Smith,Raghav Seth,2020 Between 1905 and 1913 French physicist Jean Perrin s experiments on Brownian motion ostensibly put a definitive end to the long debate regarding the real existence of molecules proving the atomic theory of matter While Perrin s results had a significant impact at the time later examination of his experiments questioned whether he really gained experimental access to the molecular realm In this case study in the history and philosophy of science George E Smith and Raghav Seth here argue that despite doubts Perrin s measurements were nevertheless exemplars of theory mediated measurement the practice of obtaining values for an inaccessible quantity by inferring them from an accessible proxy via theoretical relationships between them They argue that it was actually Perrin more than any of his contemporaries who championed this approach during the years in question **Molecular Theory of the Living Cell** Sungchul Ji,2012-04-05 The book presents the first comprehensive molecular theory of the living cell ever published since the cell doctrine was formulated in 1838 1839 It introduces into cell biology over thirty key concepts principles and laws imported from physics chemistry computer science linguistics semiotics and philosophy The author

formulates physically chemically and enzymologically realistic molecular mechanisms to account for basic living processes such as ligand receptor interactions enzymic catalysis force generating mechanisms in molecular motors chromatin remodelling and signal transduction Possible solutions to basic and practical problems facing contemporary biology and biomedical sciences have been suggested including pharmacotherapeutics and personalized medicine
