Humans, Animals and Biopolitics Kristin Asdal, Tone Druglitrø, Steve Hinchliffe, 2016-07-01 Human-animal co-existence is central to a politics of life: how we order societies and to debates about who we humans think we are. In other words, our ways of understanding and ordering human-animal relations have economic and political implications and affect people's everyday lives. By bringing together historically oriented approaches and contemporary ethnographies which engage with science and technology studies (STS), this book reflects the multi-sited, multi-species, multi-logic, and multiple ways in which lives are and have been assembled, disassembled, practised, and possibly policed and politicized. Instead of asking only how control and knowledge are and have been extended over life, the chapters in this book also look at what happens when control fails at practices which defy orders, escape detection, fail to produce, or only loosely hang together. In doing so, the book problematizes and extends the Foucauldian notion of biopolitics that has been such a central analytical concept in studies of human-animal relations and provides a unique resource of cases and theoretical refinements regarding the ways in which we live together with more-than-human others.
