## **The Banner Of The Upright Seven And Ursula:**

*The Banner of the Upright Seven, and Ursula* Gottfried Keller, 1974 Ursula is a love story between a Swiss soldier and the daughter of a farmer during the time of the Swiss Reformation lead by Ulrich Zwingli and at the beginning of the Anabaptist movement in Europe in the 16th century

*Commonwealth* Daniel Judah Elazar, 2001-01-01 The late Daniel J Elazar was increasingly concerned with the distortions of democracy in contemporary society In *Commonwealth* he brought together a distinguished group of political scientists to examine the Swiss model of democracy in its original emphasis on community or the commonwealth Contributors to the volume take the Swiss model as a base from which to critique the liberal model best exemplified by the United States While it is admittedly the best contemporary example of liberal democracy or civil society America also displays the problems of this model The modern idea of communal democracy has almost completely disappeared from the United States contributors argue In incisive and cogent essays they suggest that the modern idea of communal democracy may not just be an alternative but a needed antidote to many of the problems with the American system The scholars gathered in this important collection explore the question of how to maintain both community and liberty while at the same time adjusting to changes in the scale of political organization needed for economic prosperity and defense The results yield a unique perspective on contemporary democracy for political theorists and concerned lay readers alike

*Whitewash and the New Aesthetic of the Protestant Reformation* Victoria George, 2013-12-31 This book is a reconsideration of the practice of whitewashing church interiors during the Protestant Reformation in the sixteenth and seventeenth centuries It is the first detailed study of its kind which challenges the view that whitewash was always only a cheap coat of paint Victoria George pulls together several histories of the colour white from the biblical period to the present and ideas about the colour white in philosophy theology art and architecture from antiquity to the present She links them to case studies of the ways in which reformers Huldrych Zwingli and John Calvin thought about colour in a careful analysis of the role of colour thinking in their theological writings The social meanings embodied in the word whitewash as it entered the printed media in the 17th century is explored as part of a chapter on the history of whitewashing itself The long term symbolic and aesthetic implications of the practice of whitewashing are examined in the larger context of material culture in terms of their value as a metaphor for both the Reformed Protestant and the Catholic in opposition to them and for the uses to which whitewash has been put over time George proposes that the practice was not only visually transformative but held importance for religious aesthetics as an agent of change and for an aesthetics of minimalism generally especially evident in the twentieth and twenty first centuries Victoria George received an MFA from the Royal College of Art London an MA from The Architectural Association and a Ph D from Cambridge She has taught religion and the arts at the University of Richmond in Virginia
