Douglas Brackenridge, 1999-01-01 For two centuries the Presbyterian Church U S A Foundation has been at work serving the church and undergirding its mission In this authoritative and carefully researched history R Douglas Brackenridge unfolds the story of how the Foundation developed its unique role in the Presbyterian Church U S A It is a history filled with strong leaders vigorous challenges and lively debate Brackenridge shows how the Foundation even in times of struggle has been shaped over the decades as a significant instrument of support to the Presbyterian Church U S A *Research Papers: Philanthropic fields of interest. pt. 1. Areas of activity. pt. 2. Additional perspectives* Commission on Private Philanthropy and Public Needs, 1977 Research Papers , 1977 **The Ambiguous Legacy** Michael J. Hogan, 1999-11-13 This collection assesses the record of American foreign policy in the twentieth century Writing Off Ideas Randall G. Holcombe, 2018-04-17 Tax exempt foundations grew substantially in the twentieth century both in their financial importance and in the scope of their activities This challenging book examines the economic cultural and intellectual implications of tax exempt organizations How do various tax laws influence foundations and what types of ideas do foundations produce How do the activities of foundations relate to the interests and intentions of their founders Does the economic management of foundation assets serve the public good or would such assets be better employed through the private sector Writing Off Ideas examines these and related questions primarily by looking at specific examples as well as the overall impact of foundation practices economically and socially Review of Current Information in the Treasury Department Library United States. Department of the Treasury. Library, 1975 Grants Virginia P. White, 2013-11-11 Philanthropic Foundations in the Twentieth Century Joseph C. Kiger, 2000-01-30 In a readable coherent and succinct account Kiger surveys the changes that have taken place in U S foundations in the 20th century and describes our foundations as they exist today Opening with historical information on the emergence of large foundations at the beginning of the century the book discusses the major characteristics of foundations emphasizing that they are organized to give away rather than make money and identifies and discusses the major changes since 1950 In considering those changes the book considers such topics as growth and expansion diversification in the makeup of trustees and staff and governmental oversight and supervision In the increasing movement of foundations into the international sphere the book covers their international activities and the formation and operation of international centers and groups associated with them Phlanthropic Foundations in the Twentieth Century provides a useful overview of the growth development and operation of foundations

Competition Policy in America Rudolph J. R. Peritz, 2001-04-05 Americans have long appealed to images of free competition in calling for free enterprise freedom of contract free labor free trade and free speech This imagery has retained its appeal in myriad aspects of public policy for example Senator Sherman's Anti Trust Act of 1890 Justice Holmes's metaphorical marketplace of ideas and President Reagan's rhetoric of deregulation In *Competition Policy in America* 1888 1992 Rudolph Peritz explores the durability of free competition imagery by tracing its influences on public policy Looking at congressional debates and hearings administrative agency activities court opinions arguments of counsel and economic legal and political scholarship he finds that free competition has actually evoked two different visions freedom not only from oppressive government but also from private economic power He shows how the discourse of free competition has mediated between commitments to individual liberty and rough equality themselves unstable over time This rhetorical approach allows us to understand for example that the Reagan and Carter programs of deregulation both inspired by the rhetoric of free competition were driven by fundamentally different visions of political economy Peritz's historical inquiry into competition policy as a series of government directives inspired by two complex yet distinct and sometimes contradictory visions of free competition provides an indispensable framework for understanding modern political economy whether political campaign finance reform corporate takeover regulation or current attitudes toward the New Deal Legacy *Competition Policy in America* will be of great interest to lawyers historians economists sociologists and policy makers in both government and business

Cultural Policy, Work and Identity Jonathan Paquette, 2016-05-13 How have cultural policies created new occupations and shaped professions This book explores an often unacknowledged dimension of cultural policy analysis the professional identity of cultural agents It analyses the relationship between cultural policy identity and professionalism and draws from a variety of cultural policies around the world to provide insights on the identity construction processes that are at play in cultural institutions This book reappraises the important question of professional identities in cultural policy studies museum studies and heritage studies The authors address the relationship between cultural policy work and identity by focusing on three levels of analysis The first considers the state the creativity of the power relationship established in cultural policies and the power which structures the symbolic order of cultural work The second presents community in the cultural policy process society and collective action whether it is through the creation of institutions for arts and heritage profession or through resistance to state cultural policies The third examines the experience of cultural policy by the professional It illustrates how cultural policy is both a set of contingencies that shape possibilities for professionals as much as it is a basis for identification and identity construction The eleven authors in this unique book draw on their experience as artists and researchers from a range of countries including France Canada United Kingdom United States and Sweden
