

Small Enterprise Policy in Transition Economies: Progress with the Wrong Model?

*Milford Bateman**

University of Wolverhampton

Abstract: The paper starts by considering the neo-liberal approach to small enterprise development and why it was to underpin small enterprise policy in Central and Eastern Europe (CEE) from the very first years of the transition. Author briefly considers what other policy models or alternatives were realistically on offer at that time. His final concern is with the actual results of the neo-liberal policy interventions in CEE in practice. The paper focuses particularly on the programmes supported by the international assistance community, since they were largely responsible for both the financing and the design of the bulk of the interventions which emerged after 1989.

Kirby,Anna Watson,2017-11-22 This title was first published in 2003 Since the late 1970s there has been considerable interest in the role of small firms in economic development in general and employment generation in particular Throughout the developed world governments have introduced a range of measures to encourage small firm growth and development in an attempt to stimulate economic growth generate employment and foster innovation Though not all measures have been successful many policies have transferred to the transition economies of Central and Eastern Europe where since 1989 small firm growth and development has achieved considerable importance in economic restructuring Accordingly this volume presents the leading research on the role of small firms in economic development and employment generation in both transition and developed countries Setting itself in a wider theoretical context the book also considers the implications for both policy and theory and suggests directions for future research **Transnational Business** Galen Spencer Hull,2022-03-26 First Published in 1999 Small Businesses Trickling Up in Central and Eastern Europe argues that micro small and medium sized enterprises in selected countries of Central and Eastern Europe CEE have been the key to economic growth rather than privatized large scale enterprises Small businesses have come to constitute the most dynamic element of growth in the emerging markets of the CEE region in the last decade In 1989 most of the countries of the region were still under the political and economic domination of the Soviet Union Since then a process of liberalization has been unleashed in the region to dismantle statist economic policies and replace them with free market policies This has involved programs of privatization and restructuring of state owned enterprises as well as the promotion of policies to enable a private sector to develop Small businesses are creating thousands of new jobs while large companies are retrenching and downsizing their workforce In some countries of the region this process is much further along than in others In each country however the small and medium enterprise SME

sector has developed at a more rapid pace than has the privatization of the large public companies The privatization of small and medium sized state owned enterprises has been rather more successful With the economic transition there has been a flurry of new enterprises springing up throughout the region some registered as legal entities but many micro enterprises often remaining unregistered in the informal sector Micro enterprises are increasingly seen as an important element of this SME sector although they were traditionally treated separately as belonging to the informal sector and a detriment to economic growth *Small Business in Transition Economies* ,1996 *Small Business in Transition Economies* ,1996

technology creation of hybrid social and economic mission ventures and strategic re orientation led to success in these transition economies The stories of how these teams pooled resources persevered and devised new approaches to innovation by creating something new or internationalizing gives us a sense of the new entrepreneurial approaches needed to succeed in this region Given there were few role models and road maps these entrepreneurs had to learn by doing Their stories are inspirational and provide valuable lessons for entrepreneurial success in the wake of turbulent political economic restructuring Candida G Brush Babson College US This original selection of case studies from eight new EU member countries looks at the ability of entrepreneurs to develop innovative and successful firms in an environment of turbulent social and economic change The Cutting Edge focuses on the innovative potential that these transition country environments provide and how entrepreneurs have been able to convert these possibilities into successful businesses The contributors highlight specific aspects of the interplay between the institutional setting and the environment They also elucidate the individual characteristics of the entrepreneur that create an enabling context for innovative behaviour to develop and grow drawing attention to the opportunities and constraints offered in each environment This book provides invaluable insights for academics and researchers of entrepreneurship as well as undergraduate and postgraduate students of international business and entrepreneurship It will also provide a stimulating and important read for people conducting business in Europe
