Nielsen, 2018 The Oxford Handbook of Disability History features twenty seven articles that span the diverse global history of the disabled from antiquity to today **Talking the Walk & Walking the Talk** Marc Shell, 2015-09-01 This book argues that we should regard walking and talking in a single rhythmic vision In doing so it contributes to the theory of prosody our understanding of respiration and looking and in sum to the particular links across the board between the human characteristics of bipedal walking and meaningful talk The author first introduces the philosophical neurological anthropological and aesthetic aspects of the subject in historical perspective then focuses on rhetoric and introduces a tension between the small and large issues of rhythm He thereupon turns his attention to the roles of breathing in poetry as a life and death matter with attention to beats and walking poems This opens onto technical concepts from the classical traditions of rhetoric and philology Turning to the relationship between prosody and motion he considers both animals and human beings as both ostensibly able bodied creatures and presumptively disabled ones Finally he looks at dancing and writing as aspects of walking and talking with special attention to motion in Arabic and Chinese calligraphy The final chapters of the book provide a series of interrelated representative case studies
