Placzek,1982 **The Idea of Building** Steven Groak,2002-09-11 This book is unique in its attempt to explore the many ways we have of thinking about buildings In particular it raises questions about the kinds of knowledge we have and will need in designing making and enjoying our buildings At the very least this book provides an overview of the fragmented construction industry making it a vital purchase for all construction related students However the author has written for a wider audience making the book an essential guide for those interested in the form of buildings or the deliberate ways in which people build them **The Routledge Handbook on the Reception of Classical Architecture** Nicholas Temple,Andrzej Piotrowski,Juan Manuel Heredia,2019-11-01 This is the first comprehensive study of the reception of classical architecture in different regions of the world Exploring the impact of colonialism trade slavery religious missions political ideology and intellectual artistic exchange the authors demonstrate how classical principles and ideas were disseminated and received across the globe By addressing a number of contentious or unresolved issues highlighted in some historical surveys of architecture the chapters presented in this volume question long held assumptions about the notion of a universally accepted classical tradition and its broadly Euro centric perspective Featuring thirty two chapters written by international scholars from China Europe Turkey North America Mexico Australia and New Zealand the book is divided into

four sections 1 Transmission and re conceptualisation of classical architecture 2 Classical influence through colonialism political ideology and religious conversion 3 Historiographical surveys of geographical regions and 4 Visual and textual discourses This fourfold arrangement of chapters provides a coherent structure to accommodate different perspectives of classical reception across the world and their geographical ethnographic ideological symbolic social and cultural contexts Essays cover a wide geography and include studies in Italy France England Scotland the Nordic countries Greece Austria Portugal Romania Germany Poland India Singapore China the USA Mexico Brazil New Zealand and Australia Other essays in the volume focus on thematic issues or topics pertaining to classical architecture such as ornament spolia humanism nature moderation decorum heresy and taste An essential reference guide The Routledge Handbook on the Reception of Classical Architecture makes a major contribution to the study of architectural history in a new global context **The Dissertation** Iain Borden, 2006-08-14 The Dissertation is one of the most demanding yet potentially most stimulating components of an architectural course Properly done it can be a valuable contribution not only to the students own learning development but also to the field of architecture as a whole This book provides a complete guide to what to do how to do it when to do it and the major pitfalls involved This is a comprehensive guide to all that an architecture student might need to know about undertaking the dissertation including new material on CD ROM and online sources web based research techniques digital images alternative imaging strategies key architecture links referencing and new dissertation extracts It clearly navigates the student through the whole process of writing preparing and submitting a dissertation as well as suggesting what to do after the dissertation has been completed Subjects covered include how to write a proposal which research methodologies and techniques to adopt which libraries and archives to utilize including special architectural resources on the net as well as how to structure reference and illustrate the final submission The authors also take architecture students into new terrain suggesting alternative methods of undertaking dissertations whether as video prose writing multimedia or other forms of expression Furthermore this guide includes new examples of exemplary dissertations of all kinds as completed by students in Europe and North America so that the reader can clearly see the kinds of work which they themselves might choose to pursue Also in the Seriously Useful Guides Series The Crit The Portfolio Practical Experience □□□□□□□□□□, 2005 1400
