The Man Who Rode Sharks:

The Man who Rode Sharks William R. Royal, Robert Forrest Burgess, 1978 Secrets of the Springs Robin Brown, Scott Derks, 2020-12-01 This tale of two deep springs in Florida that began as sinkholes about 13 000 years ago and the story of the precious water they contained reveals the recent and prehistoric story of what is now the Sunshine State and the importance of its natural resources to its people The mineral charged spring water sustained Florida's earliest human populations roaming hunter gatherers who discovered the springs about 10 000 years ago and revisited them for thousands of years in dry times and preserved their bones and artifacts for thousands of years These dramatic tales based on the history of Florida's first people offer new perspectives on Florida's long history The second time period is recent and factual Often outrageously stranger than fiction it follows recent events in the history of the springs the remarkable people who dived in the deep water filled holes and put together the picture of human life ways 10 000 years ago at the end of the Pleistocene Era DNA analysis by world renown Svante Paabo revealed that these first Floridians were unrelated to the Native Americans living in North America today The Cave Divers Robert Forrest Burgess, 1999 Cave divers are the elite and this is their story a story of pushing the limits of technology and human endurance **The Art and Archaeology of Florida's**

Wetlands Barbara A. Purdy, 2017-12-06 Waterlogged archaeological sites in Florida contain tools art objects dietary items human skeletal remains and glimpses of past environments that do not survive the ravages of time at typical terrestrial sites Unfortunately archaeological wet sites are invisible since their preservation depends upon their entombment in oxygen free organic deposits As a result they are often destroyed accidentally during draining dredging and development projects These sites and the objects they contain are an important part of Florida's heritage They provide an opportunity to learn how the state's earliest residents used available resources to make their lives more comfortable and how they expressed themselves artistically Without the wood carvings from water saturated sites it would be easy to think of early Floridians as culturally impoverished because Florida does not have stone suitable for creating sculptures This book compiles in one volume detailed accounts of such famous sites as Key Marco Little Salt Spring Windover Ft Center and others The book discusses wet site environments and explains the kinds of physical chemical and structural components required to ensure that the proper conditions for site formation are present and prevail through time The book also talks about how to preserve artifacts that have been entombed in anaerobic deposits and the importance of classes of objects such as wooden carvings dietary items human skeletal remains to our better understanding of past cultures Until now this information has been scattered in obscure documents and articles thus diminishing its importance Our ancestors may not have been Indians but they contributed to the state's heritage for more than 10 000 years Once disturbed by ambitious dredging and draining projects their story is gone forever it cannot be transplanted to another location Women in ichthyology: an anthology in honour of ET, Ro and Genie E.K.
