The Mandate Of Heaven Marx And Mao In Modern China:

The mandate of heaven Nigel Harris, **Dialectical Materialism** Zedong Mao, Nick Knight, 2016-09-16 New and annotated translations of philosophical essays written by Mao Zedong in 1937 which have come to be regarded as a cornerstone in the development of Chinese Marxism The editor analyzes their textual philosophical and historical significance **The Myth of Mao Zedong and Modern Insurgency** Francis Grice, 2018-05-22 Tackling one of the most prevalent myths about insurgencies this book examines and rebuts the popular belief that Mao Zedong created a fundamentally new form of warfare that transformed the nature of modern insurgency The labeling of an insurgent enemy as using Maoist Warfare has been a common phenomenon since Mao's victory over the Guomindang in 1949 from Malaya and Vietnam during the Cold War to Afghanistan and Syria today Yet this practice is heavily flawed This book argues that Mao did not invent a new breed of insurgency failed to produce a coherent vision of how insurgencies should be fought and was not influential in his impact upon subsequent insurgencies Consequently Mao's writings cannot be used to generate meaningful insights for understanding those insurgencies that came after him This means that scholars and policymakers should stop using Mao as a tool for understanding insurgencies and as a straw man against whom to target counterinsurgency strategies Marx and Marxism Gregory Claeys, 2018-04-24 A new biography of Karl Marx tracing the life of this titanic figure and the legacy of his work Karl Marx remains the most influential and controversial political thinker in history He died quietly in 1883 and a mere eleven mourners attended his funeral but a year later he was being hailed as the Prophet himself whose name and writings would endure through the ages He has been viewed as a philosopher economist historian sociologist political theorist even a literary craftsman But who was Marx What informed his critiques of modern society And how are we to understand his legacy In *Marx and Marxism* Gregory Claeys a leading historian of socialism offers a wide ranging accessible account of Marx's ideas and their development from the nineteenth century through the Russian Revolution to the present After the collapse of the Soviet Union his reputation seemed utterly eclipsed but now a new generation is reading and discovering Marx in the wake of the recurrent financial crises growing social inequality and an increasing sense of the injustice and destructiveness of capitalism Both his critique of capitalism and his vision of the future speak across the centuries to our times even if the questions he poses are more difficult to answer than ever Marxism, China, and Development A. James Gregor, 2017-07-05 China has always been something of a mystery to Westerners For one generation Mao Zedong and his followers were simple agrarian reformers while for another they were the communist emperor and his blue ants In the 1970s some of the finest Sinologists believed there was much the United States could learn from Mao's Great Proletarian Cultural Revolution with regard to bureaucracy criminal justice health care and mass education By the 1980s those same theorists asserted that Maoism was nothing more than a feudal fascism and had absolutely nothing positive to teach Marxism China and Development provides a plausible explanation of these

developments that have had such a powerful effect on the people of China for the past half century The author describes and explains the strange collection of beliefs that made up the Marxism of Mao Zedong He seeks to understand why the communist leadership of China like that of the USSR tried to spur economic growth by abandoning the market modalities common to developed economies A James Gregor's conceptual framework is both original and makes more comprehensible the history of Marxism and the history of China Among the major topics he covers are imperialism political democracy economics and alternatives to Maoism and Marxism for China While it is unlikely that our understanding of so complex a series of events as modern Chinese history will soon become less controversial Marxism China and Development's clear concise explanations will clarify some perplexing areas and make the new turns in Chinese political economy more understandable This is a monumental effort at theory construction that will be of interest to political scientists economists sociologists and Sinologists

The Critique of Ultra-Leftism in China, 1958-1981, 1984-08 The Chinese political system has undergone a profound transformation since the death of Mao Zedong in 1976 and nowhere is this more evident than in the effort to exorcise the influence of the ultra Leftism that is alleged by the current Chinese leadership to have characterized much of the last two decades of the Maoist era The author places the post Mao assault on radicalism into the historical and ideological perspectives of earlier critiques of ultra Leftism within the Marxist tradition and the Chinese Communist Party He traces the evolution of the critique in the writings of Marx Engels Lenin and Mao and carefully examines three anti Leftist criticism and rectification campaigns in recent Chinese history the retreat from the Great Leap Forward of 1958-61 the campaign against Swindlers like Liu Shaoqi carried out in 1971-73 after the death of Lin Biao and the criticism of the Gang of Four following their purge in 1976 These cases are analyzed in terms of both the political conflict surrounding each campaign and the ideological issues raised by the critique of ultra Leftism Understanding the nature and extent of the critique of ultra Leftism helps to clarify the ideological world in which the Chinese leaders operate to explain some of the most perplexing events in the history of the People's Republic and to assess the changes that continue to shape the political environment of post Mao China

Radical Challenges to the Family Dr Ashley Lavelle, 2015-11-28 Drawing on archival research in the US UK and Australia the author asks what the emergence of same sex marriage movements and legislation mean for challenges to the nuclear family in the light of an original general hostility to marriage and family structures in the gay liberation movement whilst considering the extent to which the nuclear family might be included in the list of social and economic institutions subject to criticism on the part of more recent anti capitalist movements such as Occupy A detailed study of the extent to which the nuclear family remains susceptible to the radical critiques of the last century Radical Challenges to the Family

examines whether the original challenges shed light on ensuring social problems including domestic violence child abuse homophobia and growing marital dissatisfaction **Routledge Handbook on the Green New Deal** Kyla Tienhaara, Joanna Robinson, 2022-08-26 In recent years the Green New Deal has moved from relative obscurity to front and centre of policy discussions and public debates about how to respond to the climate crisis It has been credited with radically changing the nature of the conversation on climate change and with re energizing the environmental movement at a critical time All Green New Deal proposals share an emphasis on the need for governments rather than markets to lead the energy transition However they differ in other respects This Handbook analyses the fundamentals underlying all Green New Deals as well as exploring national and regional variations It is divided into three parts The first part examines the political economy of the Green New Deal focussing not just on how proposals will be costed but also on opportunities for a fundamental transformation of both national economies and the global economic system The second part explores issues of justice which are central to many Green New Deal proposals including Indigenous rights racial and gender equity and justice for the Global South In the third part authors detail case studies of Green New Deal proposals and plans at the local national and regional level This book will be an invaluable research and reference volume for students and scholars in economics politics sociology geography and environmental studies It should also be of interest to those actively involved in climate and environmental policymaking **The politics of betrayal** Ashley Lavelle, 2015-11-01 The radical who becomes a conservative is a common theme in political history Benito Mussolini the Italian socialist who became a fascist is the best known example but there have been many others including the numerous American Trotskyists and Marxists who later became neo conservatives anti communists or in some instances McCarthyists The politics of betrayal examines why several one time radicals subsequently became part of the establishment in various countries including the former Black Panther Party leader turned Republican Eldridge Cleaver the Australian communist Adela Pankhurst who became an admirer of the Nazis and the ex radical journalist Christopher Hitchens whose defection to the neo conservative camp of George W Bush s administration following 11 September 2001 offers one of the most surprising instances of the phenomenon in recent times How and why do so many radicals betray the cause What implications does it have for left politics Were the ex radicals right to become conservatives This book the first of its kind answers these and more questions Radical Challenges to the Family Ashley Lavelle, 2016-03-03 Defending the nuclear family and extolling family values have long been central features of politics in capitalist societies in spite of radical left challenges from social counter cultural and gay rights movements This book examines these challenges as they emerged in the 1960s and 1970s re appraising their relevance in the light of recent developments including the spread of more diverse family forms and the rise of the same sex marriage movement Drawing on archival research in the US UK and Australia the author asks what the emergence of same sex marriage movements and legislation mean for challenges to the nuclear family in the light of an original general hostility to marriage and family

structures in the gay liberation movement whilst considering the extent to which the nuclear family might be included in the list of social and economic institutions subject to criticism on the part of more recent anti capitalist movements such as Occupy A detailed study of the extent to which the nuclear family remains susceptible to the radical critiques of the last century *Radical Challenges to the Family* examines whether the original challenges shed light on ensuring social problems including domestic violence child abuse homophobia and growing marital dissatisfaction As such it will appeal to scholars of sociology and politics with interests in gender and sexuality the sociology of the family and feminist thought **The Geography of the World Economy 5th Edition** Paul Knox, John Agnew, Linda McCarthy, 2014-04-04 The *Geography of the World Economy* provides an in depth introduction to the globalization of the world economy and discusses local regional national and global economic development over the course of history This new edition is fully revised and in colour The Struggle for Development Benjamin Selwyn, 2018-03-02 The world economy is expanding rapidly despite chronic economic crises Yet the majority of the world's population live in poverty Why are wealth and poverty two sides of the coin of capitalist development What can be done to overcome this destructive dynamic In this hard hitting analysis Benjamin Selwyn shows how capitalism generates widespread poverty gender discrimination and environmental destruction He debunks the World Bank's dollar a day methodology for calculating poverty arguing that the proliferation of global supply chains is based on the labour of impoverished women workers and environmental ruin Development theories from neoliberal to statist and Marxist are revealed as justifying and promoting labouring class exploitation despite their pro poor rhetoric Selwyn also offers an alternative in the form of labour led development which shows how collective actions by labouring classes whether South African shack dwellers and miners East Asian and Indian Industrial workers or Latin American landless labourers and unemployed workers can and do generate new forms of human development This labour led struggle for development can empower even the poorest nations to overcome many of the obstacles that block their way to more prosperous and equitable lives *Selected Essays of Nigel Harris* Nigel Harris, 2017-10-02 Nigel Harris's *Selected Essays* From National Liberation to Globalisation presents an encompassing overview of the work of one of the most prolific and insightful Marxist economists of the second half of the twentieth century It starts off with a new interview in which Harris reflects on the development of his thought over the more than half a century separating the death of Stalin from the latest developments in globalisation and capitalist restructuring The collected essays deal with topics ranging from imperialism and the state to the political economy of development and migration and offer an ample selection from Harris's political journalism Together the work constitutes at once a personal journey through the history of the British revolutionary left and a trenchant commentary on some of the most fundamental problems facing a renewed Marxist theory Class, States and International Relations Adrian Budd, 2013-06-19 This book provides an outline and a critique of neo Gramscian international relations theory from a Marxist perspective Focusing on the pioneering work of Robert Cox but also drawing on the wider neo Gramscian literature this book

presents a comprehensive account of neo Gramscian international relations theory It highlights the neo Gramscian critique of mainstream Realist theory and the theoretical innovations that resulted from the mobilisation of Gramsci s ideas and Cox s emphasis on the social forces underpinning forms of state and world orders The author explains how this is especially relevant in the current period of war and crisis when the international dimensions of social existence continue to exercise a major influence over domestic politics and economics and when the interest in Marxism can be expected to grow The book continues to provide a critique of the neo Gramscians and of what the author argues is their one sided reading of Gramsci Placing coercion at the centre of a mode of production analysis of world order the author elaborates a Marxist alternative to neo Gramscianism that provides more robust explanations of world order dynamics and change Using a combination of IR theory and historical explanation including of contemporary world order dynamics and US power this book will appeal to both students and scholars of International Relations international studies and international history *The Return of Cosmopolitan Capital* Nigel Harris,2003-02-21 The history of the 20th century was dominated by the state nationalism national economies national wars Professor Nigel Harris argues that such a global structure is unthinkable in the 21st century Why As the world opens up and barriers between countries come crashing down so the powers of nations nationalisms and the state have begun to dissolve He argues that the notion of national capital is becoming redundant as cities and their citizens increasingly unaffected by borders and national boundaries take centre stage in the economic world Harris deconstructs this phenomenon and argues for the immense benefits it could and should have not just for western wealth but for economies worldwide for international communication and for global democracy *The Comintern* Duncan Hallas,2016-12-05 The Comintern from its years as a school of strategy and tactics to its Stalinist demise *Communism in the 21st Century* Shannon Kurt Brincat,2013-12-12 A compelling three volume exploration of the philosophical social and political facets of the theory and practice of communism within the conditions of 21st century world politics and late capitalism The world has changed significantly and so has communism This groundbreaking three volume series comprises contributions from over 30 experts that thoroughly address the past present and future of communism The entries assess the modern re articulation of the notion of communism and its potential emergence against the backdrop of recent historical conditions and contemporary world politics taking into account the ongoing global financial crisis recent revolutions throughout the Middle East Occupy protest events and anti globalization movements The first volume reexamines Marx s ideas from many distinct viewpoints while the second volume considers the numerous challenges facing existing communist parties including those in China Cuba North Korea and Vietnam The last volume explores the future of communist thought and practice in the context of the modern world and the recurrent crises of capitalism **A Radical History of the World** Neil Faulkner,2018-09-20 History is a weapon The powerful have their version of events the people have another And if we understand how the past was forged we arm ourselves to change the future This is a history of struggle revolution and social

change of hominids hunters and herders of emperors and slaves of patriarchs and women of rich and poor of dictators and revolutionaries From the ancient empires of Persia and Rome to the Russian Revolution the Vietnam War and the 2008 Crash this is a history of greed and violence but also of solidarity and resistance Many times in the past a different society became an absolute necessity Humans have always struggled to create a better life This history proves that we the many have the power to change the world
