Evolution of Scenario Planning George Burt, 2023-10-24 Scenario planning is a long and well established approach to help leaders create novel insights and challenge what they know of the world to influence future action But as the world becomes increasingly unpredictable leaders must question the traditional mode of analysing the contextual environment and adopt new capabilities to embrace change while they redefine and reframe their organisation for the future The Evolution of Scenario Planning explores the pervasive nature of change It provides a contemporary approach to using scenarios as strategic conversation to embrace experiences past and present to create novel understanding and insights The book uses case studies and practical examples to guide facilitators in applying the scenario process in their organisation Leaders senior managers consultants and academics will learn how to engage with scenarios as a central element of strategy and better understand their role in strategic leadership They will also gain insight into the skills and capabilities revealed during the process of strategic conversation where ambiguity and equivocality is a natural feature of such conversation The Evolution of Scenario Planning makes a compelling case for using scenarios to enable leaders to develop foresight and attunement to grasp the ongoing dynamic of their uncertain and ambiguous world **Electronic Government** Roland

Trautmüller, 2012-02-02 The EGOV Conference Series intends to assess the state of the art in e Government and to provide guidance for research and development in this fast moving field The annual conferences bring together leading research experts and professionals from all over the globe Thus EGOV 2003 in Prague built on the achievements of the 1st EGOV Conference Aix en Provence 2002 which provided an illustrative overview of e Government activities This year the interest even increased nearly 100 contributions and authors coming from 34 countries In this way EGOV Conference 2003 was a reunion for professionals from all over the globe EGOV 2003 brought some changes in the outline and structure of the conference In line with the broadening of the field and a growing number of missions it became necessary to decentralize the

reviewing process So reviewing was done via stream chairs who deserve high praise for their dedicated work In addition a workshop part was included to cover some subjects of emerging significance such as dissemination networking and regional developments Further a subtitle of the conference was chosen that would mirror the expansion of e Government to e Governance Consequently in this year's conference governance democratic deliberation and legal issues occupied a growing share Last but not least GIS was incorporated as a topic due to the increasing importance of geographical information systems for planning and operations

Scenarios Kees van der Heijden, 2011-03-10 Scenario planning allows companies to move away from linear thinking and better understand external change Eight years and 30 000 copies after publication Scenarios is still acknowledged as the definitive work in the field Now Kees van der Heijden brings his bestseller up to date following up on his original case studies and adding significant new material The Second Edition changes focus slightly by providing more in depth analysis and application of the concept of the strategic conversation While maintaining the underlying rigour of the first edition van der Heijden revisits the text to make it far more practical and accessible and in doing so gives you the tools you need to set out and negotiate a successful future course for your organization in the face of significant uncertainty
