieth-century China. After earning a Ph.D. from Columbia University, Koo entered government service in 1912, intent on revising the unequal treaty system imposed on China in the nineteenth century, believing that breaking the shackles of imperialism would bring China into the family of nations. His pursuit of this nationalistic agenda was immediately interrupted by Chinese civil war and Japanese imperialism during World War I. In the 1930s, Koo attempted to use international law to force western powers to honor their treaty obligations to punish Japanese expansion. Koo also participated in creating the League of Nations and later the United Nations in the hope that collective security would become reality. *Detente in Europe, 1972-1976* Gill Bennett, Keith A. Adamthwaite,2013-08-21 First published in 1979 In this text the Adamthwaite aims at leading students through the maze of documentation surrounding the Second World War His book combines a critical assessment of recent research and writing with a painstaking selection of the key documents needed for a clear understanding of the policies that led to war It contains the first student selection of British French German Italian and Soviet documents many of which are translated for the first time Though emphasis falls on the years 1935 9 material is also included for the period 1929 35 Winding up the British Empire in the Pacific Islands W. David McIntyre,2016-11-24 Little has been written about when how and why the British Government changed its mind about giving independance to the Pacific Islands Using recently opened archives Winding Up the British Empire in the Pacific Islands gives the first detailed account of this event As Britain began to dissolve the Empire in Asia in the aftermath of the Second World War it announced that there were some countries that were so small remote and lacking in resources that they could never become independent states However between 1970 and 1980 there was a rapid about turn Accelerated decolonization suddenly became the order of the day Here was the death warrant of the Empire and hastily arranged independence ceremonies were performed for six new states Tonga Fiji Solomon Islands Tuvalu Kiribati and Vanuatu The rise of anti imperialist pressures in the United Nations had a major role in this change in policy as did the pioneering examples marked by the release of Western Samoa by New Zealand in 1962 and Nauru by Australia in 1968 The tenacity of Pacific Islanders in maintaining their cultures was in contrast to more strident Afro Asia nationalisms The closing of the Colonial Office by merger with the Commonwealth Relations Office in 1966 followed by the joining of the Commonwealth and Foreign Offices in

1968 became a major turning point in Britain's relations with the Islands. In place of long nurtured traditions of trusteeship for indigenous populations that had evolved in the Colonial Office, the new Foreign Commonwealth Office concentrated on fostering British interests which came to mean reducing distant commitments and focussing on the Atlantic world and Europe.

**Dynamics of Self-Determination in Palestine** Waart, 2021-10-11 The Arab Israeli conflict has become an example of total disregard for international law by all parties involved including the United Nations to the detriment of a regional and global lasting peace. The conflict has contributed considerably to the erosion of the moral and legal authority of the United Nations while the international community has failed to take prompt advantage of the East West detente. Peoples with statehood the Iraqis Somalis Yugoslavs and even more those without the Palestinians paid a high price for the international lack of decisiveness. **Dynamics of Self Determination in Palestine** discusses the Palestinian conflict in the light of the protection of peoples under international law. Chapter One treats the fact that the Arab states and the Palestinians have overlooked the element of negotiation in the keeping of international order. Chapter Two discusses the International Bill of Rights in which the UN included self determination in order to protect peoples against oppression while Chapter Three expounds on the fact that in doing so it shaped the framework for the settlement of conflicting territorial claims to Palestine. The final chapter sets forth the desired UN participation in the creation of Palestine.

**Routledge Handbook of State Recognition** Gözim Visoka, John Doyle, Edward Newman, 2019-09-12 This new handbook provides a comprehensive and multidisciplinary overview of the theoretical and empirical aspects of state recognition in international politics. Although the recognition of states plays a central role in shaping global politics it remains an under researched and widely dispersed subject. Coherently and innovatively structured the handbook brings together a group of international scholars who examine the most important theoretical and comparative perspectives on state recognition including debates about pathways to secession and self determination the broad range of actors and strategies that shape the recognition of states and a significant number of contemporary case studies. The handbook is organised into four key sections: Theoretical and normative perspectives; Pathways to independent statehood; Actors, forms and the process of state recognition; Case studies of contemporary state recognition. This handbook will be of great interest to students of foreign policy international relations international law comparative politics and area studies.
