Skills In Neighborhood Work:

Skills in Neighbourhood Work Paul Henderson, David N. Thomas, 2012-11-27 Skills in Neighbourhood Work is a practice textbook. It explains the skills, knowledge and techniques needed by community workers and other practitioners to work effectively in and with communities. While the principles and methods it describes have stood the test of time, the political, economic and social changes which have taken place since the book was first published have made new editions essential. Rewritten and updated and including new practice examples, the fourth edition retains all the practical information needed by the student or practitioner but sets it in the contemporary context. Including a European perspective and views from America and Australia, it covers starting, supporting and ending work with community groups, evaluation, data collection, goals and priorities, making contacts, group work, helping groups work with other organisations. This invaluable textbook is essential reading for students and practitioners of community work.

Social Work Skills for Community Practice

Mary-Ellen Brown, Katie Stalker, 2022-11-10 Focuses on skill building to facilitate positive social change. With straightforward content enriched by practical and applicable learning experiences, this comprehensive text prepares social work students for careers in community organizing and macro practice. It focuses on building the social work skills required for organizing communities, including cause-based coalitions, geographically identity-based communities, and health and human service organizations to achieve culturally relevant equity and justice-driven social change. The second edition presents new information that includes self-care for the community practitioner, social work grand challenges, cultural humility, community dialogue, trauma-informed and resiliency-focused community development, environmental justice, and many other topics. Emphasizing community practice through the application of macro, mezzo, and micro social work skills, the book uses frameworks drawn from generalist social work practice as well as core competencies identified by CSWE's EPAS. Its focus on a broad range of community practice models makes it accessible to all social workers. The text also highlights the importance of technology as a tool for social work macro practice with skill-building activities. Vivid case vignettes, applied and experiential learning activities, and team and individual-based assignments reinforce content and emphasize skill building along with abundant resources for further learning. New to the Second Edition: Presents a framework for self-care for the community practitioner; Highlights the importance of community practitioner readiness, competency, and leadership; Introduces a new trauma-informed and resiliency-focused approach for community development; Discusses strategic compatibility for interorganizational collaboration; Introduces youth-based participatory research and empowerment evaluations. Key Features: Focuses on skill building for community engagement and organizing, facilitating community dialogue, and conducting assessments; Covers planning and implementing community change initiatives and evaluating and disseminating knowledge from change activities; Provides case vignettes to reinforce content and abundant resources for additional learning; Offers a complete ancillary package that includes chapter PowerPoints, Test Bank, and an Instructor's

Beskrivelse af hvad community work er s vel teori som praksis *Neighborhood Networks for Humane Mental Health Care* Arthur J. Naparstek, David E. Biegel, Herzl R. Spiro, 2012-12-06 It is hard to think of a more timely and topical major contribution than Drs Naparstek Biegel Spiro and collaborators have provided in this volume Their penetrating comprehensive study and field tests give us mapping toward the goal of reifying the concept of community as applied to human services The book will prove invaluable to those at the policy level legislators planners and administrators It will serve as an essential reference for community workers professional providers natural helpers and citizens as a whole A salient ideal of New Federalism placing governance as close to the people as practicable seems a prophetic match with the model of Neighborhood Empowerment As the authors point out conventional wisdom has seemed to offer government regulation control and program evaluation as a panacea package for improving human services This work suggests a radically different approach specifically a shift to greater instrumental involvement of the richly variegated mosaic of American neighborhoods combined with a system of excellent high technology service agencies Certainly genuine efforts have been made before toward a true linkage of the community with human services The Great Society programs with their emphasis on citizen
