A Biography of a Map in Motion Christian J. Koot, 2018 Reveals the little known history of one of history s most famous maps and its maker Tucked away in a near forgotten collection Virginia and Maryland as it is Planted and Inhabited is one of the most extraordinary maps of colonial British America Created by a colonial merchant planter and diplomat named Augustine Herrman the map pictures the Mid Atlantic in breathtaking detail capturing its waterways coastlines and communities Herrman spent three decades travelling between Dutch New Amsterdam and the English Chesapeake before eventually settling in Maryland and making this map Although the map has been reproduced widely the history of how it became one of the most famous images of the Chesapeake has never been told A Biography of a Map in Motion uncovers the intertwined stories of the map and its maker offering new insights into the creation of empire in North America The book follows the map from the waterways of the Chesapeake to the workshops of London where it was turned into a print and sold Transported into coffee houses private rooms and government offices Virginia and Maryland became an apparatus of empire that allowed English elites to imaginatively possess and accurately manage their Atlantic colonies Investigating this map offers the rare opportunity to recapture the complementary and occasionally conflicting forces that created the British Empire From the colonial and the metropolitan to the economic and the political to the local and the Atlantic this is a fascinating exploration of the many meanings of a map and how what some saw as establishing a sense of local place could translate to forging an empire

Handbook of the Linguistic Atlas of the Middle and South Atlantic States William A. Kretzschmar, William A. Kretzschmar Jr., 1993-09-15 Who uses skeeter hawk snake doctor and dragonfly to refer to the same insect Who says gum band instead of rubber band The answers can be found in the Linguistic Atlas of the Middle and South Atlantic States LAMSAS the largest single survey of regional and social differences in spoken American English It covers the region from New York state to northern Florida and from the coastline to the borders of Ohio and Kentucky Through interviews with nearly twelve hundred people conducted during the 1930s and 1940s the LAMSAS mapped regional variations in vocabulary grammar and pronunciation at a time when population movements were more limited than they are today thus providing a unique look at the correspondence of language and settlement patterns This handbook is an essential guide to the LAMSAS project laying out its history and describing its scope and methodology In addition the handbook reveals biographical information about the informants and social histories of the communities in which they lived including primary settlement areas of the original colonies Dialectologists will rely on it for understanding the LAMSAS and historians will find it valuable for its original historical research Since much of the LAMSAS questionnaire concerns rural terms the data collected from the interviews can pinpoint such language differences as those between areas of plantation and small farm agriculture For example LAMSAS reveals that two waves of settlement through the Appalachians created two distinct speech types Settlers coming into Georgia and other parts of the Upper South through the Shenandoah Valley and on to the western side of the mountain range had a Pennsylvania influenced dialect and were typically small farmers Those who settled the Deep South in the rich lowlands and plateaus tended to be plantation farmers from Virginia and the Carolinas who retained the vocabulary and speech patterns of coastal areas With these revealing findings the LAMSAS represents a benchmark study of the English language and this handbook is an indispensable guide to its riches
