Syntax in the Making Marja-Liisa Helasvuo, 2001 Research on the interplay between language structure and language use has shown that grammar is shaped maintained and modified by language use In this view then grammar is not seen as existing apart from language use but rather as a set of recurrent grammaticized patterns of discourse This book focuses on syntactic structuring in Finnish from the viewpoint of language use The author sets out to study syntactic structures in their local contexts in order to discover the more global patterns and constraints on the use of these structures The coding strategies point to the clause core as the locus of syntactic structuring this is where syntactic relations emerge most clearly It is shown that the key to understanding the coding of the core syntactic relations is the category of person The clause core also shows strong intonational unity as it is most often presented in one intonation unit Furthermore analysis of spoken discourse shows the robustness of the category of noun phrase both as a clausal constituent and as a free syntactic unit the free NP

Integrational Linguistics and Philosophy of Language in the Global South Sifre B. Makoni, Deryn P. Verity, Anna Kaiper-Marquez, 2021-05-26 Exploring the nature of possible relationships between Integrational Linguistics and Southern Epistemologies this volume examines various ways in which Integrational Linguistics can be used to support the decolonizing interests of Southern Epistemologies particularly the lay oriented nature of Integrational Linguistics that Southern Epistemologies find productive as a positive counter discourse As both an anti elitist and anti establishment way of thinking these chapters consider how Integrational Linguistics can be consistent with the decolonial aspirations of Southern Epistemologies They argue that the relationship between Southern Epistemologies and Integrational Linguistics is complicated by the fact that while Integrational Linguistics

is critical of what it calls a segregationist view of language i.e the language myth Southern Epistemologies in language policy and planning and minority language movements find the language myth helpful in order to facilitate social transformation And yet both Integrational Linguistics and Southern Epistemologies are critical of approaches to multilingualism that are founded on notions of named languages They are also both critical of linguistics as a decontextualized and institutionalized extension of ordinary metalinguistic practices which at times influence the prejudices preconceptions and ideologies of dominant western cultures This book will prove to be an essential resource for scholars and students not only within the field of integrational linguistics but also in other language and communication fields in particular the dialogic distributed and ecological enactive approaches wherein integrational linguistics has been subjected to scrutiny and criticism **Undoing**

The introduction to *Decolonizing Linguistics* theorizes decolonization as the process of centering Black Native and Indigenous perspectives; describes the extensive dialogic and collaborative process through which the volume was developed; and lays out key principles for decolonizing linguistic research and teaching. The twenty chapters cover a wide range of languages and linguistic contexts, e.g., Bantu languages, Creoles, Dominican Spanish, Francophone Africa, Zapotec, as well as various disciplines and subfields: applied linguistics, communication, historical linguistics, language documentation and revitalization, reclamation, psycholinguistics, sociolinguistics, syntax. Contributors address such topics as refusing settler colonial practices and centering community goals in research on Indigenous languages; decolonizing research partnerships between the Global South and the Global North; and prioritizing Black Diasporic perspectives in linguistics. The volume's conclusion lays out specific actions that linguists can take through research, teaching, and institutional structures to refuse coloniality in linguistics and to move the field toward a decolonized future.
