Cosmic

Influences on Humans, Animals, and Plants John T. Burns, 1997 This annotated bibliography makes available to the general reader and scholar a broad survey of the scientific literature on alleged cosmic influences on humans animals and plants To be included a study must involve the collection of data or be a commentary on studies based on data As some of the topics covered are still quite controversial in nature while other topics have been scientifically studied to some extent the terms alleged claimed or suggested are noted in the citations to remind the reader that a particular study has not necessarily been proven to be scientifically valid The four parts of Cosmic Influences on Humans Animals and Plants are organized around alleged effects of solar activity the moon the planets and possible mechanisms for such actions Some effects that the sun and moon are known to have on our daily lives such as the cycles of light and dark and the lunar tides have not been included because of their commonality However other effects such as those influences the moon has been shown to have over some animals have been included for the sake of completeness With subject and author indexes Hundredth Monkey

Kendrick Frazier, 2023-10-17 The Hundredth Monkey takes its title from philosopher Ron Amundson's expose of the Hundredth Monkey Phenomenon a claim about collective consciousness Forty three essays by thirty nine authors including Isaac Asimov Martin Gardner Carl Sagan Ray Hyman Paul Kurtz and James Randi examine aspects of paranormal and fringe science beliefs from an authoritative scientific point of view The penetrating and entertaining essays many with timely postscripts are grouped into nine categories Understanding Human Need Examining Popular Claims Encouraging Critical Thinking Medical Controversies Evaluating the Anomalous Experience Astrology Considering Parapsychology Crashed Saucer Claims Controversies Within Science Scientists and scholars discuss the burden of skepticism and the delicate balance between a creative openness to new ideas and the relentless scrutiny of new claims A classic source book for scientifically responsible explanations of controversies hoaxes bizarre mysteries and popular cultural myths The Moon and Madness

Niall McCrae, 2011-10-19 Lunacy the legendary notion of minds unhinged by the moon continues to captivate the popular imagination Although it violates the assumptions of modern science and psychiatry such belief remains common among mental health workers Furthermore several studies have found a small unexplained correlation between behaviour and the lunar cycle The book is divided into two parts It begins with a historical account of the lunacy concept followed by an investigation of hypothetical mechanisms for a lunar effect *The Human Cosmos* Jo Marchant, 2021-09-07 A Best Book of 2020 NPR A Best Book of 2020 The Economist A Top Ten Best Science Book of 2020 Smithsonian A Best Science and Technology Book of 2020 Library Journal A Must Read Book to Escape the Chaos of 2020 Newsweek Starred review Booklist

Starred review Publishers Weekly A historically unprecedented disconnect between humanity and the heavens has opened Jo Marchant's book can begin to heal it For at least 20 000 years we have led not just an earthly existence but a cosmic one Celestial cycles drove every aspect of our daily lives Our innate relationship with the stars shaped who we are our art religious beliefs social status scientific advances and even our biology But over the last few centuries we have separated ourselves from the universe that surrounds us It's a disconnect with a dire cost Our relationship to the stars and planets has moved from one of awe wonder and superstition to one where technology is king the cosmos is now explored through data on our screens not by the naked eye observing the natural world Indeed in most countries modern light pollution obscures much of the night sky from view Jo Marchant's spellbinding parade of the ways different cultures celebrated the majesty and mysteries of the night sky is a journey to the most awe inspiring view you can ever see looking up on a clear dark night That experience and the thoughts it has engendered have radically shaped human civilization across millennia The cosmos is the source of our greatest creativity in art in science in life To show us how Jo Marchant takes us to the Hall of the Bulls in the caves at Lascaux in France and to the summer solstice at a 5 000 year old tomb at Newgrange Ireland We discover Chumash cosmology and visit medieval monks grappling with the nature of time and Tahitian sailors navigating by the stars We discover how light reveals the chemical composition of the sun and we are with Einstein as he works out that space and time are one and the same A four billion year old meteor inspires a search for extraterrestrial life The cosmically liberating summary revelation is that star gazing made us human

The Key to the Qigong Meditation State Tianjun Liu,2016-12-21 Focusing on Rujing the meditation state fundamental to Qigong meditation this ground breaking book looks at the practice from the perspective of psychology and cognitive science It describes what happens in mind and body during meditation and how to reach the state of Rujing

Light of the Himalayas Kavitaran Shrestha,2017-06-29 To those who associate Siddhartha's enlightenment with magical happenings Light of the Himalayas is an answer The novel traces the gradual development of Siddhartha from an inquisitive child to a serious explorer on a trajectory of science and objectivity until his discovery of the elixir of life the eight fold path and the four golden rules The book decenters many myths and misconceptions about the life of the Buddha and invites readers to engage in scientific discourse about the religion

Ekadashi - Body & Mind Healing Method, Scientific way, Volume-1 ,2020-11-11 Efficient and perfect scientific method to heal your Body Mind together The first ever published book explaining complete science behind fast being performed in almost all the religions on 11th days of the month from the New moon and Full moon day which is called Ekadashi day This book depicts step by step method on how to perform the fast and how to break the fast with unbelievable physical and mental benefits

The Secret Influence of the Moon Louis Proud,2013-12-01 The Moon is not a cold dead rock but a rich fascinating world just as alive as Earth Investigates the Moon as the home of an alien intelligence who controls humanity Examines several of NASA's Apollo missions and the findings they concealed Reveals the many holes in the Giant Impact

theory about the Moon's origins and the evidence for a hollow artificial Moon. Explores the deep influence of the Moon on the collective mind of humanity and occult teachings about the Moon from the Qabbalah tarot and other sources. Despite being the most prominent celestial body after the Sun, the Moon has many qualities that science has yet to explain. Lunar rock samples reveal the Moon once had a magnetic field like the Earth, and seismic experiments by NASA suggest the Moon is at least partially hollow. For centuries, people have observed lights, moving clouds, and shadows, and even the disappearance of entire craters via telescope. Apollo astronauts repeatedly felt the presence of a non-human intelligence during their Moon visits, and many indigenous traditions speak of malevolent visitors from the Moon. A growing body of astrophysical and geological evidence shows the Moon is not an entirely natural world that someone or something altered it long ago. Louis Proud explores the phases and movements of the Moon along with its ancient and mysterious features: its craters, maria, rilles, tunnels, and domes. He examines several of NASA's Apollo missions, showing not that NASA faked the Moon expeditions but that they concealed what the astronauts found there. He explains the many holes in the commonly accepted Giant Impact theory of the Moon's origins and reveals the evidence for a hollow artificial Moon placed in orbit eons ago to observe Earth. Examining the deep influence of the Moon on the collective mind of humanity, Proud looks at what the Qabbalah, the tarot, and other occult traditions say about the Moon and interprets G. I. Gurdjieff's teachings that we are food for the Moon. He investigates the Moon as a gateway to another realm, as the Purgatory of Christianity, and as the home of an alien intelligence who controls and exploits humanity. Examining the Moon from both scientific and esoteric perspectives, Proud shows the Moon is not a cold, dead rock but a rich, fascinating world just as alive as Earth.

Earth-Moon Relationships Cesare Barbieri, Francesca Rampazzi, 2013-06-29 Sediments and sedimentary processes on the Moon and Earth are very different. In the absence of water, an atmosphere, the magnetosphere, and much less oxygen in its rocks, the Moon has neither clay minerals nor carbonates, and no Fe³. Mechanical weathering by impacts is the principal process of sediment generation on the Moon; on Earth, chemical weathering predominates. Whereas processes of sediment transport are principally ballistic on the Moon, movement by air, water, and ice prevail on the Earth. The radical differences between Earth and Moon sediments make them useful end members between which all sediments of all terrestrial planetary bodies are expected to lie. The purpose of this paper is 1) to compare and contrast major characteristics of the origin, transportation, deposition, and preservation of sediments, especially dust, in the Earth and the Moon, and 2) to suggest how sediments of other rocky planetary bodies, especially Mars, may fit in between the sediments of the Earth and the Moon.

Acorns: Windows High-Tide Foghat Joshua Morris, 2013-01-23 Acorns delineates the future of humanity as a reunification of intellect with the Deep Self. Having chosen to focus upon ego, established securely by the time of Christ, much more beta brain wave development will destroy our species and others, which process has already begun. We create our own realities through beliefs, intents, and desires, and we were in and out of probabilities constantly. Feelings follow beliefs, not the other way around. *The*

The Nonverbal Factor Donald B. Egolf, 2013-07-22 The Nonverbal Factor was written as a textbook for students in a nonverbal communication course At the same time the general reader should find the contents of the book interesting and exciting Covered in the book are the ways we communicate with our bodies our faces our eyes our voices our touches our body movements our dress our use of cosmetics and our structuring of time and space Special chapters are included on making impressions culture and deception The final chapters look at the importance of nonverbal communication in law medicine politics and the employment arena

Menstruation Across Cultures Nithin Sridhar, 2021-08-26 Menstruation across Cultures attempts to provide a detailed review of menstruation notions prevalent in India and in cultures from across the world The world cultures covered in the book include Indic traditions like Hinduism Buddhism Jainism and Sikhism ancient civilisations like Greece Rome Mesopotamia and Egypt and Abrahamic religions of Judaism Christianity and Islam Two themes of special focus in the book are Impurity and Sacrality While they are often understood as being opposed to each other the book examines how they are treated as two sides of the same coin when it comes to menstruation This is especially true in Indic traditions and pre Christian polytheistic traditions like Greco Roman Mesopotamian and Egyptian Impurity and Sacrality complement each other to form a comprehensive worldview in these cultures The book also examines how the understanding of impurity in Abrahamic religions differs from those of polytheistic cultures As part of the examination of the sacrality attached to menstruation a special focus has also been given to the deities of menstruation in polytheistic cultures and to what Ayurveda and Yoga say about this essential function in a woman s physiology Finally a comparative study of menstrual notions prevalent in modernity is presented along with a Do and Don t dossier

Sorcery J. Finley Hurley, 1985 *Geschiedenis van hekserij en tovenarij* Pseudoscience and the Paranormal Terence Hines, 2010-09-30 Television the movies and computer games fill the minds of their viewers with a daily staple of fantasy from tales of UFO landings haunted houses and communication with the dead to claims of miraculous cures by gifted healers or breakthrough treatments by means of fringe medicine The paranormal is so ubiquitous in one form of entertainment or another that many people easily lose sight of the distinction between the real and the imaginary or they never learn to make the distinction in the first place In this thorough review of pseudoscience and the paranormal in contemporary life psychologist Terence Hines teaches readers how to carefully evaluate all such claims in terms of scientific evidence Hines devotes separate chapters to psychics life after death parapsychology astrology UFOs ancient astronauts cosmic collisions and the Bermuda Triangle faith healing and more New to this second edition are extended sections on psychoanalysis and pseudopsychologies especially recovered memory therapy satanic ritual abuse facilitated communication

and other questionable psychotherapies There are also new chapters on alternative medicine which is now marketed in our drug stores and on environmental pseudoscience with special emphasis on the evidence that certain technologies like cell phones or environmental agents like asbestos cause cancer Finally Hines discusses the psychological causes for belief in the paranormal despite overwhelming evidence to the contrary This valuable highly interesting and completely accessible analysis critiques the whole range of current paranormal claims The Man Who Predicts Earthquakes Cal Orey,2006 Meet Jim Berkland a California geologist whose forecast of the famous October 17 1989 World Series Quake that rumbled through the San Francisco Bay Area was right on the money This is the first book to document a geologist s uncanny ability to foretell earthquakes around the world This facinating read includes stories of earthquake survivors a wealth of details about seismic activity in earthquake prone regions around the world Consciousness and Evolution James Christodoulides,2012-08-01 Understanding the nature of consciousness is the key to understanding the whole of reality It is not that mind has emerged from matter but rather that consciousness and matter are dual aspects of a much greater reality Beyond the simplistic notion of duality that is so entrenched in Western philosophies there is a deeper and more profound way to comprehend the nature of our existence We are parts within a wider whole We do not exist as separate beings within the Universe we are parts of the Universe itself The theory outlined in Consciousness and Evolution turns orthodox explanations for the evolution of mind upside down It is not matter that has created consciousness but rather it is consciousness that has moulded matter and created intelligent beings like ourselves In order to understand why we are here and to live our lives as fully as we might we must seek to address the issue at the very core of our being the existence of mind itself
