Sleepwalkers A History Of Mans Changing:

The Sleepwalkers Arthur Koestler, 2003-01-01 *The Sleep Walkers* Arthur Koestler, 1959 *The Sleepwalker* Arthur Koestler, 1968 **How Christianity Changed the World** Alvin J. Schmidt, 2009-12-15 Western civilization is becoming increasingly pluralistic secularized and biblically illiterate Many people today have little sense of how their lives have benefited from Christianity's influence often viewing the church with hostility or resentment How Christianity Changed the World is a topically arranged Christian history for Christians and non Christians Grounded in solid research and written in a popular style this book is both a helpful apologetic tool in talking with unbelievers and a source of evidence for why Christianity deserves credit for many of the humane social scientific and cultural advances in the Western world in the last two thousand years Photographs timelines and charts enhance each chapter This edition features questions for reflection and discussion for each chapter *Science and Technology in World History* James Edward McClellan, Harold Dorn, 2006-04-14 Publisher description *The Night Sky, Updated and Expanded Edition* Richard Grossinger, 2014-09-30 Ever since Homo sapiens first looked up at the stars we as a species have been looking for meaning in the mysteries of the night sky Over the millennia as our knowledge science and technology developed the stories we told ourselves about the universe and our place in it developed as well In *The Night Sky* Richard Grossinger traces those developments covering multiple aspects of humanity's complex relationship to the cosmos Covering not only astronomy but also cosmology cosmogony astrology and science fiction he offers us a revelatory look at the firmament through his own telescope fitted with an anthropological lens Throughout his explorations Grossinger continually reflects on the deeper meaning of our changing concepts about the universe and creation offering insight into how each new discovery causes us to redefine the values moralities and aesthetics by which we live He also calls into question the self aggrandizing notion that humanity can and will conquer all and injects our strident confidence in science with a healthy dose of humility and wonder Filled with poetic observation and profound questions *The Night Sky* is a brilliant reflection of humanity's relationship with the cosmos a relationship fed by longing doubt and awe **Penguin Modern Classics the Sleepwalkers** Arthur Koestler, 2014-09-30 Arthur Koestler's extraordinary history of humanity's changing vision of the universe In this masterly synthesis Arthur Koestler cuts through the sterile distinction between sciences and humanities to bring to life the whole history of cosmology from the Babylonians to Newton He shows how the tragic split between science and religion arose and how in particular the modern world view replaced the medieval world view in the scientific revolution of the seventeenth century He also provides vivid and judicious pen portraits of a string of great scientists and makes clear the role that political bias and unconscious prejudice played in their creativity *The Sleepwalkers* Arthur Koestler (Writer, Great Britain, Hungary), 1959 *Science and Religion* Alan Macfarlane, Mark Turin, 2021-09-30 *Science and Religion* Edwin Salpeter Owen Gingerich and John Polkinghorne is a collection of interviews being published as a book These interviews have been conducted by one of England

s leading social anthropologists and historians Professor Alan Macfarlane Filmed over a period of 40 years the five conversations in this volume are part of Social Science Press s series Creative Lives and Works These transcriptions also form a part of a larger set of interviews that cut across various disciplines from the social sciences the sciences and to the performing and visual arts The current volume is on three foremost physicists and historians of science Edwin Salpeter recounts rather dispassionately his departure from Austria to Australia to escape Nazi persecution And in doing so broaches not only on the prevailing anti Semitic sentiment of the time but takes the debate forward into the one between science and religion Though he only touches upon it this debate finds resonance in the words of Owen Gingerich who belonged to the Mennonite dispensation and who has been rather vocal about the pro Christian anti creationist ideology However it is John Polkinghorne who provides a deep insight into the ongoing debate on science and religion Immensely riveting as conversations this collection reveals how intrinsically related science and religion are how pertinent it is to understand the workings of science in the context of religion The book will be of enormous value not just to those interested in Astronomy and Cosmology as well as the History of Science but also to those with an inquisitive mind Please note This title is co published with Social Science Press New Delhi Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka

Space, Time, and the Origins of Transcendental Idealism Matthew Rukgaber, 2020-11-21 This book provides an account of the unity of Immanuel Kant s early metaphysics including the moment he invents transcendental idealism Matthew Rukgaber argues that a division between two worlds the world of matter force and space on the one hand and the world of metaphysical substances with inner states and principles preserved by God on the other is what guides Kant s thought Until 1770 Kant consistently held a conception of space as a force based material product of monads that are only virtually present in nature As Rukgaber explains transcendental idealism emerges as a constructivist metaphysics a view in which space and time are real relations outside of the mind but those relations are metaphysically dependent on the subject The subject creates the simple now and here thus introducing into the intrinsically indeterminate and infinitely divisible continua of nature a metric with transformation rules that make possible all individuation and measurement
