

Symbiosis of Action Research and Deliberative Democracy in the Context of Participatory Constitution-Making

Oğuz N. Babüroğlu, Gülrü Z. Göker
and Emre Koyuncu

Since 2007 there has been increased political and societal pressure concerning the making of a new constitution in Turkey. We, the authors are designing venues for fostering widespread participation in constitution-making. In an attempt to detect and resolve the root causes of Turkey's long-standing political and institutional problems, the members of the Turkey side-EU Joint Consultative Committee, which is composed of seven organizations including union of business chambers, agricultural chambers, and trade union confederations, established the Constitution Platform Initiative Group (CPIG) organized under the secretariat of The Economic Policy Research Foundation of Turkey (TEPAV) in 2007. It was based on the premise that the process of constitution-making is as important as the content of the new constitution.

In the first half of the last decade, Turkey witnessed structural changes driven by the EU harmonization process; certain measures were taken for recovering from the economic crisis in 2001. Several amendments to the constitution were made in this period mostly

based on the conciliation among political parties in the parliament. However, the constitution which was initially made in 1982, after the *coup d'état* in 1980, included elements that required change in parts concerning fundamental rights and liberties and the system of checks and balances. After the presidential election crisis in early 2007 the ruling Justice and Development Party (JDP) sought to overcome the crisis with a parliamentary decision on early elections and by promising to make a new constitution. JDP commissioned a group of scholars to draft it; however, despite widespread support for a new constitution, the attempt became widely polarizing because it did not involve a participatory process. CPIG convened and made joint press releases pointing out the importance of societal conciliation and transparency. CPIG recommended building consensus on common principles of the constitution and encouraged a participatory process. It came to host a citizen platform, the Constitutional Platform to ensure public engagement on the making of the constitution. Two hundred and fifty people representing a

The Constitution Of Deliberative Democracy:

The Constitution of Deliberative Democracy Carlos Santiago Nino, 1996-01-01 In this important and wide ranging book a leading political theorist and activist considers the question What justifies democracy Carlos Santiago Nino critically examines answers others have given and then develops his own distinctive theory of democracy emphasizing its deliberative character In Nino s view democracy resembles a moral conversation and is valued because of its capacity to generate an impartial perspective one that takes into account the interests of all citizens Nino s conception of deliberative democracy bears on the way power is organized under a constitution Drawing on a variety of constitutional traditions he criticizes the presidential system and calls for citizens to participate more directly in the political life of their country He also envisions a revitalized role for political parties Nino shows how deliberative democracy can be combined with and supported by other constitutional practices such as the specific wording of the text and the protection of individual rights The complex constitution that emerges from his analysis consists of a historical constitution an ideal constitution of rights and an ideal constitution of power Nino s goal is to explain how these three dimensions of constitutionalism can reinforce rather than conflict with each other In a final chapter he argues that the deliberative conception of democracy requires a more limited role for judicial review than is usually contemplated

Leib, 2010-11-01 We are taught in civics class that the Constitution provides for three basic branches of government executive judicial and legislative While the President and Congress as elected by popular vote are representative can they really reflect accurately the will and sentiment of the populace Or do money and power dominate everyday politics to the detriment of true self governance Is there a way to put We the people back into government Ethan Leib thinks there is and

offers this blueprint for a fourth branch of government as a way of giving the people a voice of their own. While drawing on the rich theoretical literature about deliberative democracy, Leib concentrates on designing an institutional scheme for embedding deliberation in the practice of American democratic government. At the heart of his scheme is a process for the adjudication of issues of public policy by assemblies of randomly selected citizens convened to debate and vote on the issues resulting in the enactment of laws subject both to judicial review and to possible veto by the executive and legislative branches. The popular branch would fulfill a purpose similar to the ballot initiative and referendum but avoid the shortcomings associated with those forms of direct democracy. Leib takes special pains to show how this new branch would be integrated with the already existing governmental and political institutions of our society including administrative agencies and political parties and would thus complement rather than supplant them.

Law, Liberty, and the Rule of Law Imer B. Flores, Kenneth E. Himma, 2012-09-28 In recent years there has been a substantial increase in concern for the rule of law. Not only have there been a multitude of articles and books on the essence, nature, scope, and limitation of the law, but citizens, elected officials, law enforcement officers, and the judiciary have all been actively engaged in this debate. Thus, the concept of the rule of law is as multifaceted and contested as it's ever been, and this book explores the essence of that concept, including its core principles, its rules, and the necessity of defining or even redefining the basic concept. **Law, Liberty, and the Rule of Law** offers timely and unique insights on numerous themes relevant to the rule of law. It discusses in detail the proper scope and limitations of adjudication and legislation, including the challenges not only of limiting legislative and executive power via judicial review but also of restraining active judicial lawmaking while simultaneously guaranteeing an independent judiciary interested in maintaining a balance of power. It also addresses the relationship not only between the rule of law, human rights, and separation of powers but also the rule of law, constitutionalism, and democracy.

Strong Constitutions Maxwell A. Cameron, 2015 A bold argument that constitutional states are not weaker because their powers are divided; they are often stronger because they solve collective action problems rooted in speech and communication. **A Written Constitution for Quebec?** Richard Albert, Léonid Sirota, 2023-01-15 No province in Canada has codified a written constitution, and whether Quebec should be the first remains a controversial question. **A Written Constitution for Quebec** enters into the debate, drawing a roadmap through the legal, political, and constitutional terrain of the issue. Leading scholars each take their own position in the debate, examining the issue from various sides and exploring the forms and limits of a codified Quebec constitution by asking whether Quebec should adopt a written constitution, how the province might go about it, and what such a document might achieve. Along with a comprehensive introduction to constitutional codification and how it relates to Quebec, the book opens with a proposal for a written constitution, with the analyses that follow expressing a diversity of views on the feasibility and desirability of a written constitution for the province. An array of perspectives through the lenses of Indigenous inclusion and reconciliation, interculturalism, and democratic constitutionalism and insights from

other federal and plurinational states are included in this wide ranging volume Taking a doctrinal historical theoretical and comparative approach A Written Constitution for Quebec extensively addresses Quebec s constitutional future in Canada

What are Campaigns For? The Role of Persuasion in Electoral Law and Politics James A Gardner,2009-06-19 Election campaigns ought to be serious occasions in the life of a democratic polity For citizens of a democracy an election is a time to take stock to reexamine our beliefs to review our understanding of our own interests to ponder the place of those interests in the larger social order and to contemplate and if necessary to revise our understanding of how our commitments are best translated into governmental policy or so we profess to believe Americans however are haunted by the fear that our election campaigns fall far short of the ideal to which we aspire The typical modern American election campaign seems crass shallow and unengaging The arena of our democratic politics seems to lie in an uncomfortable chasm between our political ideals and everyday reality What Are Campaigns For is a multidisciplinary work of legal scholarship that examines the role of legal institutions in constituting the disjunction between political ideal and reality The book explores the contemporary American ideal of democratic citizenship in election campaigns by tracing it to its historical sources documenting its thorough infiltration of legal norms evaluating its feasibility in light of the findings of empirical social science and testing it against the requirements of democratic theory

Use in European Democracies Saskia Hollander,2019-04-02 This book demonstrates that the generally assumed dichotomy between referendums and representative democracy does not do justice to the great diversity of referendum types and of how referendums are used in European democracies Although in all referendums citizens vote directly on issues rather than letting their political representatives do this for them some referendums are more direct than others Rather than reflecting the direct power of the People most referendums in EU countries are held by and serve the interests of the political elites most notably the executive The book shows that these interests rarely match the justifications given in the public debate Instead of being driven by the need to compensate for the deficiency of political parties decision makers use referendums primarily to protect the position of their party In unravelling the strategic role played by national referendums in decision making this book makes an unconventional contribution to the debate on the impact of referendums on democracy The

Constitution of the Environmental Emergency Jocelyn Stacey,2018-04-19 This book argues for a reframing of environmental law It starts from the premise that all environmental issues confront lawmakers as emergencies Environmental issues pose a fundamental challenge to law because it is impossible to reliably predict which issues contain the possibility of an emergency and what to do in response to such an unforeseen event These features undermine the conventional understanding of the rule of law This book argues that approaching environmental issues from the emergency perspective leads us to an understanding of the rule of law that requires public justification This requirement recentres the debates in environmental law around the question of why governance under the rule of law is something worth having in the environmental context It elaborates what the rule of law requires of decision makers in light of our ever present vulnerability to catastrophic environmental harm Controversial compelling and above all timely this book presents an important new perspective on environmental law
