Living Earth R.E. Nisbet,2013-12-01 Life has shaped the Earth and the Earth has

moulded the history of life That history the co evolution of our ancestors and their home has much to teach us about our place on the planet today We are part of the fabric of the biosphere As we change that fabric we would be wise to understand how our home was built Our planet is neither a hotel nor a colony It is not a place which life briefly inhabits during a transient occupation Instead it is our home designed by the deeds of our ancestors and suited to our own needs The history of life on Earth is held in the geological record which is composed of the rocks water and air that are available for study on the planet's surface These rocks the oceans and the atmosphere are not simply stores of information for the excitement of fossil hunters and geochemists or resources to exploit without thought Their creation and continued existence form an integral part of the development and management of the Earth as the home of life *Music Lessons for a Living Planet* Daniel J. Shevock, Vincent C. Bates, 2024-08-16 This volume shows music educators how music teaching and learning can help address humanity's greatest challenge the ecological crisis It provides the essential background knowledge in ecomusicology from compositions about nature soundscape experiences activist songs to practical lesson ideas Motivated by the urgent need for increased ecological awareness and sustainable practices and the ecological aspects of music and musical aspects of ecosystems the book explores the powerful role that music educators can play in protecting and preserving the natural environment Each chapter includes a narrative and potential lesson ideas that include listening singing playing instruments moving and contextualizing with the goal of translating research in ecomusicological theory into a sustainable creative and critical music teaching practice Bridging the gap between recent scholarship and pedagogical work this book will be a valuable resource for educators P 12 classroom teachers and music specialists as well as in undergraduate music education methods courses

Ecopolis Paul F. Downton, 2008-11-19 From 2008 for the first time in human history half of the world's population now live in cities Yet despite a wealth of literature on green architecture and planning there is to date no single book which draws together theory from the full range of disciplines from architecture planning and ecology which we must come to grips with if we are to design future cities which are genuinely sustainable Paul Downton's *Ecopolis* takes a major step along this path It highlights the urgent need to understand the role of cities as both agents of change and means of survival at a time when climate change has finally grabbed world attention and it provides a framework for designing cities that integrates knowledge both academic and practical from a range of relevant disciplines Identifying key theorists practitioners places and philosophies the book provides a solid theoretical context which introduces the concept of urban fractals and goes on to present a series of design and planning tools for achieving Sustainable Human Ecological Development SHED Combining knowledge from diverse fields to present a synthesis of urban ecology the book will provide a valuable resource for students researchers and practitioners in architecture construction planning geography and the traditional life sciences

Earth, Our Living Planet Philippe Bertrand, 2021-04-21 Earth is to our knowledge the only life bearing body in the Solar System This extraordinary characteristic dates back almost 4 billion years How to explain that Earth is teeming with organisms and that this has lasted for so long What makes Earth different from its sister planets Mars and Venus The habitability of a planet is its capacity to allow the emergence of organisms What astronomical and geological conditions concurred to make Earth habitable 4 billion years ago and how has it remained habitable since What have been the respective roles of non biological

and biological characteristics in maintaining the habitability of Earth This unique book answers the above questions by considering the roles of organisms and ecosystems in the Earth System which is made of the non living and living components of the planet Organisms have progressively occupied all the habitats of the planet diversifying into countless life forms and developing enormous biomasses over the past 3.6 billion years In this way organisms and ecosystems took over the Earth System and thus became major agents in its regulation and global evolution There was co evolution of the different components of the Earth System leading to a number of feedback mechanisms that regulated long term Earth conditions For millennia and especially since the Industrial Revolution nearly 300 years ago humans have gradually transformed the Earth System Technological developments combined with the large increase in human population have led in recent decades to major changes in the Earth's climate soils biodiversity and quality of air and water After some successes in the 20th century at preventing internationally environmental disasters human societies are now facing major challenges arising from climate change Some of these challenges are short term and others concern the thousand year evolution of the Earth's climate Humans should become the stewards of Earth

Kong, Godzilla and the Living Earth Allen A. Debus, 2022-06-24 During the 2010s science fiction's immortal adversaries King Kong and Godzilla representing our conflicts per Carl Sagan's dream dragons analogy made comebacks in American cinema The blockbuster *Kaiju* resurged onto the screen depicting these protectors of an Earth plagued by mankind's hubris and folly With Earth's future hanging in the balance their climactic 2021 staging settled a score between the two giant monsters resolving Toho's classic 1963 film *King Kong vs Godzilla* As formidable creatures emerging from Time's Tomb on

Mother Earth metaphorical Kong and Godzilla are considered here in light of new millennial environmentalism's stark reality. This book nostalgic in tone explores the meaning of Kong and Godzilla as planetary saviors, titanic protectors of a theoretical living Earth Gaia defending the globe from a prehistoric plague of adversaries. *BBC Wildlife Documentaries in the Age of Attenborough* Jean-Baptiste Gouyon, 2019-09-13. This book explores the history of wildlife television in post-war Britain. It revolves around the role of David Attenborough whose career as a broadcaster and natural history filmmaker has shaped British wildlife television. The book discusses aspects of Attenborough's professional biography and also explores elements of the institutional history of the BBC from the early 1960s when it was at its most powerful to the 2000s when its future is uncertain. It focuses primarily on the wildlife making of documentary genre which is used to trace how television progressively became a participant in the production of knowledge about nature. With the inclusion of analysis of television programmes, first-hand accounts, BBC archival material and most notably interviews with David Attenborough, this volume follows the development of the professional culture of wildlife broadcasting as it has been portrayed in public. It will be of interest to wildlife television amateurs, historians of British television and students in science communication. *The Living Planet in Crisis* Joel Cracraft, Francesca Grifo, 1999.
