Age of Anxiety Anthony M. Wachs, Jon D. Schaff, 2019-11-29 Age of Anxiety Meaning Identity and Politics in 21st Century Film and Literature analyzes literature and films that speak to our age of anxiety resulting from the decline of narratives that

provided individuals with a meaningful human life The authors argue that the twentieth century sought to free individuals from the constraints of authoritative cultural traditions and institutions liberating the autonomous self Yet this has given rise to anxiety rather than liberation Instead of deriving one's sense of purpose from one's role and place within a community the consumer has been deceived into thinking that their identity can be purchased through the meaning represented by the conspicuous consumption of a brand The same phenomenon manifests itself in politics within recent populist revolts against globalist politics In addition the rapid pace of technological development is driving an unprecedented faith in the malleability of human beings raises doubts as to what it means to be a person Utilizing paradigms from the fields of Communication Rhetoric and Political Philosophy the book shows how the self has been displaced from its natural habitat of the local community The book traces the origins of modern anxiety as well as possible remedies Considered in the book are such popular culture artifacts as Downton Abbey WALL E HackSaw Ridge Westworld and Lord of the Rings and zombie films

Ellen,C. Thinus-Blanc,2012-12-06

These volumes represent the proceedings of NATO Advanced Study Institute on the topic of Cognitive Processes and Spatial Orientation in Animal and Man held at La Baume les Aix Aix en Provence France in June July 1985 The motivation underlying this Institute stemmed from the recent advances and interest in the problems of spatial behavior In Psychology traditional S R concepts were found to be unsatisfactory for fully accounting for the complexity of spatial behavior Coupled with the decline in such an approach has been a resurgence of interest in cognitive types of concepts In Ethology investigators have begun to use more sophisticated methods for the study of homing and navigational behaviors In the general area of Neuroscience marked advances have been achieved in the understanding of the neural mechanisms underlying spatial behaviors And finally there has been a burgeoning interest and body of knowledge concerning the development of spatial behavior in humans All of these factors combined to suggest the necessity of bringing together scientists working in these areas with the intent that such a meeting might lead to a cross fertilization of the various areas Possibly by providing a context in which members of the various disciplines could interact it was felt that we might increase the likelihood of identifying those similarities and differences in the concepts and methods common to all groups

Such an identification could provide the basis for a subsequent interdisciplinary research effort
