### **Information Technology and Socialist Construction** Daniel E.

Saros,2014-05-09 The failure of command central planning in the twentieth century has led to a general disillusionment within the socialist movement worldwide Some alternatives to capitalism have been proposed since the end of the Cold War but none has offered an alternative form of economic calculation This book explains how modern information technology may be used to implement a new method of economic calculation that could bring an end to capitalism and make socialism possible In this book the author critically examines a number of socialist proposals that have been put forward since the end of the Cold War It is shown that although these proposals have many merits their inability effectively to incorporate the benefits of information technology into their models has limited their ability to solve the problem of socialist construction The final section of the book proposes an entirely new model of socialist development based on a needs profile that makes it possible to convert the needs of large numbers of people into data that can be used as a guide for resource allocation This analysis makes it possible to rethink and carefully specify the conditions necessary for the abolition of capital and consequently the requirements for socialist revolution and ultimately communist society Information Technology and Socialist Construction will be of interest to students and scholars of political economy the history of economic thought labour economics and industrial economics

acclaimed account of life in Iraq under US occupation with a new afterword      **Marx, Revolution, and Social Democracy** Philip J. Kain, 2023 Marx Revolution and Social Democracy argues that Marx should be understood as a social democrat In response to claims that Marx is either totalitarian utopian or not a democrat Philip J Kain presents a four fold argument concerning the relationship between Marx and social democracy that Marxian socialist society is compatible with a market economy as long as markets are controlled to eliminate alienation that markets can be controlled democratically that Marx accepted a democratic electoral theory of revolution and that Marx and Engels worked actively with the Social Democratic Party of Germany      *International Academic Transformations and Cross-Border Collaborations* Kayyali, Mustafa, 2024-11-29 International academic transformations and cross border collaborations reshape higher education for universities looking to enhance their global competitiveness and address complex societal challenges Relationships that cross national boundaries are essential when facilitating the exchange of knowledge research and best practices allowing institutions to share resources and knowledge expertise As the world becomes more interconnected research into international academic transformations may create a more inclusive diverse and responsive educational environment International Academic Transformations and Cross Border Collaborations explores the transformations in higher education and academia using international relationships and collaborations It examines the effects of global business relations on academic settings and organizational management practices This book covers topics such as diversity and inclusion higher education and policymaking and is a useful resource for educators academicians scientists business owners economists policymakers and researchers      **Neo-Socialist Property Rights** Cheuk-Yuet Ho, 2015-07-15 Neo Socialist Property Rights The Predicament of Housing Ownership in China examines how urban dwellers practices of acquiring and defending property rights reshape state property family relationality in China Ubiquitous housing ownership has emerged together with a pervasive yet particularized rights discourse and practice in the past two decades Ho Cheuk Yuet considers them to be a condensation and vindication of the principles of family values and emergent neo socialist governance However there are manifested and latent contradictions between rights as interests and rights as a moral principle This book concludes that private property rights are at once enabling and disabling when understood in the light of both the rigorous pursuit of well being in a market economy and the contestation by those who resist forced eviction or the infringement of owners rights In this book Ho provides rarely available ethnographic record of the encounters between evictees and evictors engaged in housing demolition and approaches the topic of urban housing ownership from the investing perspective in contrast to most anthropologists consumption focus analysis Neo Socialist Property Rights links property rights practice to the broader human rights discourse as both a working hypothesis and a historical question      *Faustian Pact in International Law* Edwin Bikundo, 2024-05-31 The book provides an original and captivating perspective on international law and Giorgio Agamben's work The manuscript is profoundly aesthetic textual in its approach as exemplified in its deft and insightful close readings of

drama Goethe's Faust prose fiction Melville's Bartleby and Benito Cereno and lyric be it devotional Laudes Regiae Handel's The Lord is a Man of War or otherwise Edwin Starr's War Boy George's War Song Attentive to language plot theme and characterisation these readings not only read the texts in question but they also read them anew yielding fresh innovative and unique cultural legal interpretations

Atlantic Afterlives in Contemporary Fiction S. Ahlberg, 2016-04-08 Atlantic Afterlives in Contemporary Fiction offers fresh readings of what has been called transatlantic literature In selected twentieth and twenty first century texts it discovers a shift from oceanic place based knowledge to an atmospheric placeless circulation of information Consonant with the displacements of the Information Age this book reads contemporary narrative as it imagines and navigates today's virtual spaces An important conclusion of the book is that intellectual resources are finite and should be used sustainably Thus arguing against a conventional comparative approach this book proposes reading practices that resist the tendency toward an oversupply of reworked literary contexts that seems bent on matching the reach of the World Wide Web Instead the book reimagines place as a practice in the way it is communicated and narrated Ultimately this book empowers the reader to reimagine a future for narrative in the Information Age
