Global Consumption 1500-1800 is the perfect guide for all students interested in the social, cultural, and economic history of the early modern period. **Tobacco in Global Perspective, 1780-1960** Alexander van Wickeren, Jean Stubbs, William Gervase Clarence-Smith, 2024-12-24. This edited collection provides an in-depth analysis of the imperial, colonial, and postcolonial history of tobacco from 1780 to 1960, which was one of the major periods of change in the global tobacco economy. It brings together case studies from known and lesser-known tobacco regions of the world to interrogate tobacco's second globalisation, a concept little employed by historians thus far but one which encapsulates tobacco's central role in Europe's imperial expansion beyond the Atlantic and the social, political, and cultural transformations of global capitalism taking place during the period. The collection fills a gap in the study of commodities of empire, which has examined tobacco primarily for the early modern Atlantic world or for single empires during the later period. It invites comparison across borders encompassing political, economic, and sociocultural history and with a particular emphasis on trade, knowledge, and labour. Juxtaposes micro-histories with a macro-historical perspective. Together, the studies in the volume testify to the importance of tobacco in new places and among new players challenging the confines of national and imperial historiographical frameworks. They demonstrate the rising dominance of new powerful forces, including transnational corporations, but also a wide range of actors in conflict and negotiation within territorial and imperial confines. By systematically taking into account the agency in Europe's apparent peripheries and the Global South, they critique a simple assumption of the dominance of the West. **Smoking Geographies** Ross Barnett, Graham Moon, Jamie Pearce, Lee Thompson, Liz Twigg, 2017-03-13. Smoking Geographies provides a research-led assessment of the impact of geographical factors on smoking. The contributors uncover how geography can show us not only why people smoke but also broader issues of tobacco control, providing deeper clarity on how smoking and tobacco is governed. The text centres on one of the most important public health issues worldwide and a major determinant of preventable mortality and morbidity in developed and developing countries. Records the outcomes of a long-term research collaboration that brings a geographical lens to smoking behaviour. Uncovers how geography can play a part in understanding not only why people smoke but also broader issues of tobacco control. Provides a deeper understanding of how smoking and tobacco is governed regarding where people may smoke but also more subtle governance as a climate is produced in which smoking becomes denormalised. Brings both quantitative and qualitative perspectives to bear on this major source of mortality and morbidity. *All Facts Considered*
