Tricas,Samuel H. Gruber,2013-06-29 The elasmobranch fishes include the living sharks skates and rays that are important members of nearly all marine ecosystems Their large size secretive behavior and wide ranging habits make them difficult to observe in the field or to maintain in captivity Consequently little is known about their natural behavior and how it is mediated by their sensory systems This volume is dedicated to the scientific contributions and memory of Donald Nelson a pioneer in the study of shark behavior sensory biology and remote instrumentation The two opening papers review Don Nelson s unique scientific accomplishments and provide insight into his strong bias towards study of animals in the field These are followed by 14 scientific papers on elasmobranch behavior sensory biology and current monitoring technologies The papers on elasmobranch sensory biology and behavior address questions on hearing the lateral line electroreception the brain orientation behavior chemical irritants feeding and reproduction The latter section of the volume presents papers on conventional tagging techniques ultrasonic telemetry physiological telemetry remote monitoring techniques archival tagging and satellite tagging The intent of this volume is to familiarize both new and established scientists with the sensory biology and behavior of sharks and rays and to encourage further behavioral research on these animals in their natural environment The 1920 Olympic Games Bill Mallon,Anthony Th. Bijkerk,2015-07-11 Until this volume was compiled the results of the 1920 Olympics held in Antwerp Belgium have been far from complete The Antwerp organizing committee typed up a report of the results almost as an afterthought because it was so financially strapped after the games For some events only the medalists are listed with little if any additional information Very few copies were ever produced and those few copies were in French The seventh in a series on the early Olympics this work fills a gap in the recording of early Olympics history by providing complete results for all competitors and all events except for shooting which has only partial information available In virtually all cases a 1920

source has been used in preference to a more modern source of information and all details have been fully researched in contemporary newspapers journals and magazines and checked for accuracy by experts on various sports from all over the world
