*The Sky Above and the Mud Below* David Sobel, 2020-09-15 David Sobel's follow up to *Nature Preschools and Forest Kindergartens* walks readers through the nitty gritty facts of running a nature based program. Organized around nine themes each chapter begins with an overview from the author followed by case studies from diverse early childhood programs ranging from those that serve at risk children to public preschools to university farm programs to Waldorf schools. Sample newsletters in each chapter show how real programs have tackled tough questions and sticky situations. The programs featured in these newsletters are from across the United States: Maryland, New York, Massachusetts, Wisconsin, Alabama, Connecticut, Illinois, Vermont, California, Michigan, Rhode Island, Louisiana, and Indiana.

**Instruction für die Vorbereitungs-Behörde der Conscription ([zu] Steinbach [Baden]).**, 1826 *A Mirror in the Roadway* Morris

Dickstein, 2005 In this collection of essays Morris Dickstein focuses on the rich interchange of ideas between writers such as Kafka, Celine, Carver, Bellow, Kennedy and the world around them: the lives that formed them, the places they write about, the social changes they make indelibly real to us.

**Looking with Robert Gardner** Rebecca Meyers, William Rothman, Charles Warren, 2016-08-01 Assesses the range and magnitude of Robert Gardner's achievements as a filmmaker, photographer, writer, educator, and champion of independent cinema. During his lifetime Robert Gardner (1925-2014) was often pigeonholed as an ethnographic filmmaker, then criticized for failing to conform to the genre's conventions. Conventions he radically challenged. With the release of his groundbreaking film *Dead Birds* in 1963, Gardner established himself as one of the world's most extraordinary independent filmmakers working in a unique border area between ethnography, the essay film, and poetic experimental cinema. Richly illustrated, *Looking with Robert Gardner* assesses the range and magnitude of Gardner's achievements not only as a filmmaker but also as a still photographer, writer, educator, and champion of independent cinema. The contributors give critical attention to Gardner's most ambitious films such as *Dead Birds* (1963), *New Guinea Rivers* (1965), *Sand* (1975), *Ethiopia* (1975), *Forest of Bliss* (1986), *India* (1986), as well as lesser known films that equally exemplify his mode of seeking anthropological understanding through artistic means. They also attend to his films about artists, including his self-depiction in *Still Journey On* (2011), to his roots in experimental film and his employment of experimental procedures, and to his support of independent filmmakers through the Harvard Film Study Center and the television series *Screening Room*, which provided an opportunity for numerous important film and video artists to present and discuss their work. This book is a monumental, fearless, and insightful contribution of critique that looks both with and at Gardner's works as a whole.

Catherine Summerhayes, author of *Google Earth Outreach and Activism*, *Looking with Robert Gardner* introduces new and exciting voices into the dialogue about the renowned ethnographic and documentary filmmaker. The book contains very close readings of many of his films and suggests fresh approaches for analyzing those as well as ethnographic films in general. Ilisa Barbash, coeditor of *The Cinema of Robert Gardner*.

*Childhood and Nature* David Sobel, 2025-03-15 *Childhood and Nature* is a

guide for educators looking to foster in their students a love of nature as well as an understanding of complex environmental issues This second edition brings new material and fresh insights to David Sobel s foundational exploration of place based education Sobel articulates seven design principles that teachers can use to build learning experiences adventure fantasy and imagination animal allies maps and paths special places small worlds and hunting and gathering Pulling from recurrent play themes and real world examples from educators Sobel details placed based projects and lessons for each principle Students learn and develop vital skills through engagement with their local environments and communities Miniature ecosystems in the small world of a sandbox for example can help children grasp larger abstract ideas A timely and actionable resource Childhood and Nature shows how centering the world around us in education can create a generation of nature students explorers and protectors
