Situated Ethics In Educational Research:

Situated Ethics in Educational Research Helen Simons, Robin Usher, 2000 Develops the notion of situated ethics and looks into how ethical issues are practically handled by educational researchers in the field Situated Ethics in Educational Research Helen Simons, Robin Usher, 2012-11-12 Ethics has traditionally been seen as a set of general principles which can be applied in a range of situations This book argues that in fact ethical principles must be shaped within different research practices and hence take on different significances according to varying research situations The book develops the notion of situated ethics and explores how ethical issues are practically handled by educational researchers in the field Contributors present theoretical models and practical examples of what situated ethics involves in conducting research on specific areas The SAGE Handbook of Evaluation Ian Shaw, Jennifer C Greene, Melvin M Mark, 2006-07-10 This handbook thoroughly covers all aspects of evaluation yet isn't too technical to understand It offers everything an organization needs to know to get the most out of evaluation Nonprofit World The Handbook succeeds in capturing and presenting evaluation's extensive knowledge base within a global context In so doing it provides a useful coherent and definitive benchmark on the field's diverse and dynamic purposes practices theories approaches issues and challenges for the 21st century The Handbook is an essential reference and map for any serious evaluation practitioner scholar and student anywhere in the world Michael Quinn Patton author of Utilization Focused Evaluation Readers of this volume will find a set of texts that provide an evocative overview of contemporary thinking in the world of evaluation This is not a book of simple tips It does justice to the complex realities of evaluation practice by bringing together some of the best practitioners in the world to reflect on its current state It is theoretically sophisticated yet eminently readable anchored in evaluation as it is undertaken in a variety of domains It is the kind of book that startles a little and makes you think I highly recommend it Murray Saunders University of Lancaster In this comprehensive handbook an examination of the complexities of contemporary evaluation contributes to the ongoing dialogue that arises in professional efforts to evaluate people related programs policies and practices The SAGE Handbook of Evaluation is a unique and authoritative resource consisting of 25 chapters covering a range of evaluation theories and techniques in a single accessible volume With contributions from world leading figures in their fields overseen by an eminent international editorial board this handbook is an extensive and user friendly resource organised in four coherent sections Role and Purpose of Evaluation in Society Evaluation as a Social Practice The Practice of Evaluation Domains of Evaluation Practice The Handbook of Evaluation is written for practicing evaluators academics advanced postgraduate students and evaluation clients and offers a definitive benchmark statement on evaluation theory and practice for the first decades of the 21st century **Ethics and Academic Freedom in Educational Research** Pat Sikes, Heather Piper, 2013-12-16 Formal ethical review of research proposals is now almost the default requirement for all staff and students planning research under the auspices of colleges and universities in many parts of the world With notable exceptions the extant literature discussing

educational research ethics takes a meta ethical overview is negatively critical about the ethics review process per se or comes from America and focuses specifically on the workings of the Institutional Review Boards IRBs there This book however contains stories of lived experience from the UK Spain New Zealand Bangladesh and Australia dealing with inter alia dissatisfactions with criteria against which research proposals and designs and by extension researchers themselves are judged to be ethical problems encountered in obtaining ethical clearance changes which have had to be made to plans which are believed to have affected the ensuing research process and outcomes cases where ethical issues and difficulties arose and required considered responses despite permission to undertake the research in question being granted and benefits perceived to accrue from ethical review procedures Ethics and Academic Freedom in Educational Research will be of interest to researchers students members of ethics review boards and those teaching research ethics primarily at postgraduate but also at undergraduate level This book was originally published as a special issue of the International Journal of Research and Method in Education

Ethics and Research in Inclusive Education Melanie Nind,Jonathan Rix,Kieron Sheehy,Katy Simmons,2014-01-02 The recent move towards inclusive education has radically influenced the way educational research is conducted Students need to become aware of the critical legal and ethical responsibilities that arise from investigation in this new and expanding area Written from the standpoint of inclusive education rather than special education this carefully edited collection of readings from a wide variety of sources will develop the student s ability to identify and respond to ethical dilemmas that occur within their particular research methodologies and settings respond appropriately to the myriad of complex legal issues that are pertinent to their own work The contributions to this book draw upon examples of inclusive practices from around the world Students taking postgraduate courses or diplomas in Inclusive education will find this an invaluable read

Ethical Dilemmas in Education: Considering Challenges and Risks in Practice Carol Brown, Mary Wild, 2022-11-07

Ethical Dilemmas in Educational Research is a valuable resource for both researchers and supervisors. Having myself sat on a university ethics committee, I appreciate not only the considerations needed when approving applications but also the controversy around what could be viewed as undue restrictions on research. The real life and hypothetical dilemmas presented in this book should help guide researchers towards effective but ethically sensitive designs. Dr Katy Smart, CPsychol AFBPsS, Department of Psychiatry, University of Oxford, UK. Ethical Dilemmas in Educational Research is an invaluable guide for educational researchers around the world, helping to develop best practices and make informed decisions. This book demonstrates how a careful balance must be struck between the needs of participants, increasing regulatory guidelines, and the academic freedom of the educational researcher. The authors discuss an array of issues arising in the field of educational research, including ethical dilemmas in action, issues of agency and privacy, and researcher reflexivity. With a foreword by Professor Ian Menter, this book goes beyond the guidelines and focuses on the specific dilemmas that educational researchers face, illustrated with real life and inclusive examples. The book focuses on the resolution of ethical dilemmas in educational research and not just the dilemmas themselves. It highlights the role of committees and guidelines with an emphasis on misunderstandings and common purposes. It is written by academics from differing theoretical and methodological perspectives and disciplines across the spectrum of educational research. It presents specific dilemmas encountered during research in the early years, schools, and universities. The authors use these ideas to build on the foundations of an ethical approach and find new ways of working together and learning from one another to ensure best practice in the educational research field and forge a more united forward path. Carol Brown is a Senior Lecturer in Psychology and Education, Faculty Research Ethics Officer at Oxford Brookes University, UK. Mary Wild is Professor in Education and former Head of the School of Education at Oxford Brookes University, UK.

Introduction to Research

Methods in Education Keith F Punch, Alis Oancea, 2014-11-10. Based on Keith Punch's bestselling Introduction to Social Research Methods, this book introduces the research process in a range of educational contexts. In this updated second edition, you will find guidance on every stage of research, with chapters on developing research questions, doing a literature review, collecting data, analysing your findings, and writing it all up. With a new chapter on ethics and additional coverage of Internet research and mixing methods, the second edition contains everything you will need if you are studying on a research methods course or doing a research project for yourself. Introduction to Research Methods in Education provides you with balanced coverage of the range of methods employed by educational researchers. Practical advice on collecting and analysing qualitative, quantitative, and mixed methods data. A range of examples from student projects to show how research is done in real life educational settings. A companion website with additional resources for lecturers and students. Keith F Punch is Emeritus Professor in the Graduate School of Education at The University of Western Australia. Alis Oancea is Professor of

Undoing Ethics Natasha Whiteman, 2012-01-07 Over the past decade researchers from different academic disciplines have paid increasing attention to the productivity of online environments The ethical underpinnings of research in such settings however remain contested and often controversial As traditional debates have been reignited by the need to respond to the particular characteristics of technologically mediated environments researchers have entered anew key debates regarding the moral legal and regulative aspects of research ethics A growing trend in this work has been towards the promotion of localized and contextualized research ethics the suggestion that the decisions we make should be informed by the nature of the environments we study and the habits expectations of participants within them Despite such moves the relationship between the empirical theoretical and methodological aspects of Internet research ethics remains underexplored Drawing from ongoing sociological research into the practices of media cultures online this book provides a timely and distinctive response to this need This book explores the relationship between the production of ethical stances in two different contexts the ethical manoeuvring of participants

within online media fan communities and the ethical decision making of the author as Internet researcher manoeuvring as it were in the academic community In doing so the book outlines a reflexive framework for exploring research ethics at different levels of analysis the empirical settings of research the theoretical perspectives which inform the researcher s objectification of the research settings and the methodological issues and practical decisions that constitute the activity as research The analysis of these different levels develops a way of thinking about ethical practice in terms of stabilizing and destabilizing moves within and between research and researched communities The analysis emphasizes the continuities and discontinuities between both research practice and online media fan activity and social activity in on and offline environments

Proceedings of the International Conference on Education Research Reza Hosseini, **Doing Research in Special Education** Richard Rose, Ian Grosvenor, 2013-10-23 This book incorporates an international perspective of research related to special education across all phases of education It draws upon the experience and expertise of recognized researchers and practitioners in special education As a research handbook for practicing teachers this book provides exemplars of good classroom based research practice addressing a broad range of special needs issues Methods are presented which can be generalized to situations beyond the case studies immediately presented

Action Research in Teaching and Learning Lin Norton, 2009-05-07 A practical down to earth guide for those who work in teaching and learning in universities this book will be indispensable reading for those who would like to carry out action research on their own practice Lin S Norton s concept of pedagogical action research has come from over twenty years experience of carrying out such research and more than six years of encouraging colleagues to carry out small scale studies at an institutional national and international level This accessible text illustrates what might be done to improve teaching supporting learning by carrying out action research to address such questions such as What can I do to enthuse my students What can I do to help students become more analytical How can I help students to link theory with their practice What can I do to make my lecturing style more accessible What is going wrong in my seminars when my students don t speak Action Research for Teaching and Learning offers readers practical advice on how to research their own practice in a higher education context It has been written specifically to take the reader through each stage of the action research process with the ultimate goal of producing a research study which is publishable Cognisant of the sector s view on what is perceived to be mainstream research the author has also written a substantial theoretical section which justifies the place of pedagogical action research in relation to reflective practice and the scholarship of teaching and learning
