The Making Of The Cold War Enemy Culture And Politics In The Military Intellectual Complex:

The Making of the Cold War Enemy Ron Theodore Robin, 2003-01-26 He reveals how the academics intolerance for complexity ultimately reduced the nation s adversaries to borderline psychotics ignored revolutionary social shifts in post World War II Asia and promoted the notion of a maniacal threat facing the United States Non-Aligned Psychiatry in the Cold War Ana Antić, 2022-01-18 This book explores the relationship between socialist psychiatry and political ideology during the Cold War tracing Yugoslav psy sciences as they experienced multiple internationalisations and globalisations in the post WWII period These unique transnational connections with West East and South remain at the centre of this book The author argues that the psy disciplines provide a window onto the complications of Cold War internationalism offering an opportunity to re think postwar Europe s internal dynamics She tells an alternative pan European narrative of the post 1945 period demonstrating that in the Cold War there existed sites of collaboration and vigorous exchange between the two ideologically opposed camps and places like Yugoslavia provided a meeting point where ideas frameworks and professional and cultural networks from both sides of the Iron Curtain could overlap and transform each other Moreover the book offers the first analysis of East European psychiatrists contacts with and contributions to the decolonizing world exploring their participation in broader political discussions about decolonization anti imperialism and non alignment The Yugoslav brand of East West psychoanalysis and psychotherapy bred a truly unique intellectual framework which enabled psychiatrists to think through a set of political and ideological dilemmas regarding the relationship between individuals and social structures This book offers a thorough reinterpretation of the notion of communist psychiatry as a tool used solely for political oppression and instead emphasises the political interventions of East European psychiatry and psychoanalysis This monograph has partly been funded by the European Research Council ERC under the European Union s Horizon 2020 research and innovation programme ERC Starting Grant DECOLMAD 851871 *Globalization and War* Tarak Barkawi, 2006 Examining the interconnections between globalization and war Barkawi Centre of International Studies U of Cambridge UK first analyzes how war interconnects and reshapes places and how developments in the nature and utility of military force shape transregional and worldwide contexts utilizing the relations among India the British empire and the Indian Army is illustrative material He then examines cultural dimensions of war and globalization such as geographic imaginaries of a modern and advance West and a barbarous Orient The themes developed in these chapters are then applied to the War on Terror *Korean Memories and Psycho-Historical Fragmentation* Mikyoung Kim, 2019-09-09 This pioneering book is the first English volume on Korean memories In it Mikyoung Kim introduces psycho historical fragmentation a concept that explains South Korea s mnemonic rupture as a result of living under intense temporal psychological and physical pressure As Korean society has undergone transformation at unusual speed and intensity so has its historical memory Divided into three sections on lingering colonial legacies the residuals of the Cold War and Korean War and Korea s democracy movement in

the 1980s Korean Memories and Psycho Historical Fragmentation aims to tell multi layered subtle and lesser known stories of Korea s historical past With contributions from interdisciplinary perspectives it reveals the fragmentation of Korean memory and the impact of silencing International Development Corinna R. Unger,2018-09-06 International Development A Postwar History offers the first concise historical overview of international development policies and practices in the 20th century Embracing a longue dur e perspective the book describes the emergence of the development field at the intersection of late colonialism the Second World War the onset of decolonization and the Cold War It discusses the role of international organizations colonial administrations national governments and transnational actors in the making of the field and it analyzes how the political intellectual and economic changes over the course of the postwar period affected the understanding of and expectations toward development By drawing on examples of development projects in different parts of the world and in different fields Corinna R Unger shows how the plurality of development experiences shaped the notion of development as we know it today This book is ideal for scholars seeking to understand the history of development assistance and to gain new insight into the international history of the 20th century **The Latin American Literary Boom and U.S. Nationalism During the Cold War** Deborah N. Cohn,2012 How the dissemination of Latin American literature in the U S was caught between the desire to support the literary revolution of the Boom writers and the fear of revolutionary politics John King **Cult of the Irrelevant** Michael C. Desch,2019 How professionalization and scholarly rigor made social scientists increasingly irrelevant to US national security policy To mobilize America s intellectual resources to meet the security challenges of the post 9 11 world US Secretary of Defense Robert M Gates observed that we must again embrace eggheads and ideas But the gap between national security policymakers and international relations scholars has become a chasm In Cult of the Irrelevant Michael Desch traces the history of the relationship between the Beltway and the Ivory Tower from World War I to the present day Recounting key Golden Age academic strategists such as Thomas Schelling and Walt Rostow Desch s narrative shows that social science research became most oriented toward practical problem solving during times of war and that scholars returned to less relevant work during peacetime Social science disciplines like political science rewarded work that was methodologically sophisticated over scholarship that engaged with the messy realities of national security policy and academic culture increasingly turned away from the job of solving real world problems In the name of scientific objectivity academics today frequently engage only in basic research that they hope will somehow trickle down to policymakers Drawing on the lessons of this history as well as a unique survey of current and former national security policymakers Desch offers concrete recommendations for scholars who want to shape government work The result is a rich intellectual history and an essential wake up call to a field that has lost its way **Global and Transnational History** A. Iriye,2012-10-29 It is no exaggeration to say that the study of history has been transformed significantly during the last twenty odd years Akira Iriye the world authority on transnational history examines the emergence and growth of

narrates a moment of transition in Cold War politics and how Maoist China influenced activists and intellectuals around the world becoming a central element in the political upheaval of the long 1960s After the Korean War Heonik Kwon,2020-04-16 The first comprehensive analysis of the Korean War and its enduring legacies through the lenses of intimate human and social experience *The World of the John Birch Society* D. Mulloy,2014-06-27 As far as members of the hugely controversial John Birch Society were concerned the Cold War revealed in stark clarity the loyalties and disloyalties of numerous important Americans including Dwight Eisenhower John Kennedy and Earl Warren Founded in 1958 as a force for conservative political advocacy the Society espoused the dangers of enemies foreign and domestic including the Soviet Union organizers of the US civil rights movement and government officials who were deemed soft on communism in both the Republican and Democratic parties Sound familiar In *The World of the John Birch Society* author D J Mulloy reveals the tactics of the Society in a way they've never been understood before allowing the reader to make the connections to contemporary American politics up to and including the Tea Party These tactics included organized dissemination of broad based accusations and innuendo political brinksmanship within the Republican Party and frequent doomsday predictions regarding world events At the heart of the organization was Robert Welch a charismatic writer and organizer who is revealed to have been the lifeblood of the Society's efforts The Society has seen its influence recede from the high water mark of 1970s but the organization still exists today Throughout *The World of the John Birch Society* the reader sees the very tenets and practices in play that make the contemporary Tea Party so effective on a local level Indeed without the John Birch Society paving the way the Tea Party may have encountered a dramatically different political terrain on its path to power

Empire of Ideas Justin Hart,2013-01-25 *Empire of Ideas* examines the origins of the U S government's programs in public diplomacy and how the nation's image in the world became an essential component of U S foreign policy *Bourdieu in International Relations* Rebecca Adler-Nissen,2013 This book rethinks the key concepts of International Relations by drawing on the work of Pierre Bourdieu The last few years have seen a genuine wave of publications promoting sociology in international relations Scholars have suggested that Bourdieu's vocabulary can be applied to study security diplomacy migration and global environmental politics Yet we still lack a systematic and accessible analysis of what Bourdieu inspired IR might look like This book provides the answer It offers an introduction to Bourdieu's thinking to a wider IR audience challenges key assumptions which currently structure IR scholarship and provides an original theoretical restatement of some of the core concepts in the field The book brings together a select group of leading IR scholars who draw on both theoretical and empirical insights from Bourdieu Each chapter covers one central concept in IR Methodology Knowledge Power Strategy Security Culture Gender Norms Sovereignty and Integration The chapters demonstrate how these concepts can be reinterpreted and used in new ways when exposed to Bourdieusian logic Challenging key pillars of IR scholarship *Bourdieu in International Relations* will be of interest to critical theorists and scholars of IR theory **The Korean War in**

Britain Grace Huxford, 2018-05-20 The Korean War in Britain explores the social and cultural impact of the Korean War 1950-53 on Britain. Coming just five years after the ravages of the Second World War, Korea was a deeply unsettling moment in post-war British history. From allegations about American use of germ warfare to anxiety over Communist use of brainwashing and treachery at home, the Korean War precipitated a series of short-lived panics in 1950s Britain. But by the time of its uneasy ceasefire in 1953, the war was becoming increasingly forgotten. Using Mass Observation surveys, letters, diaries, and a wide range of under-explored contemporary material, this book charts the war's changing position in British popular imagination and asks how it became known as the Forgotten War. It explores the war in a variety of viewpoints: conscript, POW, protester, and veteran, and is essential reading for anyone interested in Britain's Cold War past. **A Historiography of the Modern Social Sciences** Roger E. Backhouse, Philippe Fontaine, 2014-09-22 A Historiography of the Modern Social Sciences exposes parallels and contrasts in the way the histories of the social sciences are written.

Western Anti-Communism and the Interdoc Network Giles Scott-Smith, 2012-12-03 Interdoc was established in 1963 by Western intelligence services as a multinational effort to coordinate an anti-communist offensive. Drawing on exclusive sources and the memories of its participants, this book charts Interdoc's campaign, the people and ideas that lay behind it, and the rise and fall of this remarkable network during the Cold War. *American Power and International Theory at the Council on Foreign Relations, 1953-54* David M. McCourt, 2020-02-04 Between December 1953 and June 1954, the elite think tank the Council on Foreign Relations (CFR) joined prominent figures in International Relations, including Pennsylvania's Robert Strausz Hup Yale's Arnold Wolfers, the Rockefeller Foundation's William Thompson, government adviser Dorothy Fosdick, and nuclear strategist William Kaufmann. They spent seven meetings assessing approaches to world politics from the realist theory of Hans Morgenthau to theories of imperialism of Karl Marx and V. I. Lenin, to discern basic elements of a theory of international relations. The study group's materials are an indispensable window to the development of IR theory, illuminating the seeds of the theory-practice nexus in Cold War U.S. foreign policy. Historians of International Relations recently revised the standard narrative of the field's origins, showing that IR witnessed a sharp turn to theoretical consideration of international politics beginning around 1950 and remained preoccupied with theory. Taking place in 1953-54, the CFR study group represents a vital snapshot of this shift. This book situates the CFR study group in its historical and historiographical contexts and offers a biographical analysis of the participants. It includes seven preparatory papers on diverse theoretical approaches penned by former Berkeley political scientist George A. Lipsky, followed by the digest of discussions from the study group meetings. *American Power and International Theory at the Council on Foreign Relations, 1953-54* offers new insights into the early development of IR, as well as the thinking of prominent elites in the early years of the Cold War. The International Political Sociology of Security Trine Villumsen Berling, 2015-02-11 This book builds a theoretical approach to the intractable problem of theory-practice in international relations (IR) and develops tools to study how theory and practice

hang together in international security Drawing on Pierre Bourdieu's political sociology the book argues that theory and practice take part in struggles over basic understandings doxa in international fields through what the book calls doxic battles In these battles e.g. scientific facts military hardware and social networks are mobilised as weapons in a fight for recognition NATO's transformation and fight for survival and the rapidly growing number of think tanks in European security in the 1990s is taken as an example of these processes The book studies a variety of sources such as funding to science programmes in Europe think tanks and research centres in European security NATO's relations with the EU the WEU and the OSCE and the mobilization of theory at crucial points in the transformation process Theory as Practice and Capital will be of interest to students and scholars of international relations security studies and critical theory
