**Mathematics as a Cultural System** Raymond L. Wilder,2014-05-20 Mathematics as a Cultural System discusses the relationship between mathematics and culture The book is comprised of eight chapters discussing topics that support the concept of mathematics as a cultural system Chapter I deals with the nature of culture and cultural systems while Chapter 2 provides examples of cultural patterns observable in the evolution of mechanics Chapter III treats historical episodes as a laboratory for the illustration of patterns and forces that have been operative in cultural change Chapter IV covers hereditary stress and Chapter V discusses consolidation as a force and process Chapter VI talks about the singularities in the evolution of mechanics while Chapter 7 deals with the laws governing the evolution of mathematics Chapter VIII tackles the role and future of mathematics The book will be of great interest to readers who are curious about how mathematics relates to culture

**Environmentally Significant Consumption** National Research Council,Division of Behavioral and Social Sciences and Education,Board on Environmental Change and Society,Committee on the Human Dimensions of Global Change,1997-06-09 There has been much polemic about affluence consumption and the global environment For some observers consumption is at the root of global environmental threats wealthy individuals and societies use far too much of the earth s resource base and should scale back their appetites to preserve the environment for future generations and allow a decent life for the rest of the world Other observers see affluence as the way to escape environmental threats economic development increases public pressure for environmental protection and makes capital available for environmentally benign technologies The arguments are fed by conflicting beliefs values hopes and fears but surprisingly little scientific analysis This book demonstrates that the relationship of consumption to the environment needs careful analysis by environmental and social scientists and conveys some of the excitement of treating the issue scientifically It poses the key empirical questions Which kinds of consumption are environmentally significant Which actors are responsible for that consumption What forces cause or explain environmentally significant consumption How can it be changed The book presents studies that open up important issues for empirical study Are there any signs of saturation in the demand for travel in wealthy countries What is the relationship between environmental consumption and human well being To what extent do people in developing countries emulate American consumption styles The book also suggests broad strategies that scientists and research sponsors can use to better inform future debates about the environment development and consumption      **On Consensus** Jean Pierre Chabot,2022-02-15 On Consensus A Framework for Adaptive Action is a tool in the toolbox of anyone looking to improve decision making processes in general and to build consensus in particular The book provides not only a step by step approach to building consensus but it also provides a framework for thinking about how to think about consensus All institutions are built and sustained through some sort of consensus The degree to which the consensus that underwrites institutions is

conscious determines the future viability of collective choices and actions Democracy is in need of better tools and thinking on consensus The book provides a leverage for those involved in high stakes decision making especially where there is a convergence of governance development and stewardship It explores what is required to arrive at a conscious consensus and to build a path towards more adaptive action Decision framing a profound meeting of minds *Big History and the Future of Humanity* Fred Spier,2015-03-04 big history and the future of humanity This remains the best single attempt to theorize big history as a discipline that can link core concepts and paradigms across all historical disciplines from cosmology to geology from biology to human history With additional and updated material the Second Edition also offers a fine introduction to the history of big history and a superb introductory survey to the big history story Essential reading for anyone interested in a rapidly evolving new field of scholarship that links the sciences and the humanities into a modern science based origin story David Christian Macquarie University Notable for its theoretic approach this new Second Edition is both an indispensable contribution to the emerging big history narrative and a powerful university textbook Spier defines words carefully and recognizes the limits of current knowledge aspects of his own clear thinking Cynthia Brown Emerita Dominican University of California Reflecting the latest theories in the sciences and humanities this new edition of *Big History and the Future of Humanity* presents an accessible and original overview of the entire sweep of history from the origins of the universe and life on Earth up to the present day Placing the relatively brief period of human history within a much broader framework one that considers everything from vast galaxy clusters to the tiniest sub atomic particles big history is an innovative theoretical approach that opens up entirely new multidisciplinary research agendas Noted historian Fred Spier reveals how a thorough examination of patterns of complexity can offer richer insights into what the future may have in store for humanity The second edition includes new learning features such as highlighted scientific concepts an illustrative timeline and comprehensive glossary By exploring the cumulative history from the Big Bang to the modern day *Big History and the Future of Humanity* Second Edition sheds important historical light on where we have been and offers a tantalizing glimpse of what lies ahead *Social Science Under Debate* Mario Bunge,1999-01-01 Bunge contends that social science research has fallen prey to a postmodern fascination with irrationalism and relativism He urges social scientists to re examine the philosophy and the methodology at the base of their discipline *Touching Philosophy, Sounding Religion, Placing Education* Steven Schroeder,2022-04-19 This book redefines religious studies as a field in which a plurality of disciplines interact A social science when understood as a body of knowledge religion is also marked by discovery appreciation orientation and application an interplay of the arts and sciences Teaching religious studies involves the question of the occupation of territories and disentangling occupation from violence **Nature's Magic** Peter Corning,2003-05-05 Nature s Magic presents a bold vision of the evolutionary process from the Big Bang to the 21st century Synergy of various kinds is not only a ubiquitous aspect of the natural world but it has also been a wellspring of creativity and the driver of the broad evolutionary

trend toward increased complexity in nature and human societies alike But in contrast with the many theories of emergence or complexity that rely on some underlying force or law the Synergism Hypothesis as Peter Corning calls it is in essence an economic theory of biological complexity it is fully consistent with mainstream evolutionary biology Corning refers to it as Holistic Darwinism Among the many important insights that are provided by this new paradigm Corning presents a scenario in which the human species invented itself synergistic behavioral and technological innovations were the pacemakers of our biological evolution Synergy has also been the key to the evolution of complex modern societies he concludes **Copper Mines, Company Towns** Dr. Larry R. Stucki, 2009-10-06 Just as few natural species have withstood the test of ever changing earth environments through time relatively few human created systems e g companies governments religions etc long survive their creation What then is the secret of those that continue to defy these odds and what factors have led to the failure of others This manuscript attempts to answer this question using the Phelps Dodge Corporation its unions its Native American and Mexican workforce the Ajo Inter tribal Community Council the Mormon Church The March of Dimes and others as examples Dr Larry R Stucki from the Preface *American Society* Daniel W. Rossides, 1993 This text invites students to pursue a career in sociology entices others to consider advanced courses and yet serves those who will take but one sociology course This basic textbook for Introduction to Sociology can also serve well in courses in American Society **GIs and Germans** Petra Goedde, Associate Professor of History Petra Goedde, 2003-01-01 Goedde finds that as American soldiers fraternized with German civilians particularly as they formed sexual relationships with women they developed a feminized image of Germany that contrasted sharply with their wartime image of the aggressive Nazi storm trooper A perception of German victimhood emerged that was fostered by the German population and adopted by Americans Studying Native America Russell Thornton, 1998 This book addresses for the first time in a comprehensive way the place of Native American studies in the university curriculum Provided by publisher Perspectives in Ethology Nicholas S. Thompson, François Tonneau, 2013-06-29 The relations between behavior evolution and culture have been a subject of vigorous debate since the publication of Darwin's *The Descent of Man* 1871 The latest volume of *Perspectives in Ethology* brings anthropologists ethologists psychologists and evolutionary theorists together to reexamine this important relation With two exceptions the essays by Brown and Eldredge all of the present essays were originally presented at the Fifth Biannual Symposium on the Science of Behavior held in Guadalajara Mexico in February 1998 The volume opens with the problem of the origins of culture tackled from two different viewpoints by Richerson and Boyd and Lancaster Kaplan Hill and Hurtado respectively Richerson and Boyd analyze the possible relations between climatic change in the Pleistocene and the evolution of social learning evaluating the boundary conditions under which social learning could increase fitness and contribute to culture Lancaster Kaplan Hill and Hurtado examine how a shift in the diet of the genus *Homo* toward difficult to acquire food could have determined or coevolved with unique features of the human life cycle These two essays illustrate how techniques that

range from computer modeling to comparative behavioral analysis and that make use of a wide range of data can be used for drawing inferences about past selection pressures As culture evolves it must somehow find its place within and also affect a complex hierarchy of behavioral and biological factors

**The Magdalenian Household** Ezra B. W. Zubrow, Françoise Audouze, James G. Enloe, 2010-09-17 What was home and family like in Paleolithic Europe How did mobile hunter gatherer families live work and play together in the fourteenth millennium BP What were the functional and spatial constraints and markers of their domesticity the processes that create and sustain a household Despite the long recognized absence of comprehensive archaeological data on such ancient homes and hearths the archaeologists in this volume begin unraveling the domesticity of the Upper Paleolithic by drawing on both an immense trove of new material evidence and comparative site data and a range of incisive and illuminating ethnographic analogies theoretical models and

simulations Five Late Magdalenian sites from the Paris Basin and one later Azilian site provide striking evidence of well preserved camps of short duration situated on valley bottoms and buried by gentle floods Of particular interest and value is the site of Verberie rich in lithic tools faunal remains hearts and other indicators of spatial organization which has been excavated continuously for twenty six years by the same director and provides an unparalleled source of information on Paleolithic domesticity The first group of essays and reports look at the technology and demographic evidences of domesticity the second set seeks clues to the spatial patterning of Paleolithic households while the final essays draw on ethnographic analogies to reconstruct and interpret gendered divisions of labor perishable technologies and other activities not directly recognizable from archaeological remains
