The Northwest Garden Manifesto John J. Albers,2017-12-18 Gardens are extensions of our homes places in which we get outside to relax entertain and get some physical exercise But our gardens are also extensions of the natural world Through our gardens as well as other neighborhood greenspaces we can help counter some of the woes faced by larger environments rampant development loss of plant and animal habitat spread of invasive species exploitation of natural resources air and water pollution and the impacts of global warming Yes even small urban backyard landscapes can combat such man made strains on our local environment and it s easy to do In his new book **The Northwest Garden Manifesto** scientist and gardener John J Albers provides a comprehensive guide to encourage and enable homeowners to consider the local ecosystem in their own gardens and in their larger communities The ideas and concepts in this book reflect the most up to date thinking on urban ecology and how to best make our yards reflect the natural world around us The key to Albers s approach is for gardeners to first assess the current state of their property and then focus on the following key principles 1 Protect conserve and create healthy soil 2 Maintain healthy plants and create a sustainable landscape 3 Conserve water and other natural resources 4 Protect water and air quality 5 Protect and enhance wildlife habitat 6 Conserve energy 7 Use sustainable methods and materials Through clear explanation practical examples and full color photos Albers shows how to evaluate any yard in terms of these principles and then challenges the reader to improve each element one step at a time From creating better soil to starting a compost pile attracting pollinators to adding more native plants or creating a simple circulating water feature to building a fence from recycled wood gardeners will ultimately turn their backyards into beautiful healthy and happy habitat for all

Food Security for the Faint of Heart Robin Wheeler, 2008-09-01. There are books you merely read. There are books you read, recommend to others and pass along. Then there are those books you read, lay aside, jump to your feet, throw your hands in the air and holler. Yes, Food Security for the Faint of Heart is one of the latter. Robin Wheeler has managed to extract logic from hysteria, package it with a strong environmental perspective, an abundance of practical suggestions and enough good humour to make this a must have for every soul interested in surviving whatever natural disaster comes along. Wheeler wastes no time in addressing the central theme of her book: Anything can happen, so you better be prepared, and here's how. In her impressive list of Good Things to Have in an Emergency, she catalogues essential items including lesser-touted items such as cooking oil and salt. If Wheeler has done anything by writing this book, she's pulled the proverbial rug from under our feet when it comes to excuses for not eating well through any disaster. Reviewed by Linda Wegner, Country Life in BC. Where would you find your groceries if your supermarket's shelves were suddenly empty? The threat of earthquakes, trucker strikes, power outages or a global market collapse makes us vulnerable like never before. With spiraling fuel prices and unstable world economies, individuals and communities are demanding more control over their food supply. Food Security for the Faint of Heart is designed to gently ease readers into a more empowered place so that shocks to our food supply can be handled confidently. As well as acquiring new skills and ideas, there are other compelling reasons to get better prepared. The local economy gains support and encouragement to expand in turn, boosting food's taste and nutritional value along with the health of people and ecosystems. Community support helps low-income families eat higher quality food and the preparation provides a psychological edge in an emergency. Chapters are devoted to useful transferable skills including Preserving garden food, Saving freezer food during a power outage, Managing through an earthquake, Preparing quick herbal medicinals, Foraging for
