The Continuity Of Consciousness:

The Continuity of Consciousness John T. Ferrier, 1934-01-01 *Stream of Consciousness* Barry Dainton, 2002-11 An in depth investigation into the phenomenology of conscious experience the nature of awareness introspection phenomenal space and time consciousness A fascinating and probing study *The Immortal Mind* Ervin Laszlo, 2014-10-09 Scientific evidence for the continual presence of consciousness with or without connection to a living organism Examines findings on the survival of consciousness beyond life including near death experiences after death communication and reincarnation Explains how this correlates precisely with cutting edge physics theories on superstrings information fields and energy matrices Reveals how consciousness manifests in living beings to continue its evolution Evidence now points to consciousness existing beyond the brain such as when the brain is temporarily incapacitated as well as to the survival of consciousness after death Conventional science prefers to dismiss these findings because they cannot be accommodated by a materialist view of reality Spirituality and religion embrace the continuity of consciousness and ascribe it to a nonmaterial spirit or soul that is immortal As such spirituality religion and science continually find conflict in their views But what if there truly is no conflict Based on a new scientific paradigm in sync with experience based spirituality Ervin Laszlo and Anthony Peake explore how consciousness is continually present in the cosmos and can exist without connection to a living organism They examine the rapidly growing body of scientific evidence supporting the continuity of consciousness including near death experiences after death communication reincarnation and neurosensory information received in altered states They explain how the persistence of consciousness beyond the demise of the body means that in essence we are not mortal we continue to exist even when our physical existence has come to an end This correlates precisely with cutting edge physics which posits that things in our plane of time and space are not intrinsically real but are manifestations of a hidden dimension where they exist in the form of superstrings information fields and energy matrices With proof that consciousness is basic to the cosmos and immortal in its deeper nonmanifest realm Laszlo and Peake reveal the purpose of consciousness is to manifest in living beings in order to continuously evolve **The Continuity of Consciousness** John Todd Ferrier, 1951 **The Nature of Consciousness** Ned Block, Owen Flanagan, Guven Guzeldere, 1997-09-10 Intended for anyone attempting to find their way through the large and confusingly interwoven philosophical literature on consciousness this reader brings together most of the principal texts in philosophy and a small set of related key works in neuropsychology on consciousness through 1997 and includes some forthcoming articles Its extensive coverage strikes a balance between seminal works of the past few decades and the leading edge of philosophical research on consciousness As no other anthology currently does *The Nature of Consciousness* provides a substantial introduction to the field and imposes structure on a vast and complicated literature with sections covering stream of consciousness theoretical issues consciousness and representation the function of consciousness subjectivity and the explanatory gap the knowledge argument qualia and monitoring conceptions of

consciousness Of the 49 contributions 18 are either new or have been adapted from a previous publication *The Continuity of Consciousness* L. W. Rogers,2005-12-01 This scarce antiquarian book is a facsimile reprint of the original Due to its age it may contain imperfections such as marks notations marginalia and flawed pages Because we believe this work is culturally important we have made it available as part of our commitment for protecting preserving and promoting the world s literature in affordable high quality modern editions that are true to the original work **Being Human** Margaret S. Archer,2000-12-28 A revindication of the concept of humanity and the primacy of practice over language Unlocking the Brain Georg Northoff,2014 What makes our brain a brain This is the central question posited in *Unlocking the Brain* By providing a fascinating venture into different territories of neuroscience psychiatry and philosophy the author takes a novel exploration of the brain s resting state in the context of the neural code and its ability to yield consciousness The Continuity of Consciousness William D. Schul,1967 An Ontology of Consciousness R. Ellis,2013-03-09 The object of this study is to find a coherent theoretical approach to three problems which appear to interrelate in complex ways 1 What is the ontological status of consciousness 2 How can there be un conscious prereflective or self alienated consciousness And 3 Is there a self or ego formed by means of the interrelation of more elementary states of consciousness The motivation for combining such a diversity of difficult questions is that we often learn more by looking at interrelations of problems than we could by viewing them only in isolation The three questions posed here have emerged as especially problematic in the context of twentieth century philosophy 1 The question of the ontological status of consciousness The question What is consciousness is one of the most perplexing in philosophy so perplexing that many have been motivated to proceed as though consciousness did not exist If William James was speaking rhetorically when he said Consciousness does not exist 1 many behaviorists of the recent past were not 2 James meant only to imply that consciousness is not an independently existing soul substance along side physical substances He did not mean that we do not really have consciousness and he did not provide final resolution for the problem of the causal interrelations between consciousness and the physical realm e g our bodies Many recent philosophers and psychologists however try to proceed as though these problems did not exist **Heredity and environment in the development of men** Edwin Grant Conklin,1922 **The Survival of the Self** Robin Harwood,2018-12-20 First published in 1998 this volume gives an account of personal identity derived from the Butler Reid position arguing that from the first person point of view one necessary condition of personal identity is the survival of the Self Robin Harwood s claim is that a normal human person is a combination of a Self a mind and a body locating the issue of personal identity as stemming from the nature of persons as compound entities Phenomenology and Phaneroscopy: A Neglected Chapter in the History of Ideas Ahti-Veikko Pietarinen,Mohammad Shafiei,2024-10-03 This book shows for the first time in its full spectrum the interconnectedness and topicality of two historically and philosophically significant developments of philosophical theories of the study of mind that of phenomenology of Edmund Husserl and phaneroscopy of

Charles S Peirce The chapters in this book put the two thinkers in a novel discourse while engaging in mutual scholarship on the large overlaps between the historically two largely independently developed but converging ideas of mind cognition consciousness being and experience It is the second volume in a projected series of three the first of which is Peirce and Husserl *Mutual Insights on Logic Mathematics and Cognition* 2019 This book consists of three parts Part I contains studies on the basic elements and the methodological themes of both phenomenologies vis vis each other Part II of the book is dedicated to metaphysical and existential themes Finally this book contains a hitherto unpublished selection of connected texts from Charles Peirce concerning phaneroscopy the theory of definitions and other related historical philosophical and religious themes from 1910 transcribed and introduced by one of the editors of the volume This book is of interest to scholars in phenomenology phaneroscopy and the history of ideas *The Routledge Handbook of Consciousness* Rocco J.

Gennaro,2018-03-15 There has been an explosion of work on consciousness in the last 30 40 years from philosophers psychologists and neurologists Thus there is a need for an interdisciplinary comprehensive volume in the field that brings together contributions from a wide range of experts on fundamental and cutting edge topics The Routledge Handbook of Consciousness fills this need and makes each chapter s importance understandable to students and researchers from a variety of backgrounds Designed to complement and better explain primary sources this volume is a valuable first stop publication for undergraduate or graduate students enrolled in any course on Consciousness Philosophy of Mind or Philosophy of Psychology as well as a valuable handbook for researchers in these fields who want a useful reference to have close at hand The 34 chapters all published here for the first time are divided into three parts Part I covers the History and Background Metaphysics of consciousness such as dualism materialism free will and personal identity and includes a chapter on Indian philosophy Part II is on specific Contemporary Theories of Consciousness with chapters on representational information integration global workspace attention based and quantum theories Part III is entitled Major Topics in Consciousness Research with chapters on psychopathologies dreaming meditation time action emotion multisensory experience animal and robot consciousness and the unity of consciousness Each chapter begins with a brief introduction and concludes with a list of Related Topics as well as a list of References making the volume indispensable for the newcomer and experienced researcher alike **The Philosophical Quarterly** ,1928 **The Mind's Construction** Matthew

Soteriou,2013-08-29 Matthew Soteriou provides an original philosophical account of sensory and cognitive aspects of consciousness He explores distinctions of temporal character in our mental lives especially in relation to the exercise of agency and illuminates the more general issue of the place and role of mental action in the metaphysics of mind **The Theosophical Path** Katherine Augusta Westcott Tingley,Gottfried Purucker,1922 **Theology, Psychology and the Plural Self** Léon Turner,2016-02-17 Is the human self singular and unified or essentially plural This book explores the seemingly disparate ways that Christian theology and the secular human sciences have approached this complex question

The latter have largely embraced the idea of the plural self as an inescapable even adaptive feature of psychological life. Contemporary Christian theology by contrast has largely neglected recent psychological accounts of the naturalness of self plurality and has sought to reaffirm the self's unity in opposition to those postmodern theorists who would dismantle it. Through an original analysis of recent theological and secular accounts of self and personhood this book examines the extent of the intertheoretical disparity and its broader implications for theology's dialogue with the human sciences in general and psychology in particular. It explains why theologians ought to take questions about the plurality of self very seriously and how they overlap with many of the central concerns of contemporary theological anthropology including the notions of relationality, particularity and human sinfulness. Introducing a novel psychological framework to distinguish various understandings of self-disunity, the author argues that contemporary theology's blanket condemnation of self-multiplicity is misconceived and identifies a possible means of reconciling theological and human scientific accounts. *The Golden Lake* Lyssa Royal-Holt, 2019-10-04. Beginning with the classic book *The Prism of Lyra* in 1989, Lyssa Royal-Holt's channeling has focused on presenting profound galactic wisdom in a grounded way to assist our lives on Earth. In this book, the most detailed and powerful channeled teachings that have come through in recent years are presented in depth. These new teachings are sourced from ancient Vega mysticism, the awakening teachings brought to Earth in ancient days from both Sirius and the Pleiades, called the School of the Nine Serpents. After millennia of absence, our Sirian and Pleiadian ancestors have now resumed their teachings to match the next phase of human evolution. This book contains two threads. The first thread is the awakening teachings of the Pleiades that were part of the ancient school called the Golden Lake Teachings. These work with the heart and have the gentle and distinct flavor of our Pleiadian ancestors. The second thread is the Sirian teachings that make up the structural foundation of the School of the Nine Serpents. You don't need to believe in the reality of extraterrestrials to gain immense benefit from the wisdom in this book. These teachings are consciousness-centered and based on the necessary integration of body, mind, spirit, and emotion, as well as light and shadow. Together, the Pleiadian and Sirian teachings provide an invaluable road map for the next phase of human evolution: the integration of polarity and the awakening of human consciousness beyond duality. *The Meaning of Consciousness* Carl Gustaf Erickson, 1922.
